Clean House - Happy House CreateSpace Fuelled by forces of globalization, China has gradually shifted from a centrally planned economy to a socialist market economy. Under the market economy China has experienced a massive and protracted economic boom. It is not

clear however whether recent economic changes have brought the same miracle to education in China. Spotlight on China brings together established and emerging scholars from China and internationally in a dialogue about the profound social and economic transformation that has resulted from the market economy and its concomitant impact on education in China. The book covers a wide range of topics, including: Market economy and curriculum reform Teaching under China's market economy Changes in higher education Transitions from education to work Market economy and social inequality With its broad scope and fresh critical perspectives, this collection offers a most contemporary and comprehensive analysis of possibly the largest education system in the world. Lessons learned from the China experiment will inform researchers and educators about social and educational reforms in other countries which are undergoing similar fundamental changes. "Spotlight on China provides a state of the art picture: dynamic, partial,

full of contradictions and tensions, and, as we speak, in movement and local reconfiguration." - Allan Luke, Queensland University of Technology

"The book moves social science research on China's education another step forward by refining the balance between the viability of mainstream western concepts and the analytical possibilities of creating a new scholarship based on a deeper understanding of the historically grounded realities of contemporary Chinese education." - Gerard A. Postiglione, The University of Hong Kong"

Simple Cleaning Wisdom Meredith Books

Yes! you really can clean your house and everything in it using just 3 products and it will cost you about \$20 per year. I have owned a residential cleaning company since 2004 and this book actually started life as my employees' handbook. Since this book was first published not much has changed. Dirt is still dirty and whether or not you want to clean your home, it still has to be cleaned. Most people hate to clean simply because they don't know how to do it, they

were never taught. Were you actually taught how to clean? Probably not, but that's not your fault. Do you want to learn how to do it, like a professional, using minimal products and saving a bucket of money on cleaning supplies? If you do, then buy my book. First, I will send you to the store with a short shopping list; I will explain why I use each product and then how to use each product or tool, which by the way isn't much. I will then explain the logic behind my method of cleaning, called The PATH and then I will literally walk you through cleaning the different rooms in your house. The beauty of The PATH is that you can start and stop a cleaning job in any room and not lose your place. Just pick up where you left off and continue until the room is clean. So go answer the phone or change the baby. I only use 3 readily available products in both my business and in my house to clean everything. No more need for window, floor, counter, toilet, sink, tub, shower and mirror cleaners. No more polishes, waxes or air fresheners. Just think about how much you spend a year on cleaning products? Go ahead, I'll

wait while you look under your sinks and calculate that. More than \$20.00 per year? If you are spending more than that you need my book. Everyone that embraces my methodology has a cleaner home, extra money to spend on the important things and the time to enjoy them. I have a website; The Lost Art of House Cleaning.com where I have uploaded a number of videos demonstrating my methodology and posted numerous articles on cleaning particular things. I have read all the reviews posted about my book on Amazon and I found the vast majority to be very complimentary. I have also found that some of the harshest critics still recognized that my methodology works. In addition to the Amazon reviews I have personally received comments and compliments directly from the people that have bought my book. And I know that what I say in my book has helped thousands realize that cleaning their home is not all it's cracked to be if you know what you are doing. So buy my book, read it the first time for entertainment then read it a second time for inspiration and then,

Enjoy the Clean!

Go green with this rollicking guide to eco-friendly cleaning alternatives that will help you save your health, your money, and your planet. How many times have you said you're killing yourself trying to keep your house clean?

You might have been joking, but you're closer to the truth than you think if you're using expensive commercial cleansers.

Karen Logan, an environmentalist with years of experience developing and selling her own line of eco-friendly cleaning products, reveals the secret of using simple, ordinary ingredients—like baking soda, vinegar, soap, lemon juice, and salt—to make safe, inexpensive cleaners. For instance, did you know: - Olive oil is not only good as a salad dressing, but also as a furniture polish. - Plain club soda works great as a window cleaner. - You can make your copper-bottomed pots sparkle with just lemon juice and salt. - Ordinary liquid soap and water will clean up those ants marching through your kitchen.
