Author Mathew Tekulsky wrote the first book on butterfly gardening for North America, nearly 40 years ago! Butterfly gardening is the practice of attracting beautiful butterflies to your garden by growing common plants and flowers that they use for food and nectar. This fun and wonderfully simple activity will bring color, light, and beauty to your garden and home. With the relaxing and rewarding qualities of this outdoor hobby, it's not hard to see why it's sweeping the nation and growing in popularity. How to Create a Butterfly Garden is a complete, step-by-step guide to gardening for butterflies. You'll learn about: The butterfly life cycle, habitats, and behaviors Choosing and obtaining food and nectar sources Designing your garden Options for country, suburban, and city gardens Fifty common garden butterflies and the plants they like Butterfly observation and conservation This guide will teach you everything you need to get started—whether you're a suburban resident, the owner of a small urban garden, an apartment dweller, or a keeper of a country estate, you can enjoy frequent butterfly visits to your garden or window box. The key, Tekulsky believes, is learning some basic knowledge of butterfly characteristics and behavior and knowing how to meet the needs of the butterfly species most common in your neighborhood. Not only is butterfly gardening one of the easiest ways to enjoy these enchanting creatures, but it's also a wonderful way to help conserve natural butterfly populations for generations to come. Learn how to create your own beautiful butterfly garden today!

While many growers focus on attracting adult butterflies to their gardens, fewer know about the plants that caterpillars need to survive. Native host plants—wildflowers, trees, shrubs, vines, grasses, and sedges—not only provide a site for the butterfly to lay its eggs, they also provide a ready food source for the emerging caterpillar. Think of these plants as the nurseries of the garden. This user-friendly, heavily illustrated field guide describes 101 native larval host plants in Texas. Each species account includes descriptive information on each plant, a distribution map, and photos of both the caterpillars and adult butterflies who frequent those plants. An adult butterfly may nectar on a wide variety of flowers, but caterpillars are much more restricted in their food sources. Some feed on only a limited number of plant species, so female butterflies seek out these specific plants to lay their eggs. For example, the host plants for Monarch caterpillars are various species of milkweed. Often, these plants are not the same as the ones the adult butterfly will later use for nectar. Learning more about the plants caterpillars need is crucial for butterfly conservation. Butterflies' dependency on specific caterpillar host plants is one of the key factors restricting their range and distribution. Armed with this knowledge, readers can also hone their ability to find specific species of breeding butterflies in nature. This is a handy guide whether you are in the field searching for butterflies or on the hunt for butterfly-friendly options at your local plant sale.

In this eloquent plea for compassion and respect for all species,

journalist and gardener Nancy Lawson describes why and how to welcome wildlife to our backyards. Through engaging anecdotes and inspired advice, profiles of home gardeners throughout the country, and interviews with scientists and horticulturalists, Lawson applies the broader lessons of ecology to our own outdoor

spaces. Detailed chapters address planting for wildlife by choosing native species; providing habitats that shelter baby animals, as well as birds, bees, and butterflies; creating safe zones in the garden; cohabiting with creatures often regarded as

pests; letting nature be your garden designer; and encouraging natural processes and evolution in the garden. The Humane Gardener fills a unique niche in describing simple principles for both attracting wildlife and peacefully resolving conflicts with all the creatures that share our world.
