The author of the international bestseller *The Rise and Fall of the Third Reich* offers a personal account of life in Nazi Germany at the start of WWII. By the late 1930s, Adolf Hitler, Führer of the Nazi Party, had consolidated

power in Germany and was leading the world into war. A young foreign correspondent was on hand to bear witness. More than two decades prior to the publication of his acclaimed history, *The Rise and Fall of the Third Reich*, William L. Shirer was a journalist stationed in Berlin. During his years in the Nazi capital, he kept a daily personal diary, scrupulously recording everything he heard and saw before being forced to flee the country in 1940. *Berlin Diary* is Shirer's first-hand account of the momentous events that shook the world in the mid-twentieth century, from the annexation of Austria and Czechoslovakia to the fall of Poland and France. A remarkable personal memoir of an

extraordinary time, it chronicles the author's thoughts and experiences while living in the shadow of the Nazi beast. Shirer recalls the surreal spectacles of the Nuremberg rallies, the terror of the late-night bombing raids, and his encounters with members of the German high command while he was risking his life to report to the world on the atrocities of a genocidal regime. At once powerful, engrossing, and edifying, *William L. Shirer's Berlin Diary* is an essential historical record that illuminates one of the darkest periods in human civilization.

In 1944, Raphael Lemkin coined the

term “genocide” to describe a foreign occupation that destroyed or permanently crippled a subject population. In this tradition, Empire, Colony, Genocide embeds genocide in the epochal geopolitical transformations of the past 500 years: the European colonization of the globe, the rise and fall of the continental land empires, violent decolonization, and the formation of nation states. It thereby challenges the customary focus on twentieth-century mass crimes and shows that genocide and “ethnic cleansing” have been intrinsic to imperial expansion. The complexity of the colonial encounter is reflected in the

contrast between the insurgent identities and genocidal strategies that subaltern peoples sometimes developed to expel the occupiers, and those local elites and creole groups that the occupiers sought to co-opt. Presenting case studies on the Americas, Australia, Africa, Asia, the Ottoman Empire, Imperial Russia, and the Nazi “Third Reich,” leading authorities examine the colonial dimension of the genocide concept as well as the imperial systems and discourses that enabled conquest. Empire, Colony, Genocide is a world history of genocide that highlights what Lemkin called “the role of the human group and its tribulations.”

 Food and cuisine are important subjects for historians across many areas of study. Food, after all, is one of the most basic human needs and a foundational part of social and cultural histories. Such topics as famines, food supply, nutrition, and public health are addressed by historians specializing in every era and every nation. *Food in Time and Place* delivers an unprecedented review of the state of historical research on food, endorsed by the American Historical Association, providing readers with a geographically, chronologically, and topically broad understanding of food

cultures—from ancient Mediterranean and medieval societies to France and its domination of haute cuisine. Teachers, students, and scholars in food history will appreciate coverage of different thematic concerns, such as transfers of crops, conquest, colonization, immigration, and modern forms of globalization.

Toussaint L'Ouverture was the leader of the Haitian Revolution in the late eighteenth century, in which slaves rebelled against their masters and established the first black republic. In this collection of his writings and speeches, former Haitian politician Jean-Bertrand Aristide demonstrates

L'Ouverture's profound contribution to the struggle for equality. The Origins of the Modern World ARC Humanities Press For the past three decades, many history professors have allowed their biases to distort the way America's past is taught. These intellectuals have searched for instances of racism, sexism, and bigotry in our history while downplaying the greatness of America's patriots and the achievements of "dead white men." As a result, more emphasis is placed on Harriet Tubman than on George Washington; more about the internment of Japanese Americans during World War II than about D-Day or Iwo Jima; more on the

dangers we faced from Joseph McCarthy than those we faced from Josef Stalin. A Patriot's History of the United States corrects those doctrinaire biases. In this groundbreaking book, America's discovery, founding, and development are reexamined with an appreciation for the elements of public virtue, personal liberty, and private property that make this nation uniquely successful. This book offers a long-overdue acknowledgment of America's true and proud history.

The Middle East in Modern World History focuses on the history of this region over the past 200 years. It

examines how global trends during this period shaped the Middle East and how these trends were affected by the region's development. Three trends from the past two centuries are highlighted: The region as a strategic conduit between East and West. The development of the region's natural resources, especially oil. The impact of a rapidly globalizing world economy on the Middle East.

Finally liberated by the end of South Africa's tyrannical white rule, Trevor and his mother set forth on a grand adventure, living openly and freely and embracing the opportunities won by a centuries-long struggle. *Born a Crime* is the story of a mischievous young boy who grows into a restless young man as he struggles to find himself in a world where he was never supposed to exist. It is also the story of that young man's relationship with his fearless, rebellious, and fervently religious mother—his teammate, a woman determined to save her

son from the cycle of poverty, violence, and abuse that would ultimately threaten her own life. The stories collected here are by turns hilarious, dramatic, and deeply affecting. Whether subsisting on caterpillars for dinner during hard times, being thrown from a moving car during an attempted kidnapping, or just trying to survive the life-and-death pitfalls of dating in high school, Trevor illuminates his curious world with an incisive wit and unflinching honesty. His stories weave together to form a moving and searingly funny portrait of a boy making his way through a damaged world in a dangerous time, armed only with a keen sense of humor and a mother's

unconventional,
unconditional love.

Ways of the World

A critical reading of both literary and non-literary German texts published between 1490 and 1540 exposes a populist backlash against perceived social and political disruptions, the dramatic expansion of spatial and epistemological horizons, and the growth of global trade networks. These texts opposed the twin phenomena of pluralization and secularization, which promoted a Humanist tolerance for ambiguity, boosted globalization and spatial expansion around 1500, and promoted new ways of imagining the world. Part I considers threats

to the political order and the protestations against them, above all a vigorous defense of the common good. Part II traces the intellectual and epistemological upheaval triggered by the spatial discoveries and the new methods of visual and verbal representation of space. Part III examines the nationalistic backlash triggered by the rising global trade and related abusive trading practices and by perceived undue foreign influences. It is the basic premise of this book that the texts examined here protested the observed disruptions of the status quo and sought to reestablish a stable imperial order in the face of political and social upheaval and of the felt cultural decline

of the German nation.

One of the BBC's '100 Novels That Shaped Our World' A worldwide bestseller and the first part of Achebe's African Trilogy, *Things Fall Apart* is the compelling story of one man's battle to protect his community against the forces of change. Okonkwo is the greatest wrestler and warrior alive, and his fame spreads throughout West Africa like a bush-fire in the harmattan. But when he accidentally kills a clansman, things begin to fall apart. Then Okonkwo returns from exile to find missionaries and colonial governors have arrived in the village. With his world thrown radically off-

balance he can only hurtle towards tragedy. First published in 1958, Chinua Achebe's stark, coolly ironic novel reshaped both African and world literature, and has sold over ten million copies in forty-five languages. This arresting parable of a proud but powerless man witnessing the ruin of his people begins Achebe's landmark trilogy of works chronicling the fate of one African community, continued in *Arrow of God* and *No Longer at Ease*. We live in a world that is increasingly vulnerable to climatic shocks - affecting agriculture and industry, government and international trade, not to mention human health and happiness. Serious anxieties have been aroused by respected scientists warning of dire perils that could result from upsets of the climatic regime. In this internationally acclaimed book, Emeritus Professor Hubert Lamb examines what we know about

climate, how the past record of climate can be reconstructed, the causes of climatic variation, and its impact on human affairs now and in the historical and prehistoric past. This 2nd Edition includes a new preface and postscript reviewing the wealth of literature to emerge in recent years, and discusses implications for a deeper understanding of the problems of future climatic fluctuations and forecasting.

Modern World History: The Origins of the Modern World offers a refreshing alternative to Eurocentric histories by exploring the roles that Asia, Africa, and the New World played in creating the world we know today.

Starting in 1400, it brings the saga of the modern world to the present, considering how and why the United States emerged as a world power in the 20th century and why Asia is experiencing resurgence now.

Ways of the World, Volume 1 Univ of California Press

An exciting account of the origins of the modern world Who formed the first literate society? Who invented

our modern ideas of democracy and free market capitalism? The Scots. As historian and author Arthur Herman reveals, in the eighteenth and nineteenth centuries Scotland made crucial contributions to science, philosophy, literature, education, medicine, commerce, and politics—contributions that have formed and nurtured the modern West ever since.

Herman has charted a fascinating journey across the centuries of Scottish history. Here is the untold story of how John Knox and the Church of Scotland laid the foundation for our modern idea of democracy; how the Scottish Enlightenment helped to inspire both the American Revolution and the U.S.

Constitution; and how thousands of Scottish immigrants left their homes to create the American frontier, the Australian outback, and the British Empire in India and Hong Kong. How the Scots Invented the Modern World reveals how Scottish genius for creating the basic ideas and institutions of modern life stamped the lives of a series of remarkable historical

figures, from James Watt and Adam Smith to Andrew Carnegie and Arthur Conan Doyle, and how Scottish heroes continue to inspire our contemporary culture, from William “Braveheart” Wallace to James Bond. And no one who takes this incredible historical trek will ever view the Scots—or the modern West—in the same way again.
