The Goddess of Happiness Harmony

Most people consider happiness the most important pursuit in life, yet few seem to find it. Women, in particular, face a constant internal battle between finding their own happiness and ensuring the happiness of others. Debbie Gissoni, aka "The Goddess of Happiness," shows that happiness is a choice that anyone can make, anytime and anywhere. In 44 dynamic entries the author shares her stories, insights, humor, and simple suggestions to bring out the radiant Goddess in every woman. Each entry includes meditations and journaling ideas to help readers transform the pursuit of happiness into a tangible,

everyday practice. Gissoni teaches that all women are goddesses — they just need to tap their innate power and reacquaint themselves with their own magic; and that life is meant to be enjoyable — not to be taken so seriously or made too complicated. Each of these chapters ends with five simple ways to have an easier and happier life.

The present ecological mutation has organized the whole political landscape for the last thirty years. This could explain the deadly cocktail of exploding inequalities, massive deregulation, and conversion of the dream of globalization into a nightmare for most people. What holds these three phenomena together is the conviction, shared by some

powerful people, that the ecological threat is real and that the only way for them to survive is to abandon any pretense at sharing a common future with the rest of the world. Hence their flight offshore and their massive investment in climate change denial. The Left has been slow to turn its attention to this new situation. It is still organized along an axis that goes from investment in local values to the hope of globalization and just at the time when, everywhere, people dissatisfied with the ideal of modernity are turning back to the protection of national or even ethnic borders. This is why it is urgent to shift sideways and to define politics as what leads toward the Earth and not toward the global or the national. Belonging to a territory is the phenomenon most in need of rethinking and careful redescription; learning new ways to inhabit the Earth is our biggest challenge. Bringing us down to earth is the task of politics today.
