In the 1290s a new guild-
based Florentine
government placed a
group of noble families
under severe legal
restraints, on the grounds
that they were both the
most powerful and the
most violent and
disruptive element in the
city. In this colorful
portrayal of civic life in
medieval Florence, Carol

Lansing explores the patrilineal structure and function of these urban families, known as "magnates." She shows how they emerged as a class defined not by specific economic interests but by a distinctive culture. During the earlier period of weaker civic institutions, these families built their power by sharing among themselves crucial resources--forts, political alliances, ecclesiastical rights. Lansing examines this activity as well as the responses patrilineal strategies drew from women, who were excluded from inheritance and full lineage membership. In looking at the elements of this culture, which emphasized private military force, knighthood, and faction, Lansing argues that the magnates' tendency toward violence derived from a patrician youth culture and from the instability inherent in the exaggerated use of patrilineal ties. In describing the political changes of the 1290s, she shows how some families eventually dropped the most stringent aspects of patrilineage and exerted their influence through institutions and patronage networks. Can innovations in business change society? Can innovations in society change business? These two questions have become critically urgent in recent years, but are rarely considered together. 'Business Models for Sustainability Transitions' therefore asks, can contemplating both concepts together result in a flourishing, sustainable future? Technology alone cannot save us. We cannot consciously consume our way out of trouble. This book represents a start at bridging the dynamic world of business model innovation with the constant and unprecedented transitions underway in the world around us. For researchers, practitioners, and policy makers, the coupling of the two questions has the potential to unlock answers to our grand global challenges with responses that are at the same time rapid and enduring. This work offers unique and considered glimpses into what it may

take to harness wide-ranging innovations for the collective good.
