"This book is designed to help students organize their thinking about psychology at a conceptual level. The focus on behaviour and empiricism has produced a text that is better organized, has fewer chapters, and is somewhat shorter than many of the leading books. The beginning of each section includes learning objectives; throughout the body of each section are key terms in bold followed by their definitions in italics; key takeaways, and

exercises and critical thinking activities end each section"--BCcampus website.

 The new edition of this

brief introductory text retains the hallmark features that have made its parent text unique, while offering a more manageable, student-friendly format. The book was written with three goals in mind: to make the study of psychology accessible and engaging to the beginning student in psychology, to provide students with a solid grounding in the knowledge base in psychology, and to help students succeed in the course. Nevid's comprehensive learning

system-derived from research on memory, learning, and textbook pedagogy-is featured throughout. This learning model incorporates what the author calls the Four E's of Effective Learning-Engaging Student Interest, Encoding Information, Elaborating Meaning, and Evaluating Progress. *ESSENTIALS OF PSYCHOLOGY: CONCEPTS AND APPLICATIONS*, 4th Edition, provides a broad view of psychology as well as applications of the knowledge gained from contemporary research to

the problems and challenges we face in today's world. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

Make introductory psychology modern and accessible! Strike a balance between classic and contemporary topics and theory. The new edition of this text engages students with local ideas and examples,

within the context of psychology as an international discipline. Rich cultural and indigenous coverage is integrated throughout the text, as well as new chapters, 'Indigenous psychology', and 'Culture and psychology'. There is also the continued, and unique focus throughout the text on graduate attributes for accreditation, careers in psychology and the professional discipline of psychology. Linkages features in the text knit together student

understanding of psychology's sub-disciplines, and the research sections show the how and why of research. View the Page-Referenced Guide to the DSM-5 updates for Exploring Psychology. [Psychology](#) Macmillan In this fresh new offering to the Intro Psychology course, authors John Cacioppo and Laura Freberg portray psychology as being an integrative science in two ways. First, they have written a text that reflects psychology's rightful place as a hub science that draws from and is cited by research in many other fields. Second, this text presents psychology

as a unified science that seeks a complete understanding of the human mind, rather than as a loosely organized set of autonomous subspecialties. As psychology moves rapidly toward maturity as an integrative, multidisciplinary field, the introductory course offers an opportunity to teach all of psychology in one place and at one time. This text reflects that evolution-- and the authors' excitement about it. Important Notice: Media content referenced within
