Corporate Ethics Practices
Springer
Ethics in business is not a new topic and has been intensely discussed since the emergence of the so-called limited companies.

However, privatization, technological and digital innovation, changes in moral perception, economic and financial crises and globalization stir a more recent debate on how companies should behave in our societies. This book starts from the position that ethics in business should imply an open debate on norms and values, using a sound methodology to get there.

Ethics should cross borders: not only the borders of a country, but also the borders of someone's moral imagination. Ethics should not only be about harmony but also about conflict (and how to deal with that). Ethics should be realistic and well substantiated by academic research. Ethics should be used to understand the complexity of the world, and the challenges companies

struggle with on various levels. Therefore, this book is composed of three parts in which ethics is discussed at different levels. In part one we discuss ethics at the level of the individual. In part two we discuss ethics and business. In the third part, ethics is discussed in the context of a globalized world. In each chapter, we discuss the ethical complications of each topic from various – and preferably opposing – perspectives. Each perspective is methodologically and academically substantiated. Each chapter ends with an extensive literature list in which the original sources are listed for further reading. Furthermore, at the end of each chapter, a summary is written in which the most important definitions and viewpoints are highlighted. The frequent use of colorful and bold examples make this an accessible read for bachelor and master students at business schools and professionals in international business.

Business & Professional Ethics

Routledge
This volume brings together a selection of

papers written by Patricia Werhane during the most recent quarter century. The book critically explicates the direction and development of Werhane's thinking based on her erudite and eclectic sampling of orthodox philosophical theories. It starts out with an introductory chapter setting Werhane's work in the context of the development of Business Ethics theory and practice, along with an

illustrative time line. Next, it discusses possible interpretations of the papers that have been divided across a range of themes, and examines Werhane's contribution to these thematic areas. Patricia H. Werhane is a renowned author and innovator at the intersection of philosophy and Applied Business Ethics. She is professor emerita and a senior fellow at the Olsson Centre for

Applied Ethics at Darden and was formerly the Ruffin Professor of Business Ethics. She is also professor emerita at DePaul University, where she was Wicklander Chair in Business Ethics and director of the Institute for Business and Professional Ethics. A prolific author whose works include Moral Imagination and Management Decision-Making and Organization Ethics for

Health Care, Werhane is an acclaimed authority on employee rights in the workplace, one of the leading scholars on Adam Smith and founder and former editor-in-chief of Business Ethics Quarterly, the leading journal of Business Ethics. She was a founding member and past president of the Society for Business Ethics and, in 2001, was elected to the executive committee of

the Association for Practical and Professional Ethics. Before joining the Darden faculty in 1993, Werhane served on the faculty of Loyola University Chicago and was a Rockefeller Fellow at Dartmouth College and Senior Fellow at Cambridge University. **Business Ethics** Rowman & Littlefield Education In the modern business environment, companies strive to

International Business Ethics and Growth Opportunities presents the necessary

methods and resources for managers and directors to be successful in leading their corporations in a responsible and morally conscious manner. Examining the dangers of unethical behavior, this book provides the strategies and tools for proper management to encourage company strength and success.
