Bullshit isn't what it used to be. Now, two science professors give us the tools to dismantle misinformation and think clearly in a world of fake news and bad data. "A modern classic . . . a straight-talking survival guide to the mean streets of a dying democracy and a global pandemic."—Wired Misinformation, disinformation, and fake news abound and it's increasingly difficult to know what's true. Our media environment has become hyperpartisan. Science is conducted by press release. Startup culture elevates bullshit to high art. We are fairly well equipped

to spot the sort of old-school bullshit that is based in fancy rhetoric and weasel words, but most of us don't feel qualified to challenge the avalanche of new-school bullshit presented in the language of math, science, or statistics. In *Calling Bullshit*, Professors Carl Bergstrom and Jevin West give us a set of powerful tools to cut through the most intimidating data. You don't need a lot of technical expertise to call out problems with data. Are the numbers or results too good or too dramatic to be true? Is the claim comparing like with like? Is it confirming your personal bias? Drawing on a deep well of expertise in statistics and computational biology, Bergstrom and West exuberantly unpack examples of selection bias and muddled data visualization, distinguish between correlation and causation, and examine the susceptibility of science to modern bullshit. We have always needed people who call bullshit when necessary, whether within a circle of friends, a community of scholars, or the citizenry of a nation. Now that bullshit has evolved, we need to relearn the art of skepticism. Examining situational complexity is a vital part of social and behavioral science research. This engaging text provides an effective process for studying multiple cases--such as sets of teachers, staff development sessions, or clinics operating in different locations--within one complex program. The process also can be used to investigate broadly occurring phenomena without programmatic links, such as leadership or sibling rivalry. Readers learn to design, analyze, and report studies that balance common issues across the group of cases with the unique features and context of each case. Three actual case reports from a transnational early childhood program illustrate the author's approach, and helpful reproducible worksheets facilitate multicase recording and analysis.

Nursing and midwifery students are required to communicate in writing in a variety of forms, for a variety of potential audiences including their colleagues, allied health professionals, administrators and, most importantly, their patients and the public. Dena Bain Taylor is an experienced teacher of writing and critical skills across the range of allied health professions, and understands the types of writing nursing and midwifery students do and the writing issues they face. Her accessible, straightforward book - tailored specifically to the content and conventions of nursing and midwifery curricula - teaches students to write persuasively and correctly, both to support them in their courses and to prepare them for their professional careers. The book: - offers practical strategies for using language to achieve clear, persuasive writing; - provides clear explanations of underlying principles; - contains samples of good and improvable writing, leading the student step-by-step through the whole writing process; - focuses on the genres and styles of writing that nursing and midwifery students are typically asked for. With regular summaries, learning aids, checklists and a glossary of key terms, nursing and midwifery students at all levels will find this book easy to follow and handy to refer to for help with the writing they need to do throughout their course.
