PONCE ASIA		Fabric-cast concrete involves casting concrete in forms made with flexible formwork. This provides the potential to produce forms that are both structurally efficient and architecturally exciting in a relatively inexpensive and practical manner. By careful shaping of the fabric it is possible to produce complex shapes that would otherwise be difficult and expensive to produce using conventional formwork systems. This book contains six essays that describe the collaboration between the Universities of Edinburgh and East London, together with the Centre for Architectural and Structural Technology (CAST) at the University of Manitoba, in their detailed and practical research into concrete casting and formwork. Richly illustrated with photographs and diagrams and containing new and innovative research this book offers the architect, engineer and student inspiration and technical guidance in this re-emerging material.

The fact that most ancient marble portraits were once intentionally polychrome has always been lurking at the corners of art historical and archaeological research. Despite the fact, that the colours of the sculpted forms completed, enhanced and even extended the plastic shapes, the topic has not been devoted much dedicated attention. This book represents the first full-length academic monograph which explores the original polychromy of Roman white marble portraiture. It presents results from scientific analysis of portraits in statuary and bust formats dating to the first three centuries CE. The book also explores the cultural and social significance of colours in their original contexts, and how the immaterial affects of the polychrome, three-dimensional images can be integrated into the traditional research into ancient portraiture, which has tended to place overwhelming emphasis on iconography, typology and biography. By doing so the ancient sculpted marble form, as we know it, will be exposed and confronted, and the impact of manipulated material effects, that were meant to evoke a broad range of multisensory experiences, will be emphasized. The book puts forth a new way of analysis to be tested and developed in the future.	L.A. Confidential is epic "noir", a crime novel of astonishing detail and scope written by the bestselling author of The Black Dahlia. A horrific mass murder invades the lives of victims and victimizers on both sides of the law. And three lawmen are caught in a deadly spiral, a nightmare that tests loyalty and courage, and offers no mercy, grants no survivors. (124,000 words)

From the founders of nonprofits Water.org & WaterEquity Gary White and Matt Damon, the incredible true story of two unlikely allies on a mission to end the global water crisis for good On any given morning, you might wake up and shower with water, make your coffee with water, flush your toilet with water—and think nothing of it. But around the world, more than three-quarters of a billion people can’t do any of that—because they have no clean water source near their homes. And 1.7 billion don’t have access to a toilet. This crisis affects a third of the people on the planet. It keeps kids out of school and women out of work. It traps people in extreme poverty. It spreads disease. It’s also solvable. That conviction is what brought together movie actor Matt Damon and water expert and engineer Gary White. They spent years getting the answer wrong, then halfway right, then almost right. Over time, they and their organization, Water.org, have found an approach that works. Working with partners across East Africa, Latin America, South Asia, and Southeast Asia, they’ve helped over 40 million people access water and/or sanitation. In The Worth of Water, Gary and Matt take us along on the journey—telling stories as they uncover insights, try out new ideas, and travel between the communities they serve and the halls of power where decisions get made. With humor and humility, they illuminate the challenges of launching a brand-new model with extremely high stakes: better health and greater prosperity for people allover the world. The Worth of Water invites us to become a part of this effort—to match hope with resources, to empower families and communities, and to end the global water crisis for good. All the authors’ proceeds from the sale of this book will be donated to Water.org.	Ende der 1940er-Jahre beschäftigten sich berühmte Künstler der New York School - Robert Rauschenberg, Ad Reinhardt, Mark Rothko, Frank Stella und Barnett Newman - intensiv mit der Farbe Schwarz. Es entstand eine erstaunliche Anzahl von nahezu monochromen schwarzen Bildserien, die heute zu den Glanzstücken international bedeutender Sammlungen wie dem Whitney Museum in New York zählen und in Black Paintings erstmals vereint gezeigt werden. Die Publikation mit einem fundierten Essay von Stephanie Rosenthal beleuchtet Unterschiede und Gemeinsamkeiten der im New York der Nachkriegszeit entstandenen Werke und verfolgt die Frage, welche Bedeutung sie im gesamten Schaffen der Künstler einnehmen. Einen der Ausgangspunkte des Buches bildet dabei die These, dass die schwarzen Gemälde für Durchbrüche und Übergänge im OEuvre der Maler stehen. (Englische Ausgabe ISBN 978-3-7757-1860-8) Ausstellung: Haus der Kunst, München 15.9.2006-14.1.2007

Punk's original angry young man and leader of the Sex Pistols finally tells his side of the story in this blunt and poignant autobiography. As the most notorious face of the era--Johnny Rotten--Lydon now tells the real story with contributions from Chrissie Hynde, Billy Idol, and others who were there in the late 70s era that changed youth forever.		Concrete is the most used man-made material in the world and is the fundamental physical medium for most of the world’s architecture and construction. The character of concrete is largely the product of the rigid moulds that have shaped it since its invention in antiquity. The advent of flexible moulds, however, marks a radical break from conventional practice – and conventional concrete architecture. The Fabric Formwork Book provides the first comprehensive handbook on the emerging technology of flexible moulds for reinforced concrete architecture. Written by the foremost expert in the field, this book takes a comprehensive and generous approach that includes technical, historical and theoretical aspects of the subject. The book: concentrates on simple flat-sheet formworks contains detailed technical descriptions of how to construct a wide range of formworks for various applications features case studies from around the world critiques the difficulties and advantages in each case it covers provides instruction and guidance on how to model and design fabric-formed structures includes the most comprehensive history of fabric formwork yet published features essays from guest expert authors, which explore the theoretical, historical, and poetic significance of flexibly formed architecture and structures discusses fabric formwork as an exemplary approach to sustainable construction through its simplicity and efficiency. Beautifully designed and illustrated with a superb range of images, diagrams and technical drawings, the book both informs and inspires. Speaking directly and plainly to professionals, students and academics, the language used is both clear and precise, and care is taken to avoid opaque technical or academic jargon. Technical terms, when used, are clearly described and a special glossary is included to make the book as widely accessible as possible.

A crucial question in years to come will be how states can circumvent the obstacles to improving the current climate change, problem-solving regime. These obstacles may be related to the basically anarchic logic of the international political system, the self-serving and often short-sighted motivation of national decision-makers, and - in all probability - the high costs involved in mitigating the problem of climate change.		Filmmakers have often encouraged us to regard people with physical disabilities in terms of pity, awe, humor, or fearas "Others" who somehow deserve to be isolated from the rest of society. In this first history of the portrayal of physical disability in the movies, Martin Norden examines hundreds of Hollywood movies (and notable international ones), finds their place within mainstream society, and uncovers the movie industry's practices for maintaining the status quokeeping people with disabilities dependent and "in their place." Norden offers a dazzling array of physically disabled characters who embody or break out of the stereotypes that have both influenced and been symptomatic of societys fluctuating relationship with its physically disabled minority. He shows us "sweet innocents" like Tiny Tim, "obsessive avengers" like Quasimodo, variations on the disabled veteran, and many others. He observes the arrival of a new set of stereotypes tied to the growth of science and technology in the 1970s and 1980s, and underscores movies like My Left Foot and The Waterdance that display a newfound sensitivity. Nordens in-depth knowledge of disability history makes for a particularly intelligent and sensitive approach to this long-overlooked issue in media studies.

Between 1893 and 1908, composer Arnold Schoenberg created many genuine masterworks in the genres of Lieder, chamber music and symphonic music. Here is the first full-scale account of Schoenberg's rich repertory of early tonal works. 139 music examples. 2 illustrations.		America's greatest crime writer investigates his mother's murder. On 21 June 1958, Geneva Hilliker Ellroy left her home in California. She was found strangled the next day. Her ten year-old son James had been with her estranged husband all weekend and was informed of her death on his return. Her murderer was never found, but her death had an enduring effect on her son - he spent his teens and early adult years as a wino, petty burglar and derelict. Only later, through his obsession with crime fiction, triggered by his mother's murder, did Ellroy begin to delve into his past. Shortly after

The author of The Presentation of Self in Everyday Life analyzes a person's feelings about himself and his relationship to people society calls “normal.” Stigma is an illuminating excursion into the situation of persons who are unable to conform to standards that society calls normal. Disqualified from full social acceptance, they are stigmatized individuals. Physically deformed people, ex-mental patients, drug addicts, prostitutes, or those ostracized for other reasons must constantly strive to adjust to their precarious social identities. Their image of themselves must daily confront, and be affronted by, the image others reflect back to them. Drawing extensively on autobiographies and case studies, sociologist Erving Goffman analyzes the stigmatized person’s feelings about himself and his relationship to “normals” He explores the variety of strategies stigmatized individuals employ to deal with the rejection of others, and the complex sorts of information about themselves they project. In Stigma, the interplay of alternatives the stigmatized individual must face every day is brilliantly examined by one of America’s leading social analysts. “This short book established the conceptual understanding of stigma that continues to buttress contemporary sociological thinking.” —Sociological Review

Introduces the history, different types of races, safety concerns, and other aspects of all terrain vehicle racing.		

the publication of his groundbreaking novel *WHITE JAZZ*, he determined to return to Los Angeles and, with the help of veteran detective Bill Stoner, attempt to solve the 38-year-old killing. The result is one of the few classics of crime non-fiction and autobiography to appear in the last few decades; a hypnotic trip to America's underbelly and one man's tortured soul.

Dansk-engelsk ordbog Routledge

A systematic introduction to discourse analysis as a body of theories and methods for social research. Introduces three approaches and explains the distinctive philosophical premises and theoretical perspectives of each approach.

My Dark Places Capstone

'Mudsprogets proces' beskæftiger sig med eksperimenterende dansk litteratur fra 1960'erne og frem til bogens udgivelse i 1982. Den består af en række interviews med fremtrædende danske forfattere samt analyser af centrale værker. Tilsammen danner de en kompliceret mosaik, der afspejler denne spændende periode, hvor noget af det eneste, forfatterne havde tilfælles, var, at de var helt forskellige fra hinanden. Litteraturhistoriker og oversætter Erik Skyum-Nielsen (f. 1952) har udgivet en lang række bøger om litteratur. Han er uddannet mag.art. i nordisk litteratur fra Københavns Universitet og har siden 2003 været ansat som lektor ved samme. Skyum-Nielsen er desuden litteraturkritiker ved Dagbladet Information.

An Introduction to Old Norse Rutgers University Press

Presents comprehensive guidance to the international field of sports history as it has developed as an academic area of study. This book guides readers through the development of the field across a range of thematic and geographical contexts. It is suitable for researchers and students in, and entering, the sports history field.

International Politics of Climate Change Springer Science & Business Media

1. INTRODUCTION This book describes a new interdisciplinary theory for explaining cultural change. In contrast to traditional evolutionist theories, the present theory stresses the fact that a culture can evolve in different directions depending on its life conditions. Cultural selection theory explains why certain cultures or cultural elements spread, possibly at the expense of other cultures or cultural elements which then disappear. Cultural elements include social structure, traditions, religion, rituals, art, norms, morals, ideologies, ideas, inventions, knowledge, technology, etc. This theory is inspired by Charles Darwin's idea of natural selection, because cultural elements are seen as analogous to genes in the sense that they may be reproduced from generation to generation and they may undergo change. A culture may evolve because certain cultural elements are more likely to spread and be reproduced than others, analogously to a species evolving because individuals possessing certain traits are more fit than others to reproduce and transmit these traits to their offspring.
