The solution lies in designing and adopting an investment process that is at least partially robust to behavioural decision-making errors. Behavioural Investing: A Practitioner's Guide to Applying Behavioural Finance explores the biases we face, the way in which they show up in the investment process, and urges readers to adopt an empirically based sceptical approach to investing. This book is unique in combining insights from the field of applied psychology with a through

understanding of the investment problem. The content is practitioner focused throughout and will be essential reading for any investment professional looking to improve their investing behaviour to maximise returns. Key features include: The only book to cover the applications of behavioural finance An executive summary for every chapter with key points highlighted at the chapter start Information on the key behavioural biases of professional investors, including The seven sins of fund management, Investment myth busting, and The Tao of investing Practical examples showing how using a psychologically inspired model can improve on standard, common practice valuation tools Written by an internationally renowned expert in the field of behavioural finance

Alternative Investments: A Primer for Investment Professionals provides an overview of alternative investments for institutional asset allocators and other overseers of portfolios containing both traditional and alternative assets. It is designed for those with substantial experience regarding traditional investments in stocks and bonds but limited familiarity regarding alternative assets, alternative strategies, and alternative portfolio management. The primer categorizes alternative assets into four groups: hedge funds, real assets, private equity, and structured products/derivatives. Real assets include vacant land, farmland, timber, infrastructure, intellectual property, commodities, and private real estate. For each group, the primer provides essential information about the characteristics, challenges, and purposes of these institutional-quality alternative assets in the context of a well-diversified institutional portfolio. Other topics addressed by this primer include tail risk, due diligence of the investment process and operations, measurement and management of risks and returns, setting return expectations, and portfolio construction. The primer concludes with

a chapter on the case for investing in alternatives.
