'I walk toward the sea. The endless surface of the water extends to the horizon, whichever way I look. Our world is small. We are on our own, and we only have ourselves to depend on. We rely on the Force deep within us, as taught to us by our

forefathers. If I were to walk westward from here, I would come across a barrier – the Wall. Behind it, there are Fools. At least, that's what everyone says. I have never seen one. Leia lives on the Island, a world in which children leave their parents to take care of themselves when they are ten years old. Across this Island runs a wall that no one has ever crossed. The Fools living behind it are not amenable to reason – they believe in illusions. That's what The Book says, the only thing left to the Eastern Islanders by their ancestors. But when a strange man washes ashore and Leia meets a Fool face to face, her life will never be the same. Is what she and her friends believe about the Island really true? Or is everyone in their world, in fact, a Fool?

An edgy, realistic debut novel praised by the New York Times bestselling author of *Between Shades of Gray*, Ruta Sepetys, as “a beautiful reminder that amid our broken pieces we can truly find ourselves.” Alexi Littrell hasn't told anyone what happened to her over the summer by her backyard pool. Instead, she hides in

her closet, counts the slats in the air vent, and compulsively scratches the back of her neck, trying to make the outside hurt more than the inside does—and deal with the trauma. When Bodee Lennox—“the Kool-Aid Kid”—moves in with the Littrells after a family tragedy, Alexi discovers an unlikely friend in this quiet, awkward boy who has secrets of his own. As their friendship grows, Alexi gives him the strength to deal with his past, and Bodee helps her summon the courage to find her voice and speak up about the rape that has changed the course of her life.

When asked what he does for a living . . .

Commander Mark Bishop is deliberately low-key: “I'm in the Navy.” But commanding the ballistic missile submarine USS Nevada, keeping her crew trained and alert during ninety-day submerged patrols, and being prepared to launch weapons on valid presidential orders, carries a burden of command like few other jobs in the military. Mark Bishop is a man who accepts that responsibility, and handles it well. And at a

time when tensions are escalating around the Pacific Rim, the Navy is glad to have him. Mark wants someone to come home to after sea patrols. The woman he has in mind is young, with a lovely smile, and very smart. She's a civilian, yet she understands the U.S. Navy culture. And he has a strong sense that life with her would never be boring. But she may be too deep in her work to see the potential in a relationship with him. Gina Gray would love to be married. She has always envisioned her life that way. A breakup she didn't see coming, though, has her focusing all her attention on what she does best—ocean science research. She's on the cusp of a major breakthrough, and she needs Mark Bishop's perspective and help. Because what she told the Navy she's figured out is only the beginning. If she's right, submarine warfare is about to enter a new and dangerous chapter.

Businesses and the HCI and Interaction Design communities have embraced design and design research. Design research as a field blends methodologies from several disciplines - sociology, engineering, software, philosophy, industrial design, HCI/interaction design -- so designers can learn from past successes and failure and don't have to reinvent the wheel for each new design (whether it's a digital product, a building, an airplane or furniture). They take into account form, function, and, ultimately, users. Many books exist in the research and academic realm for this field, but none create a usable bridge to design practice. Although business people

are embracing design, they are not going to become designers. Design researchers need tools to apply their research in the real world. Design Research through Practice takes advanced design practice as its starting point, but enriches it to build a design process than can respond to both academic and practical problems. The aims of the book are to study three design research traditions that cover methodological directions in current leading research community. Taking you from the Lab, Field and to the Showroom, Ilpo Koskinen and his group of researchers show you successful traditions in design research that have been integrated into processes and products. Bridging the gap from design research to design practice, this is a must have for any designer.

- Gathers design research experts from traditional lab science, social science, art, industrial design, UX and HCI to lend tested practices and how they can be used in a variety of design projects
- Provides a multidisciplinary story of the whole design process, with proven and teachable techniques that can solve both academic

and practical problems • Presents key examples illustrating how research is applied and vignettes summarizing the key how-to details of specific projects

What if there were a story that had the magic of E.T., the action of 'Pirates of the Caribbean', the tension of 'JAWS', the humor of 'The Hangover' plus romance, twists, a man coming of age and a jolting end? Do you believe in Mermaids? People may laugh if you say yes but, deep down, you either do, or want, to believe. You may have even seen one in your past. You weren't sure what it was but you know it had a tail and a woman's face. Mermaids sightings have been

reported for centuries and why not? Many famous people, including Christopher Columbus and Henry Hudson, have reported mermaid sightings. Further, if you consider three quarters of the Earth is covered by water and ninety five percent of our oceans remain unexplored, it's not that difficult to believe there could be mermaids hiding in the deep. So, open your mind and let your imagination 'imagine'. People have reported seeing spaceships, aliens, Big Foot, aka 'Sasquatch', Nessie, the Loch Ness monster, ghosts, demons and ghouls. Add mermaids to that list and you're going to love this book. It's been planned for two years by four old high school buddies, now in their late thirties. A two-week trip on a forty-foot boat for relaxing, exploring, fishing and general adventure. But when they enter a fog bank and one of them is washed overboard, their journey abruptly changes. So come explore with the guys as they discover a new world of sunken pirate ships, treasure chests of pirate booty, fighting pirate spirits for their lives, underwater sea battles and an

eventual trip home, for some of them. But what waits for them back home will leave them fighting for their lives against an

ancient person so powerful it seems they cannot win. But when this person takes the baby of a mermaid, they join forces to fight this deadly

foe. Their battle sends them back to the island where they must either rescue their child, or, kill him.
