This is a pioneering work on "karayuki-san", impoverished Japanese women sent abroad to work as prostitutes from the 1860s to the 1920s. The narrative follows the life of one such prostitute, Osaki, who is persuaded as a child of ten to accept cleaning work in Sandakan, North Borneo, and then forced to work as a prostitute in a Japanese brothel, one of the many such brothels that were established throughout Asia in conjunction with the expansion of Japanese business interests. Yamazaki views Osaki as the embodiment of the suffering experienced by all Japanese women, who have long been oppressed under the dual yoke of class and gender. This tale provides the historical and anthropological context for understanding the sexual exploitation of Asian women before and during the Pacific War and for the growing flesh trade in Southeast Asia and Japan today. Young women are being brought to Japan with the same false promises that enticed Osaki to Borneo 80 years ago. Yamazaki Tomoko, who herself endured many economic and social hardships during and after the war, has devoted her life to documenting the history of the exchange of women between Japan and other Asian countries since 1868. She has worked directly with "karayuki-san", military comfort women, war orphans, repatriates, women sent as picture brides to China and Manchuria, Asian women who have wed into Japanese farming communities, and Japanese women married to other Asians in Japan.

#### **Thinking Skills & Eye Q** Wiley-Blackwell

As part of ESCAP's efforts to enhance industrial development, it implemented a project on the "promotion of intraregional trade .. in the automotive sector" in collaboration with the Korea Automobile Manufacturer's Association and funded by the Korean government. A regional consultative meeting was held in Seoul, 10-12 December 2001. This publication is a compilation of documents presented at the meeting, including a comprehensive study and survey result on the regional automotive industry.

#### **Malaysia's Industrial Technology Policies** HarperCollins

This hardcover, full-color treasury includes six picture book stories adapted from the classic Little House books. The Little House series introduced generations of readers to Laura Ingalls Wilder's life on the frontier. Now with this illustrated storybook collection, the youngest readers can share in her world as well. Laura Ingalls lives in a snug little log cabin with her ma, her pa, her sisters, Mary and Carrie, and their dog, Jack. Almanzo Wilder lives on a farm with his family and lots of animals. These pioneer children have all sorts of adventures, including trips to town, county fairs, cozy winter days, and holidays with family. The six stories included in this treasury were originally published as stand-alone picture books: A Little Prairie House, Going to Town, County Fair, Sugar Snow, Winter Days in the Big Woods, and Christmas in the Big Woods.

#### **Succeeding with Inquiry in Science and Math Classrooms** Routledge

The Center for US-Japan Comparative Social Studies ([www.usjp.org](http://www.usjp.org)) is an Internet-based nonprofit organization. Since its inception in 2000, the Center has provided information about education, culture and society in the United States and Japan. The author of this book, Miki Y. Ishikida, is Director and a principal researcher at the Center. Japanese Education in the 21st Century is an introduction to contemporary Japanese education and provides the latest information and resources for educators and anyone with an interest in the Japanese school system. Author Miki Y. Ishikida describes the rapid changes in today's Japanese schools and communities that came about from the implementation of the 1987 recommendation of the National Council on Educational Reform that relaxed rigid school regulations. Compensatory education and ethnic education for minority and disadvantaged children—Buraku children, Ainu children, Korean children, Nikkei children and disabled children—that are designed to improve their academic achievements and to give them a sense of pride in their heritage. Human rights education aimed to instill respect, acceptance, and tolerance for all people by teaching the history and culture of minority population. Ishikida discusses the current state of the Japanese educational system, and the issues of minority education, special education, and lifelong education based upon her examination of administrative documents, school journals, and secondary literature. She also presents the results of case studies from her classroom observations and interviews with teachers and administrators from a cross-section of Japanese schools.

#### **Concepts, Emerging Evidence, Practice** Routledge

Education, like electricity, needs a conduit, a teacher, through which to transmit its power-- i.e., the discovery and continuity of information, knowledge, wisdom, experience, and culture. Through the stories and experiences of eight successful teacher-transmitters, The Dreamkeepers keeps hope alive for educating young African Americans. --Reverend Jesse L. Jackson, president and founder, National Rainbow Coalition In this beautifully written book Ladson-Billings illustrates the inspiring influence of a select group of teachers who keep the dreams alive for African American students. ?Henry M. Levin, David Jacks professor of Higher Education, Stanford University Ladson-Billings' portraits, interwoven with personal reflections, challenge readers to envision intellectually rigorous and culturally relevant classrooms that have the power to improve the lives of not just African American students but all children.

#### **Introducing Game Theory and its Applications** Routledge

The mathematical study of games is an intriguing endeavor with implications and applications that reach far beyond tic-tac-toe, chess, and poker to economics, business, and even biology and politics. Most texts on the subject, however, are written at the graduate level for those with strong mathematics, economics, or business backgrounds. In

This guide has been developed jointly by the American Academy of Pediatrics and the American College of Obstetricians and Gynecologists, and is designed for use by all personnel involved in the care of pregnant women, their fetuses, and their neonates.

#### **Guidelines for Perinatal Care** Routledge

Although construction is one of the most labour-intensive industries, people management issues are given inadequate attention. Furthermore, the focus of attention with regards to HR has been on the strategic aspects of HRM function - yet most problems and operational issues arise on projects. To help redress these problems, this book takes a broad view of HRM, examining the strategic and operational aspects of managing people within the construction sector. The book is aimed at project

managers and students of project management who, until now, have been handed the responsibility for human resource management without adequate knowledge or training. The issues addressed in this book are internationally relevant, and are of fundamental concern to both students and practitioners involved in the management of construction projects. The text draws on the authors' experience of working with a range of large construction companies in improving their HRM operational activities at both strategic and operational levels, and is well illustrated with case studies of projects and organizations.

#### **Six Stories of Life on the Prairie** Elsevier Health Sciences

Geodesy is the science of accurately measuring and understanding three fundamental properties of Earth: its geometric shape, its orientation in space, and its gravity field, as well as the changes of these properties with time. Over the past half century, the United States, in cooperation with international partners, has led the development of geodetic techniques and instrumentation. Geodetic observing systems provide a significant benefit to society in a wide array of military, research, civil, and commercial areas, including sea level change monitoring, autonomous navigation, tighter low flying routes for strategic aircraft, precision agriculture, civil surveying, earthquake monitoring, forest structural mapping and biomass estimation, and improved floodplain mapping. Recognizing the growing reliance of a wide range of scientific and societal endeavors on infrastructure for precise geodesy, and recognizing geodetic infrastructure as a shared national resource, this book provides an independent assessment of the benefits provided by geodetic observations and networks, as well as a plan for the future development and support of the infrastructure needed to meet the demand for increasingly greater precision. Precise Geodetic Infrastructure makes a series of focused recommendations for upgrading and improving specific elements of the infrastructure, for enhancing the role of the United States in international geodetic services, for evaluating the requirements for a geodetic workforce for the coming decades, and for providing national coordination and advocacy for the various agencies and organizations that contribute to the geodetic infrastructure.

#### **The Dreamkeepers** Dial Press

This book shows K 12 STEM teachers how to maximize their effectiveness with students by shifting to an inquiry-based instructional approach and creating a rigorous, engaging learning environment.

#### **Indonesia Post-Soeharto** BRILL

Oxidizing and Reducing Agents S. D. Burke University of Wisconsin at Madison, USA R. L. Danheiser Massachusetts Institute of Technology, Cambridge, USA Recognising the critical need for bringing a handy reference work that deals with the most popular reagents in synthesis to the laboratory of practising organic chemists, the Editors of the acclaimed Encyclopedia of Reagents for Organic Synthesis (EROS) have selected the most important and useful reagents employed in contemporary organic synthesis. Handbook of Reagents for Organic Synthesis: Oxidizing and Reducing Agents, provides the synthetic chemist with a convenient compendium of information concentrating on the most important and frequently employed reagents for the oxidation and reduction of organic compounds, extracted and updated from EROS. The inclusion of a bibliography of reviews and monographs, a compilation of Organic Syntheses procedures with tested experimental details and references to oxidizing and reducing agents will ensure that this handbook is both comprehensive and convenient.

Malay Magic Being an Introduction to the Folklore and Popular Religion of the Malay

Peninsula Japanese Education in the 21st Century iUniverse

World Economic Outlook, April 2019 Routledge

NEW YORK TIMES BESTSELLER • The founder of the first female-focused recovery program offers a groundbreaking look at alcohol and a radical new path to sobriety. "You don't know how much you need this book, or maybe you do. Either way, it will save your life."—Melissa Hartwig Urban, Whole30 co-founder and CEO We live in a world obsessed with drinking. We drink at baby showers and work events, brunch and book club, graduations and funerals. Yet no one ever questions alcohol's ubiquity—in fact, the only thing ever questioned is why someone doesn't drink. It is a qualifier for belonging and if you don't imbibe, you are considered an anomaly. As a society, we are obsessed with health and wellness, yet we uphold alcohol as some kind of magic elixir, though it is anything but. When Holly Whitaker decided to seek help after one too many benders, she embarked on a journey that led not only to her own sobriety, but revealed the insidious role alcohol plays in our society and in the lives of women in particular. What's more, she could not ignore the ways that alcohol companies were targeting women, just as the tobacco industry had successfully done generations before. Fueled by her own emerging feminism, she also realized that the predominant systems of recovery are archaic, patriarchal, and ineffective for the unique needs of women and other historically oppressed people—who don't need to lose their egos and surrender to a male concept of God, as the tenets of Alcoholics Anonymous state, but who need to cultivate a deeper understanding of their own identities and take control of their lives. When Holly found an alternate way out of her own addiction, she felt a calling to create a sober community with resources for anyone questioning their relationship with drinking, so that they might find their way as well. Her resultant feminine-centric recovery program focuses on getting at the root causes that lead people to overindulge and provides the tools necessary to break the cycle of addiction, showing us what is possible when we remove alcohol and destroy our belief system around it. Written in a relatable voice that is honest and witty, *Quit Like a Woman* is at once a groundbreaking look at drinking culture and a road map to cutting out alcohol in order to live our best lives without the crutch of intoxication. You will never look at drinking the same way again.

#### **Being an Introduction to the Folklore and Popular Religion of the Malay Peninsula** Routledge

This volume, and its companion, *Industrial Technology Development in Malaysia*, examine and evaluate Malaysian industrialization in terms of its experience of and prospects for industrial technology development. The focus is on role played by state-sponsored innovation in the process economic development and in the context of national development strategies. Technology, Competitiveness and the State, provides a valuable analysis of the technological development of a Newly Industrializing Country and reflects on whether existing development strategies can be maintained in the wake of the financial crises sweeping the East Asian economies.

#### **Handbook for Journalism Education and Training** Random House

As web-enabled mobile technologies become increasingly integrated into formal learning environments, the fields of education and ICT (information and communication technology) are

merging to create a new kind of classroom: CrossActionSpaces. Grounding its exploration of these co-located communication spaces in global empirical research, Digital Didactical Designs facilitates the development of teachers into collaborative designers and evaluators of technology-driven teaching and learning experiences—learning through reflective making. The Digital Didactical Design model promotes deep learning expeditions with a framework that encourages teachers and researchers to study, explore, and analyze the applied designs-in-practice. The book presents critical views of contemporary education, theories of socio-technical systems and behavior patterns, and concludes with a look into the conceptual and practical prototypes that might emerge in schools and universities in the near future.

Movement in Cities describes and analyses urban travel in terms of purpose, distance and frequency of journeys and modes and routes used, concentrating mainly on British towns with many references to the United States and Australia. The authors elucidate the all-important interrelations between location of activities and the patterns of transport supply and use within towns. The issues they raise are of pressing practical and intellectual importance. This book was first published in 1980.

Color your way to a complete mastery of veterinary anatomy with *Veterinary Anatomy Coloring Book*, 2nd Edition. Approximately 400 easy-to-color illustrations and corresponding anatomical descriptions guide you through the head, neck, back, thorax, abdomen, extremities, reproductive organs, and many more body parts of dogs, cats, horses, pigs, cows, goats, and birds. Plus, a new section on exotics takes you through the anatomy of ferrets, rodents, rabbits, snakes, and lizards to ensure you are well versed in all potential household pets. With this vivid change-of-pace study tool, you have the freedom to master veterinary anatomy in a fun and memorable way. Over 400 easy-to-color illustrations created by expert medical illustrators shows anatomy in detail and makes it easy to identify specific structures for an entertaining way to learn veterinary anatomy. Regional section organization (the head and ventral neck; neck, back, and vertebral column; thorax; abdomen; pelvis and reproductive organs; forelimb; and hindlimb) allows students to easily compare the anatomy of multiple species. Numbered lead lines clearly identify structures to be colored and correspond to a numbered list beneath the illustration. NEW! Section on exotics covers the anatomy of ferrets, rodents, rabbits, snakes and lizards in addition to the anatomy of dogs, cats, horses, pigs, cows, goats, and birds.

At last! A book that reveals what thinking looks like. Think you can't see someone's thinking? Think again! This book reveals what happens when the normally private, hidden and undefined act of thinking is transformed into one that is public, available and explicit. Thinking Skills and Eye Q is the world's first lexicon of visual tools - once tooled up, you can transform teaching and learning in your classroom. Thinking Skills and Eye Cue is a breakthrough in thinking. Ironically, there has been lots of fuzzy thinking about thinking skills. Caviglioli, Harris and Tindall, though, are very clear about what thinking is. In this book, they link thinking skills with visual tools and the genres that pupils encounter in every lesson. The book provides a theory of learning that oozes practicality, common sense and relevance at all Key Stages. Thinking Skills and Eye Q is a smart tool kit, for transforming teaching and learning. This book shows how to use 40 different visual tools to: infuse the teaching of the five National Curriculum Thinking Skills into subject teaching develop writing skills in all six genres show pupils how to be independent and creative thinkers and learners make speaking and

listening, questioning and responding an integral part of all lessons raise IQ  
[Reflections on Estrangement and Exile in the Twenty-First Century](#) Elsevier Health Sciences  
NEW YORK TIMES BESTSELLER • An epic Don Quixote for the modern age, “a brilliant, funny, world-encompassing wonder” (Time) from internationally bestselling author Salman Rushdie SHORTLISTED FOR THE MAN BOOKER PRIZE • “Lovely, unsentimental, heart-affirming . . . a remembrance of what holds our human lives in some equilibrium—a way of feeling and a way of telling. Love and language.”—Jeanette Winterson, The New York Times Book Review NAMED ONE OF THE BEST BOOKS OF THE YEAR BY TIME AND NPR Inspired by the Cervantes classic, Sam DuChamp, mediocre writer of spy thrillers, creates Quichotte, a courtly, addled salesman obsessed with television who falls in impossible love with a TV star. Together with his (imaginary) son Sancho, Quichotte sets off on a picaresque quest across America to prove worthy of her hand, gallantly braving the tragicomic perils of an age where “Anything-Can-Happen.” Meanwhile, his creator, in a midlife crisis, has equally urgent challenges of his own. Just as Cervantes wrote Don Quixote to satirize the culture of his time, Rushdie takes the reader on a wild ride through a country on the verge of moral and spiritual collapse. And with the kind of storytelling magic that is the hallmark of Rushdie’s work, the fully realized lives of DuChamp and Quichotte intertwine in a profoundly human quest for love and a wickedly entertaining portrait of an age in which fact is so often indiscernible from fiction. Praise for Quichotte “Brilliant . . . a perfect fit for a moment of transcontinental derangement.”—Financial Times “Quichotte is one of the cleverest, most enjoyable metafictional capers this side of postmodernism. . . . The narration is fleet of foot, always one step ahead of the reader—somewhere between a pinball machine and a three-dimensional game of snakes and ladders. . . . This novel can fly, it can float, it’s anecdotal, effervescent, charming, and a jolly good story to boot.”—The Sunday Times “Quichotte [is] an updating of Cervantes’s story that proves to be an equally complicated literary encounter, jumbling together a chivalric quest, a satire on Trump’s America and a whole lot of postmodern playfulness in a novel that is as sharp as a flick-knife and as clever as a barrel of monkeys. . . . This is a novel that feeds the heart while it fills the mind.”—The Times (UK)

**A Little House Picture Book Treasury** iUniverse

It isn't that they can't see the solution. It is Approach your problems from the right end and begin with the answers. Then one day, that they can't see the problem. perhaps you will find the final question. O. K. Chesterton. The Scandal of Father 'The Hermit Clad in Crane Feathers' in R. Brown 'The point of a Pin'. van Oulik's The Chinese Maze Murders. Growing specialization and diversification have brought a host of monographs and textbooks on increasingly specialized topics. However, the "tree" of knowledge of mathematics and related fields does not grow only by putting forth new branches. It also happens, quite often in fact, that branches which were thought to be completely disparate are suddenly seen to be related. Further, the kind and level of sophistication of mathematics applied in various sciences has changed drastically in recent years: measure theory is used (non trivially) in regional and theoretical economics; algebraic geometry interacts with physics; the Minkowsky lemma, coding theory and the structure of water meet one another in packing and covering theory; quantum fields, crystal defects and mathematical programming profit from homotopy theory; Lie algebras are relevant to filtering; and prediction and electrical engineering can use Stein spaces. And in addition to this there are such new emerging subdisciplines as "experimental mathematics", "CFD", "completely integrable systems", "chaos, synergetics and large-scale order", which are almost impossible to fit into the existing classification schemes. They draw upon widely different sections of mathematics.
