Note: A newer edition of this title is available. The framework for teaching is a research-based set of components of instruction that are grounded in a constructivist view of learning and teaching. The framework may be used for many purposes, but its full value is realized as the foundation for professional conversations among practitioners as they seek to enhance their skill in the complex task of teaching. The framework may be used as the foundation of a school's or district's recruitment and hiring, mentoring, coaching, professional development, and teacher evaluation processes, thus linking all those activities together and helping teachers become more thoughtful practitioners. The actions teachers can take to improve student learning are clearly identified and fall under four domains of teaching responsibility: Planning and Preparation, the School Environment, Instruction, and Professional Responsibilities. Within the domains are 22 components and 76 descriptive elements that further refine our understanding of what teaching is all about. The framework defines four levels of performance (Unsatisfactory, Basic, Proficient, and Distinguished) for each element, providing a valuable tool that all teachers can use. This second edition has been revised and updated and also includes frameworks for school specialists, such as school nurses, counselors, library and media specialists, and instructional coaches. Comprehensive, clear, and applicable to teaching across the K-12 spectrum, the framework for teaching described in this book is based on the PRAXIS III: Classroom Performance Assessment criteria developed by Educational Testing Service and is compatible with INTASC standards.

It is this paradox which Visible Learning: Feedback aims to unravel and resolve. Combining research excellence, theory and vast teaching expertise, this book covers the principles and practicalities of feedback, including: the variability of feedback, the importance of

surface, deep and transfer contexts, student to teacher feedback, peer to peer feedback, the power of within lesson feedback and manageable post-lesson feedback. With numerous case-studies, examples and engaging anecdotes woven throughout, the authors also shed light on what creates an effective feedback culture and provide the teaching and learning structures which give the best possible framework for feedback. Visible Learning: Feedback brings together two internationally known educators and merges Hattie's world-famous research expertise with Clarke's vast experience of classroom practice and application, making this book an essential resource for teachers in any setting, phase or country.

It highlights inclusive teaching strategies with instructional, inspirational and interactional components to accommodate diverse learners and promote their classroom interaction. In addition to contributing to innovation in higher education in Hong Kong, the lessons learned here can be universally applied to ESL/EFL teaching and education reform around the world. Further, they support better learning and

teaching at universities in the context of internationalization. The book will above all benefit undergraduate students in ESL/EFL teacher training programs, and post-graduate research students in applied linguistics, language education and second language teacher education. It also offers a valuable reference book for university lectures in teacher education, researchers in higher education in China, and TESOL/TEFL instructors in English-speaking countries (the UK, USA, Canada, Australia, New Zealand etc.).
