"Law can be viewed as a body of rules and legal sanctions that channel behavior in socially desirable directions - for example, by encouraging individuals to take proper precautions to prevent accidents or by discouraging competitors from colluding to raise prices. The incentives created by the legal system are thus a natural subject of study by economists. Moreover, given the importance of law to the welfare of societies, the economic analysis of law merits prominent treatment as a subdiscipline of economics. This two volume Handbook is intended to foster

the study of the legal system by economists. The two volumes form a comprehensive and accessible survey of the current state of the field. Chapters prepared by leading specialists of the area. Summarizes received results as well as new developments."--[Source inconnue].

Contratações de Bens e Serviços de Informática e Automação > Softwares > Serviços > Equipamentos Comentários ao Decreto no 7.174, de 12 de maio de 2010 (que regulamenta a contratação de bens e serviços de informática e automação pela Administração Pública Federal, direta ou indireta), e à Instrução Normativa no 4, de 11 de setembro de 2014 (que dispõe sobre o processo de

contratação de Soluções de Tecnologia da Informação pelos órgãos integrantes do Sistema de Administração de Recursos de Tecnologia da Informação e Informática [SISP] do Poder Executivo Federal). Na incessante busca da eficiência administrativa, a Administração Pública, como não poderia deixar de ser, vem paulatinamente informatizando as suas atividades, tornando-se cada vez mais dependente da Tecnologia da Informação (TI). Nesse contexto, maximizaram-se as contratações nessa área. Como é cediço, esse tipo de contratação requer conhecimentos especializados, exigindo atualização constante dos agentes públicos de modo que escolham a melhor opção. O governo federal, sensível à questão,

elaborou e editou o Decreto no 7.174/2010, regulamentando a contratação de bens e serviços de informática e automação, e, recentemente, a Instrução Normativa SLTI nº 4, de 11 de setembro de 2014, dispondo detalhadamente sobre o processo de contratação de Soluções de TI. Neste livro, o prof. Sidney Bittencourt, com a proficiência e o detalhamento de sempre, considerando a melhor doutrina, a jurisprudência e as decisões do TCU, comenta todos os dispositivos dessas duas normas, oferecendo ao leitor um trabalho de alto significado, uma verdadeira ferramenta de auxílio para a elaboração de licitações e contratos que visem Soluções de TI, tanto para a contratação de serviços como para a aquisição de equipamentos

ou softwares.

Distorting the Law Editora Dialética

In recent years, stories of reckless lawyers and greedy citizens have given the legal system, and victims in general, a bad name. Many Americans have come to believe that we live in the land of the litigious, where frivolous lawsuits and absurdly high settlements reign.

Scholars have argued for years that this common view of the depraved ruin of our civil legal system is a myth, but their research and statistics rarely make the news. William Haltom and Michael McCann here persuasively show how popularized distorted understandings of tort litigation (or tort tales) have been perpetuated by the mass media and reform proponents. *Distorting the Law* lays bare how media coverage has

sensationalized lawsuits and sympathetically portrayed corporate interests, supporting big business and reinforcing negative stereotypes of law practices. Based on extensive interviews, nearly two decades of newspaper coverage, and in-depth studies of the McDonald's coffee case and tobacco litigation, *Distorting the Law* offers a compelling analysis of the presumed litigation crisis, the campaign for tort law reform, and the crucial role the media play in this process.

Our Common Future Cambridge University Press

The challenges to humanity posed by the digital future, the first detailed examination of the unprecedented form of power called "surveillance capitalism," and the quest by powerful corporations to predict and control our behavior. In this masterwork of original thinking and research, Shoshana Zuboff provides startling insights into the phenomenon that she has named surveillance capitalism. The stakes could not be

higher: a global architecture of behavior modification threatens human nature in the twenty-first century just as industrial capitalism disfigured the natural world in the twentieth. Zuboff vividly brings to life the consequences as surveillance capitalism advances from Silicon Valley into every economic sector. Vast wealth and power are accumulated in ominous new "behavioral futures markets," where predictions about our behavior are bought and sold, and the production of goods and services is subordinated to a new "means of behavioral modification." The threat has shifted from a totalitarian Big Brother state to a ubiquitous digital architecture: a "Big Other" operating in the interests of surveillance capital. Here is the crucible of an unprecedented form of power marked by extreme

concentrations of knowledge and free from democratic oversight. Zuboff's comprehensive and moving analysis lays bare the threats to twenty-first century society: a controlled "hive" of total connection that seduces with promises of total certainty for maximum profit -- at the expense of democracy, freedom, and our human future. With little resistance from law or society, surveillance capitalism is on the verge of dominating the social order and shaping the digital future -- if we let it.

Much of the devastation caused by the recent earthquake in Turkey was the result of widespread corruption between the construction industry and government officials. Corruption is part of everyday public life and we tend to take it for granted. However, preventing

corruption helps to raise city revenues, improve service delivery, stimulate public confidence and participation, and win elections. This book is designed to help citizens and public officials diagnose, investigate and prevent various kinds of corrupt and illicit behaviour. It focuses on systematic corruption rather than the free-lance activity of a few law-breakers, and emphasises practical preventive measures rather than purely punitive or moralistic campaigns.

The Quality of Democracy in Latin America Wiley-Blackwell

Fiscal rule frameworks have evolved significantly in response to the global

financial crisis. Many countries have reformed their fiscal rules or introduced new ones with a view to enhancing the credibility of fiscal policy and providing a medium-term anchor. Enforcement and monitoring mechanisms have also been upgraded. However, these innovations have made the systems of rules more complicated to operate, while compliance has not improved. The SDN takes stock of past experiences, reviews recent reforms, and presents new research on the effectiveness of rules. It also proposes guiding principles for future reforms to strike a better balance between simplicity, flexibility, and enforceability. Read the blog

Entre 2006 e 2019 introduziram-se no

Sistema Correccional do Poder Executivo Federal alguns instrumentos voltados à desburocratização e aceleração processual. Este estudo tratou dos reflexos desses instrumentos na celeridade processual da Corregedoria da Receita Federal do Brasil (Coger-RFB), com o objetivo de descobrir o quanto eles foram efetivos. O estudo justificou-se porque a celeridade processual é uma preocupação da administração pública e da sociedade, pois a melhor justiça é aquela que não tarda. A pesquisa foi aplicada, descritiva, explicativa, quantitativa, qualitativa e empírica, com técnica de documentação indireta. Colheram-se os dados no "Painel Correição em Dados" da CGU, nos "Relatórios de Desempenho" da Coger-RFB, na normatização de regência, na

jurisprudência, na doutrina, em consultas a órgãos públicos e em análises processuais. Iniciou-se comparando a celeridade processual da Coger-RFB com outras unidades correcionais e em seguida elaborou-se um método para aferir a influência da condução processual com maior segurança jurídica na agilidade dos processos. Estudaram-se as ferramentas desburocratizantes e seus reflexos no galope processual, medindo o tempo de tramitação dos processos antes e depois das medidas, concluindo-se que trouxeram outros benefícios, mas não agilidade.
