Ayurveda, the ancient art of healing, has been practiced in India for more than two thousand years and survives today as a living medical tradition whose principles are at the heart of many "alternative" therapies now used in the West. This "science of longevity" has parallels with Buddhist thought, and advocates a life of moderation through which the three humors of the body will be brought into balance. The writings selected for this volume are taken from Sanskrit medical texts written by the first Ayurvedic physicians, who lived between the fifth century b.c. and the fourteenth century a.d. Here readers will find wide-ranging and fascinating advice on the benefits of garlic therapy, prayers for protection against malevolent disease deities, surgical techniques, exercise regimens, the treatment of poisons, the interpretation of dreams, and more.

Martindale Routledge

This book offers a clinical guide that brings together a broad range of brief interventions and their applications in treating psychosis. It describes two core approaches that can narrow the current, substantial gap between the need for psychotherapeutic interventions for all individuals suffering from psychosis, and the limited mental health resources available. The first approach

involves utilizing the standard therapeutic modalities in the context of routine clinical interactions after adapting them into brief and effective formats. To that end, the book brings in experts on various psychotherapeutic modalities, who discuss how their particular modality could be adapted to more effectively fit into the existing system of care delivery. The second approach, addressed in detail, is to extend the availability of these brief interventions by utilizing the circle of providers as well as the social circle of the clients so that these interventions can be provided in a coordinated and complementary manner by psychiatrists, psychologists, clinical social workers, case managers, peer support specialists and other providers on the one hand, and by family members, friends, social and religious institutions on the other.
