Princeton University Press The P-NP problem is the most important open problem in computer science, if not all of mathematics. Simply stated, it asks whether every problem whose solution can be quickly checked by computer can also be quickly solved by computer. The Golden Ticket provides a nontechnical introduction to P-NP, its rich history, and its algorithmic

implications for everything we do with computers and beyond. Lance Fortnow traces the history and development of P-NP, giving examples from a variety of disciplines, including economics, physics, and biology. He explores problems that capture the full difficulty of the P-NP dilemma, from discovering the shortest route through all the rides at Disney World to finding large groups of friends on Facebook. The

Golden Ticket explores what we truly can and cannot achieve computationally, describing the benefits and unexpected challenges of this compelling problem.

You're stuck in the airport security line, late for a flight. The line isn't moving. You're angry at the security personnel for taking so long, you're irritated at the other passengers for having so much stuff, you're mad at your boss for sending you on this trip in the first place. By the time you get to your gate you're angry, deflated, and exhausted. Then someone cuts in front of you in the line to board and you snap. "There's a line, you know!" Is that really you, standing in an airport, yelling at a stranger, emotions raging? It happens to most of us more than we'd like to admit. In an instant, our lives seem out of control and overwhelming. It's always something, isn't it? But what if you could approach every part of your life—from the smallest decisions to life's biggest setbacks—with total confidence, clarity, and control? According to Sakyong Mipham, we all have that power. The secret is simple: If you just stop thinking about yourself all the time, happiness and confidence will come naturally. It sounds absurd and, what's more, impossible. But in *Ruling Your World*, Sakyong Mipham shares ancient secrets on how to take control of our

lives and be successful while cultivating compassion for others and confidence in our own intelligence and goodness. The key to this well-being lies in the ancient strategies of the warrior kings and queens of Shambhala. The kingdom of Shambhala was an enlightened kingdom of benevolent kings and queens and fiercely trained warriors. No one knows for sure whether this kingdom

was real or mythical, but there are ancient guidebooks to this land and practical instructions for creating a Shambhala in your own world, bringing peace, purpose, and perspective into your life and environment. Sakyong Mipham, the descendant of a warrior king, has inherited these teachings and gives us the lessons and myths of the great rulers and warriors of Shambhala.

He makes these teachings relevant to our twenty-first-century lives in a fresh and witty voice and helps us all to realize our potential for power and control in a seemingly uncontrollable world. For the first time ever, revered spiritual leader Sakyong Mipham brings the lessons of the ancient Shambhala warriors and rulers to the Western world and shows us how to live our lives with confidence.

Most of us are living in a haze—sometimes helping others, sometimes helping ourselves, sometimes happy, sometimes sad. We don't feel in control of our own lives. The ancient teachings of Shambhala rulership show us that we all have the ability to rule our own world and live with confidence. To do this, we need to use our daily lives to be strong, as opposed to aggressive, and to act

with wisdom and compassion. This may sound difficult, but when we begin to mix this ancient wisdom of rulership into our everyday life, we have both spiritual and worldly success. We don't need to abandon our life and become an ascetic or a monk in order to gain confidence and achieve this success. We can live in the world as a ruler no matter what we are doing. —from Ruling Your World

Robert Fortune was a Scottish gardener, botanist, plant hunter - and industrial spy. In 1848, the East India Company engaged him to make a clandestine trip into the interior of China - territory forbidden to foreigners - to steal the closely guarded secrets of tea. For centuries, China had been the world's sole tea

manufacturer. Britain purchased this fuel for its Empire by trading opium to the Chinese - a poisonous relationship Britain fought two destructive wars to sustain. The East India Company had profited lavishly as the middleman, but now it was sinking, having lost its monopoly to trade tea. Its salvation, it thought, was to establish its own plantations in the Himalayas of British India. There

were just two problems: India had no tea plants worth growing, and the company wouldn't have known what to do with them if it had. Hence Robert Fortune's daring trip. The Chinese interior was off-limits and virtually unknown to the West, but that's where the finest tea was grown - the richest oolongs, soochongs and pekoes. And the Emperor aimed to keep it that way. **P, NP, and**

Introduction to Machining Science
About the Book: This book is an attempt to consolidate the basic scientific studies in the machining area so that fundamental mechanics and other concepts related to primary machining processes could be understood. The book is essentially designed for senior undergraduat e mechanical

and production engineering students but practicing engineers will also find it useful for tool and product design. The topics covered include plastic deformation, chip formation, tool geometry, mechanics of orthogonal and oblique cutting, measurement of cutting force, cutting temperature, tool wear and tool life, economics of machining, grinding of metals and machining vibrations.

The analyses presented have been illustrated through numerical examples. Review questions and bibliography are also included. About the Author: Dr. G.K. Lal has been associated with the Indian Institute of Technology, Kanpur for the past 34 years. He retired as a Professor of Mechanical Engineering in 2003 and had earlier held the positions of Dean (1976-80) and

Deputy Director (1982-88). Before joining IIT Kanpur he had taught at the Banaras Hindu University and held research positions at the University of Sherbrooke (Canada) and the Carnegie-Mellon University (USA). He also worked as a Design Engineer with the Abitibi Paper and Power Corp. of Canada. *Black Leaders and Ideologies in the South* Graphic Sha Publishing Company A new

collection of philosophical biographies of key figures in Black Southern American social and political thought Frederick Douglass, Booker Washington and Ida Wells. Thurgood Marshall and Martin King are focused upon, together with Howard Thurman, Richard Wright, Fred Gray and Barbara Jordan. All are important in various ways to the movements

this book seeks out. From the perspective of liberation, the two high points in the African-American Odyssey are marked by Emancipation in the nineteenth century and Desegregation in the twentieth. Douglass bestriding the first, King and Marshall the second. The thread of resistance runs through most of these philosophical profiles, and the thread of non-violence, with greater

or less force, also runs throughout. This volume assumes a distinction between (a) an earlier period when Afro-America was more cohesive and collectively committed to self-improvement despite the odds, and (b) the contemporary period, beyond desegregation, marked by rates never previously rivaled of suicide, joblessness, imprisonment, despair and alienation,

especially among black poor. The life stories and philosophies presented here make fascinating reading. This book is a Special Issue of the leading journal, Critical Review of International Social and Political Philosophy.

The memoir of one of Pakistan's most prominent businessmen in exile 'I reached to

see not the beautiful hotel that we had so lovingly built, but a war zone. . . . We found bodies of our dear guests, colleagues, friends: faces I recognized, faces I had worked with and smiled at. The sight that stunned me was the crater—60 feet wide and 20 feet deep. It had been created by over 1000 kg of RDX. The hotel had not been attacked, it had been brutalized. Dead bodies and

dismembered limbs, little pools of blood—it was a massacre. I had thought of myself as a hardened man who had seen violence and gristly sights—but what I saw that day left me shaken.' Truth Always Prevails is the memoir of one of Pakistan's most prominent businessmen, Sadruddin Hashwani, chairman of the internationally renowned Hashoo Group. From sleeping in the back of trucks in the

cold deserts of Balochistan to now owning a brand of luxury hotels as well as numerous other businesses, Sadruddin Hashwani has led a remarkable life. He has struggled against corrupt politicians and uncooperative government officials to build and sustain an extensive business empire. He

has faced near-death experiences, most remarkably the 2008 bombing of his own hotel, the Marriott Islamabad, and has overcome seemingly insurmountable odds. Filled with fascinating anecdotes and telling sketches of prominent Pakistani personalities, his is an extraordinary story that will

inspire and entertain readers.
