"Ketum...satu-satunya tumbuhan yang mempunyai potensi teramat tinggi dari sudut perubatan... memerlukan kajian yang sebelum ini tidak pernah diterokai dengan mendalam dan menyeluruh. Potensinya adalah lebih tinggi daripada pokok opium dari sudut khasiat perubatan. Pihak berwajib perlu melihat aspek kesihatan dan potensi ini dengan lebih serius. Ketum boleh diibaratkan sebagai "The magical plant of Malaysia". Prof. Dr. Mustafa Ali Mohamed, Fakulti Perubatan, Universiti Malaya. Sumbangan Ibn-Sina (The father of early modern science) kepada rawatan alternatif menggunakan tumbuh-tumbuhan hukum dan nisbah 'al-mijaz' iaitu tentang tata-cara mengguna, kaedah menyimpan-mengawet serta memberi preskripsi tentang penyediaan adunan tumbuhan agar memberikan kesan terapeutik kepada pengguna. Theophrast (The father of botany) pula memberi nasihat bagaimana tumbuh-tumbuhan bertoksid boleh meninggalkan kesan ketagihan jika tidak dipantau pengambilannya. Justeru, ketum berpotensi untuk dikaji secara saintifik dan dikomersialkan agar manfaatnya adalah untuk kemashlahatan ummah. Samihah Khalil, Universiti Utara Malaysia

Proceedings of the International Conference on Technology and Innovation Management (ICTIM 2022) Sunway University Press
This edited volume provides a comprehensive overview and discussion of the issues surrounding the Malaysian Indian community's educational development. Malaysian Indian citizens who make up seven per cent of the population have their own set of strengths and weaknesses, while facing deep-seated socio-economic challenges. Education is seen as an enabler which could significantly facilitate social and economic upward mobility, as shown in policies and practices implemented under the New Economic Policy, many of which have unfortunately bypassed the Indian Community. This book explores and assesses the various aspects of the education endeavour of Malaysian Indians, including primary, secondary, post-secondary and tertiary education. Related challenges include urban poverty, school dropouts, dysfunctional families and other socio-economic issues. It reconsiders educational equity policies and practices in place while proposing new initiatives which could support and chart a way forward for the development of Malaysian Indians. Importantly, the publication addresses the roles of the government, private sector and civil society to help elevate the educational achievements of the Indian Community. The book will appeal to students and academics in the faculties of social science and comparative education, development economics and sociology, with a focus on access and equity in education.

Proposals for change would be of interest to policy-makers and managers of educational and non-governmental organisations in plural societies.

As industrialisation continues to evolve, exacerbating environmental problems such as global warming and climate change have raised the concern across the globe. Road transport is primarily the most notable source of pollution in the world. With the sophistication in environmental technology, a variety of environmentally friendly products have been introduced in the market and hybrid vehicle is highly recommended. However, in Malaysia automotive market demand for hybrid vehicle is still considered very low compared to non-hybrid vehicles and thus to conduct a study on consumer's adoption toward hybrid car is timely. The study investigated the relationships between marketing mix (4Ps), environmental concern, governmental incentive and purchase intention of hybrid car in Malaysia. A total of 372 valid samples were collected using convenience sampling technique. The Structural Equation Modelling (SEM) by using Smart-PLS was employed to investigate the significance of individual path correlations, measurement model, and overall fit of structural model. The results of the study revealed that marketing mix (4Ps), governmental incentive, attitude, subject norm and perceived behavioural control showed a significant and positive relationship with hybrid car purchase intention. In addition environmental concern exhibits the moderation effect among those relationships.

Twelfth in a series of annual reports comparing business regulation in 189 economies, Doing Business 2015 measures regulations affecting 10 areas of everyday business activity: Starting a business Dealing with construction permits Getting electricity Registering property Getting credit Protecting minority investors Paying taxes Trading across borders Enforcing contracts Resolving insolvency Labor market regulations This year's report will present data for a second city for the 11 economies with more than 100 million inhabitants. These are Bangladesh, Brazil, China, India, Indonesia, Japan, Mexico, Nigeria, Pakistan, the Russian Federation, and the United States. Three of the 10 topics covered have been expanded, with further plans to expand on five additional indicators in next year's report. Additionally, the Doing Business rankings are now based on the distance to the frontier measure where each economy is evaluated based on how close their business regulations are to the best global practices. This provides a more precise view of each economy's performance and its improvement over time. The report updates all indicators as of June 1, 2014, ranks economies on their overall 'ease of doing business,' and analyzes reforms to business regulation identifying which economies are strengthening their business environment the most. Doing Business illustrates how reforms in business regulations are being used to analyze economic outcomes for domestic entrepreneurs and for the wider economy. It is a flagship product produced in partnership by the World Bank and IFC that garners worldwide attention on regulatory barriers to entrepreneurship. More than 60 economies have used the Doing Business indicators to shape reform agendas and monitor improvements on the ground. In addition, the Doing Business data has generated over 2,000 articles in peer-reviewed academic journals since its inception.

MENYEDIA AKAUN PERNIAGAAN (D.I.Y) UNTUK BUKAN PROFESIONAL Awana

In attaining economic prosperity, efficient human capital and thus higher education, has increasingly ranked among the top of priorities in the Southeast Asian countries. It is to this end that Malaysia, in particular, has been working towards a reform in its higher education system. Reform measures have greatly centred on the issues of university autonomy. This book details the careful findings of the project entitled Governance Reforms in Malaysia Higher Education with Focus on Institutional Autonomy and Its Effects of University Governance and Management. As such, readers can look forward to gaining a thorough understanding of the reform measures taken in higher education governance and the extent of their impact. Four areas of autonomy are extensively covered: institutional, financial, academic and human resource autonomy. The challenges faced in the individual areas are painstakingly dissected and presented, leading up to projections and recommendations on the way forward in Malaysian higher education governance.
