The book, SHARPEN YOUR WITS is a treasure trove of Mathematical and Logic teasers, which will make the reader's brain cells go buzzing, and solving these teasers will improve cognitive functions. Teasers have been compiled with lots of passion by the author. Critical thinking and problem-solving skills are crucial. School-going and college-going students as well as others who have the penchant for solving teasers will love such intriguing, mind-flexing, and brain-building puzzles. You don't require a high IQ nor do you have to be a genius to find the solutions to the problems. You require only a logical mind, clear thinking, and some basic maths solving skills. The amateurs, as well as experienced mathematicians and logicians, will find plenty of food for their grey matter. The author has been singularly focused on zealously hatching these teasers for over the past four decades. The teasers are tantalizing, amusing, and intricate to solve.

Glimpses of Glory is the second in a three-volume collection of prayers and other resources based on the new Common Worship Lectionary used widely around the world. Written in the Celtic style for which the author is well-known, and linked to the Sunday readings, these prayers and intercessions may be used by congregations for the Prayers of the People, as well as by individuals seeking to supplement their personal devotions. "Holy God open our ears to your call our eyes to your presence, our hearts to your love. Give us the courage to say, 'Here I am Lord, send me.' Strengthen our faith that we may be willing at all times to heed your call. We pray for all who are called to proclaim your glory, all who seek out the lost, uplift the fallen

and comfort the wounded. We pray for the outreach of the church to which we belong. Lord as you have called us Make us worthy of our calling.”

The New York Times bestselling author of *The Year of Living Biblically* goes on a rollicking journey to understand the enduring power of puzzles: why we love them, what they do to our brains, and how they can improve our world. “Even though I’ve never attempted the New York Times crossword puzzle or solved the Rubik’s Cube, I couldn’t put down *The Puzzler*.”—Gretchen Rubin, author of *The Happiness Project* and *Better Than Before* What makes puzzles—jigsaws, mazes, riddles, sudokus—so satisfying? Be it the formation of new cerebral

pathways, their close link to insight and humor, or their community-building properties, they’re among the fundamental elements that make us human. Convinced that puzzles have made him a better person, A.J.

Jacobs—four-time New York Times bestselling author, master of immersion journalism, and nightly crossword—set out to determine their myriad benefits.

And maybe, in the process, solve the puzzle of our very existence. Well, almost.

In *The Puzzler*, Jacobs meets the most zealous devotees, enters

(sometimes with his family in tow) any puzzle competition that will have him,

unpacks the history of the most popular puzzles, and aims to solve the most

impossible head-scratchers, from a mutant Rubik’s Cube, to the hardest

corn maze in America, to the most sadistic jigsaw. Chock-full of

unforgettable adventures and original examples from around the

world—including new work by Greg Pliska, one of America’s top puzzle-

makers, and a hidden, super-challenging but solvable puzzle that will earn the

first reader to crack it a \$10,000 prize*—

The Puzzler will open readers’ eyes to the power of flexible thinking

and concentration. Whether you’re puzzle obsessed or puzzle hesitant,

you’ll walk away with real problem-solving strategies and pathways toward

becoming a better thinker and decision maker—for these are certainly puzzling

times. *NO PURCHASE NECESSARY. U.S. Residents, 18+. Ends May 3, 2023.

This book is written by a philosopher for other philosophers and for that section of the reading public who buy in large quantities and, no doubt, devour with great earnestness the popular books written by scientists for their

enlightenment. We common readers, to adapt a phrase from Samuel Johnson, are fitted neither to criticize physical theories nor to decide what precisely are their implications. We are dependent upon the scientists for an exposition of those developments which – so we find them proclaiming – have important and far-reaching consequences for philosophy. Unfortunately, however, our popular expositors do not always serve us very well. The two who are most widely read in this country are Sir Arthur Eddington and Sir James Jeans. They are not always reliable guides. Their influence has been considerable upon the reading public, upon theologians, and upon preachers; they have even misled philosopher who should have known better. Accordingly, it has seemed to me to be worth while to examine in some detail the philosophical views that they have put forth and to criticize the grounds upon which these views are based.

A smart way to teach children to think logically and creatively One of the most precious gifts you can offer a child is a sharp mind. The 56 puzzles in this delightful collection were passed down through generations of Chinese families who wanted their children to develop concentration and mental agility. Baifang spent hours enjoying them with her family and friends as she was growing up in the north of China. Now living in San Francisco, Baifang is passing them on to her own children and to families everywhere. Each puzzle inspires clear, precise, and inventive thinking. Some teach math concepts; others involve spatial relationships and visualization. All of them have fascinating solutions and help improve memory and problem-solving skills. An inexhaustible source of challenging fun, these are mental calisthenics for stimulating interaction between lively minds from ages 8 to 80.
