Courage to Grow Palgrave Macmillan
Acton Academy: The one-room schoolhouse for the twenty-first century Seeking a 21st century education for their children, Laura and Jeff Sandefer jumped off the track of conventional school and created a new

model for learning. They created Acton Academy as a better school where learning is made practical and meaningful and where students begin a lifelong Hero's Journey to discover their true potential. Using the Socratic method, elements of the Montessori approach and state-of-the-art online instruction, Acton guides students toward independence and self-motivation, helping them find the courage to grow into the person they were meant to be. Soon, other parents wanted to start their own Acton Academies, and less than a decade from the seven founding students' first Socratic discussion, Acton has spread around the world. *Courage to Grow* is the Sandefer family's personal quest for their own children's education and happiness. Their story also contains a path for other parents who want to give their children the freedom to take ownership of their own education and to start their own school. The treasure at the end is much larger than Laura ever expected--a quickly growing network of dedicated, curious young people and parents who are not afraid to set them

free.

The Ultimate Writing

Coach Kyle Books

In this updated edition,

Cathy Vatterott examines

the role homework has

played in the culture of

schooling over the years;

how such factors as family life, the media, and "homework gap" issues based on shifting demographics have affected the homework controversy; and what recent research as well as common sense tell us about the effects of homework on student learning. She also explores how the current homework debate has been reshaped by forces including the Common Core, a pervasive media and technology presence, the mass hysteria of "achievement culture," and the increasing shift to

standards-based and formative assessment. The best way to address the homework controversy is not to eliminate homework. Instead, the author urges educators to replace the old paradigm (characterized by long-standing cultural beliefs, moralistic views, and behaviorist philosophy) with a new paradigm based on the following elements: Designing high-quality homework tasks; Differentiating homework tasks; Deemphasizing grading of homework; Improving homework completion; and

Implementing homework support programs. Numerous examples from teachers and schools illustrate the new paradigm in action, and readers will find useful new tools to start them on their own journey. The end product is homework that works—for all students, at all levels.
