The Japanese serow (*Capricornis crispus*) has been protected by law since 1955 in Japan, because it was becoming rarer and approaching extinction. Thereafter, the serow population has increased gradually. The Japanese serow is thought to be a primitive relict species on the islands of

Japan, and the geographical range of the serow has retracted upwards into the mountain forests to avoid contact with humans. Little was therefore known about these animals. However, increasing losses of forest habitat due to exploitation of the mountain forests or expanding cultivation by local foresters have driven the Japanese serow back into the lowlands of Japan. Since then, complaints of damage to trees and other vegetation have accumulated against the serow. In some prefectures the shooting of Japanese serow was allowed in order to prevent damage to forests. The animals killed were taken for research by the Departments of

the Environment and by universities. was set up at the summit of Mt. Gozaisho, The Japan Serow Center Komono-cho, Mie Prefecture, in 1962 and has made a great effort to breed the serow and its related species in captivity. In addition, the International Studbook of Capricorn is *crispus* in captivity was established in Japan, and the state of breeding of the Japanese serows is now reported annually. However, without detailed scientific research, it is impossible to conduct sensible protection, conservation or management of the serow in captivity or in the wild.

From Beth Harbison, the New York Times bestselling author of *When in Doubt*, *Add Butter* and *Shoe Addicts Anonymous*, comes *Chose the Wrong Guy, Gave Him the Wrong Finger*, a delightful new novel that will make you look at second chances in a whole new way. Ten years ago, Quinn Barton was on her way to the altar to marry Burke Morrison, her high school sweetheart, when something derailed her. Rather, someone derailed her—the Best Man who at the last minute begged her to reconsider the marriage. He told her that Burke had been cheating on her. For a long time. Quinn, stunned, hurt, and confused, struggled with the obligation of fulfilling her guests' expectations—providing a wedding—and running for her life. She chose running. With the Best Man. Who happened to be Burke's brother, Frank. That relationship didn't work either. How could it, when Quinn had been engaged to, in love with, Frank's brother? Quinn opted for neither,

and, instead, spends the next seventeen years working in her family's Middleburg, Virginia, bridal shop, *Talk of the Gown*, where she subconsciously does penance for the disservice she did to marriage. But when the two men return to town for another wedding, old anger, hurt, and passion resurface. Just because you've traded the good guy for the bad guy for no guy doesn't mean you have to stay away from love for the rest of your life, does it? Told with Beth Harbison's flair for humor and heart, *Chose the Wrong Guy* will keep you guessing and make you believe in the possibilities of love.

Wild caprinae, including sheep and goats, are an extremely valuable group of mammals. While most live in mountains, some inhabit desert grasslands, tropical forests or even arctic tundra. They range in size from the 30kg goral to the 350kg musk ox and display a variety of horn shapes and sizes as well as coat and body coloration. They are highly prized by hunters on account of their horns and their coats. Today, despite their important domestic relations, many wild caprinae are in danger of being lost forever: over 70 of caprinae taxa are threatened and over 30 endangered or critical. The main threats to them are over-harvesting, habitat loss and resource competition from livestock. Some

face an additional threat from trophy hunters. Despite this, however, conservation legislation is either absent or, more often, poorly enforced. This action plan explores the value of caprinae to biodiversity, the threats facing the members of the species, and makes recommendations to reverse current trends. It also emphasizes the importance to carpinae conservation and survival of close collaboration among all parties involved in wildlife conservation including local peoples and hunting organizations, governments, scientists and academic institutions.

This book constitutes the thoroughly refereed post-proceedings of the 5th International Conference on High Performance Computing for Computational Science, VECPAR 2002, held in Porto, Portugal in June 2002. The 45 revised full papers presented together with 4 invited papers were carefully selected during two rounds of reviewing and improvement. The papers are organized in topical sections on fluids and structures, data mining, computing in chemistry and biology,

problem solving environments, computational linear and non-linear algebra, cluster computing, imaging, and software tools and environments.

"As I was seated in remembrance and contemplation one night, in front of me appeared a great stag, shining and shimmering in whiteness, and there was a concentration of brilliant white light above its head. The stag was some feet away and was moving toward me. As it got closer, I could see that the white light on its head was emanating from a flaming brand, a torch, lit, glowing with brilliant white star-like light. The flaming brand, 'qabas' in Quranic Arabic, was as if a projection from the top of its head. The stag came straight toward me, approached me until it was so near I could have reached out and touched it, and then the flaming brand that was on its head, was suddenly but so naturally, held by it in its mouth. The stag bowed its head and placed this flaming brand, this qabas at my feet, and disappeared. As this happened the following verse flashed through my mind, and I knew I had been

given permission to spread the teachings that are coming to me, and I was given the name under which to do so; It is 'Qabas', a flaming brand; a torch for warmth and a light for guidance. إِذْ رَأَىٰ تَارًا فَقَالَ لِأَهْلِهِ امْكُثُوا إِنِّي آنَسْتُ تَارًا لَّعَلِّي آتِيكُمْ مِنْهَا بِقَبَسٍ أَوْ أَجْدٍ عَلَىٰ النَّارِ هُدًى

Quran: surah 20, ayah 10 When he saw a fire he said to his family, "tarry here, I have indeed perceived a fire maybe I can bring you from it a flaming brand or I can find guidance at the fire"\*\*\*This is the first volume in the four volume Qabas series. It collects 40 poems, composed of four series of 10 pieces each, that are collected for the blessing and spiritual state of the number 40. These poems were penned by the author during the years preceding her formal initiation into spiritual training. Works written during the beginning, middle, and end stages of her training comprise volumes 2, 3 and 4 in this series.

A motorcycle's electrical system can be daunting to even the most adept home

mechanic. And yet, the more complex these systems become—and the more important to a motorcycle’s function—the more useful, even critical, it will be to know something about them. That’s where this book comes in with a user-friendly guide to understanding, diagnosing, and fixing the electrical systems and components that make a bike run . . . or falter. Veteran technician Tracy Martin explains the principles behind motorcycle electrical systems and how they work. He details the various tools, such as multimeters and test lights, that can be used to evaluate and troubleshoot any vehicle's electrical problem. And in several hands-on projects, he takes readers on a guided tour of their vehicle’s electrical system, along the way giving clear, step-by-step instructions for diagnosing specific problems.

Waiting for Wolves in Japan Haynes Manuals N. America, Incorporated  
Each Haynes manual provides specific and detailed instructions for performing everything from basic maintenance and troubleshooting to a complete overhaul of the machine, in this case the Honda CBR1000RR Fireblade, model years 2004 through 2007. Do-it-yourselfers will find this service and repair manual more comprehensive than the factory manual, making it an indispensable part of their tool box. A typical Haynes manual covers: general information; troubleshooting; lubrication and routine maintenance; engine top end; engine lower end; primary drive, clutch and external shift mechanism; transmission and internal shift mechanism; engine management system; electrical system; wheels, tires and drivebelt; front suspension and steering; rear suspension; brakes; body, and color wiring diagrams. An index makes the manual easy to navigate.
