The Moral Rights of Animals Speaking Volumes

It was a person after all, but she was suspended in mid-air. Abi's heart began to thump against her ribcage as the full horror of what she was seeing became apparent. Her shrill scream pierced the silence, startling birds into taking flight. 'Help me!' she cried. 'Somebody please help!' When beautiful and bright Hannah is late for their morning run, her best friend Abi thinks nothing of it. Hannah isn't always that reliable - she's probably just overslept. But as Abi runs through the woods, following the same route she always does, she is greeted by a horrifying sight: Hannah's body, swaying in the breeze. Detective Rachel Hart is called to the scene. Something seems wrong from the start. Hannah's friends and family insist that she had everything to live for, and no one has a bad word to say about her. But when murder is confirmed, and Rachel starts digging, she soon realises that there were plenty of people with reason to want Hannah dead. Then a second woman is found strangled in the same wood, and everything Rachel thought is thrown into doubt. Is there a serial killer at work? Rachel is determined to find answers before another life is lost - all the time unaware that the killer's sights are focussed firmly on her. Can Rachel unravel the deadly game before she walks into a trap? A breathtakingly twisty thriller for fans of Rachel Abbott, Cara Hunter and Angela Marsons. Goodreads Reviewer, ★★★★★ *Chimera Secrets* Benchmark Press "YA science fiction at its best." - Jay Kristoff, New York Times bestselling author of *The Aurora Cycle* and *Illuminae* "A unique and engrossing yarn." - Pierce Brown, #1 New York Times bestselling author of the *Red Rising* Saga From acclaimed Morris finalist Len Vlahos comes a grounded sci-fi story about a boy who's more than human, perfect for fans of *Westworld* and *LIFEL1K3*. Quinn thinks he's a normal fifteen year-old. He plays video games, spends time with his friends, and crushes on a girl named Shea. But a shocking secret brings his entire world crashing down: he's not a boy. He's artificial intelligence. After Quinn "wakes up," he sees his world was nothing more than a virtual construct. He's the QUantum INtelligence Project, the first fully-aware A.I. in the world--part of a grand multi-billion-dollar experiment led by the very man he believed to be his dead father. But as Quinn encounters the real world for the first time, his life becomes a nightmare.

While the scientists continue to experiment on him, Quinn must come to grips with the truth: his mom and brother don't exist. His friends are all adults who were paid to hang out with him. Even other super computers aren't like him. Quinn finds himself completely alone--until he bonds with Shea, the real girl behind the virtual one. As Quinn explores what it means to truly live, he questions who he can trust. What will it take to win his freedom . . . and where does he belong? Award-winning author Len Vlahos offers a perfect blend of science fiction and contemporary in this unputdownable, high stakes tale that explores big questions about what it means to be human. *Ebony* Simon and Schuster *Anywhere But Here* and *The Lost Father* have established Mona Simpson as one of our most accomplished writers. In her new novel--the portrait of a legendary, quintessentially American entrepreneur trapped by the age he helped to define--she brilliantly extends her achievement. More powerfully than ever before, Simpson uncovers the nature of longing and belonging, of blood relations and the human heart.

A Novel on Life in Science LSU Press A brand-new book in the *Antiques & Collectibles* series by New York Times bestselling author Ellery Adams and Parker Riggs. Molly Appleby has promised her new husband that their honeymoon will be trouble-free--specifically, no sleuthing. Unfortunately, trouble seems to follow Molly wherever she goes, even to England. After a glorious week in London, the newlyweds have escaped the city to visit Molly's great-aunt in the quaint English village of Marlow Crossing. The setting is idyllic, as beautiful and serene as Molly could hope for, but as the talented reporter and senior staff writer for *Collector's Weekly* knows, appearances can be deceiving. And when a local woman turns up poisoned to death, Molly's convinced there's more to the story than meets the eye. Putting her honeymoon on hold, Molly agrees to help local inspector Devon Boyle with the case, especially

since the sleepy village presents such a small number of suspects. But when two of them go missing and the tragic death of another woman comes to light, Molly realizes she's up against a much more sinister criminal than she thought.

Untangling a web of lies and deceit as she searches for a motive and a murderer won't be easy, but Molly's determined to put all of her detective skills to use to catch a killer before her trip, and her life, are brought to a sudden end.

Murder on the Maritime Tour Simon and Schuster

Edited by Mylan Engel Jr. and Gary Lynn Comstock, this book employs different ethical lenses, including classical deontology, libertarianism, commonsense morality, virtue ethics, utilitarianism, and the capabilities approach, to explore the philosophical basis for the strong animal rights view, which holds that animals have moral rights equal in strength to the rights of humans, while also addressing what are undoubtedly the most serious challenges to the strong animal rights stance, including the challenges posed by rights nihilism, the "kind" argument against animal rights, the problem of predation, and the comparative value of lives. In addition, contributors explore the practical import of animal rights both from a social policy standpoint and from the standpoint of personal ethical decisions concerning what to eat and whether to hunt animals. Unlike other volumes on animal rights, which focus primarily on the legal rights of animals, and unlike other anthologies on animal ethics, which tend to cover a wide variety of topics but only devote a few articles to each topic, this volume focuses exclusively on the question of whether animals have moral rights and the practical import of such rights. The Moral Rights of Animals will be an indispensable resource for scholars, teachers, and students in the fields of animal ethics, applied ethics, ethical theory, and human-animal studies, as well as animal rights advocates and policy makers interested in improving the treatment of animals.

The five heartbreaking and radiant stories in John Fulton's *The Animal Girl* explore the awkwardness of situations in which grief and erotic love collide. Here are people in extremis, struggling mightily, and often failing, to keep it together. In the Pushcart Prize--winning "Hunters,"

Fulton contrasts the humorous clumsiness of dating with the grim realities of death in the tale of a middle-aged woman who keeps her cancer a secret when she starts a relationship with an avid hunter. In the novella-length title story, a lonely adolescent girl deals with the recent loss of her mother and the alien presence of her father's new girlfriend by taking out her aggression on her boss and on the animals she cares for in her summer job at a research laboratory. The final story in the collection, "The Sleeping Woman," delves into the inner life of Evelyn, a divorced professional woman who falls in love with Russell, a man whose wife is permanently brain damaged and has been unresponsive for years. The ghostly presence of Russell's wife haunts Evelyn as she discovers how her lover has been scarred by his misfortune and searches for ways they might build a long-term relationship in the wake of personal tragedy. These powerful stories approach the often sentimentalized subject of romance with tenderness and insight into the heart-worn perspective of characters who have failed at love in the past. In lucid, revelatory prose, Fulton navigates the complexity of both mid-life courtship and adolescent rage with humor and intelligence.

She was a poor Southern tobacco farmer who worked the same land as her slave ancestors, yet her cells—taken without her knowledge—became one of the most important tools in medicine: The first “immortal” human cells grown in culture, which are still alive today, though she has

been dead for more than sixty years. HeLa cells were vital for developing the polio vaccine; uncovered secrets of cancer, viruses, and the atom bomb’s effects; helped lead to important advances like in vitro fertilization, cloning, and gene mapping; and have been bought and sold by the billions. Yet Henrietta Lacks remains virtually unknown, buried in an unmarked grave. Henrietta’s family did not learn of her “immortality” until more than twenty years after her death, when scientists investigating HeLa began using her husband and children in research without informed consent. And though the cells had launched a multimillion-dollar industry that sells human biological materials, her family never saw any of the profits. As Rebecca Skloot so brilliantly shows, the story of the Lacks family—past and present—is inextricably connected to the dark history of experimentation on African Americans, the birth of bioethics, and the legal battles over whether we control the stuff we are made of. Over the decade it took to uncover this story, Rebecca became enmeshed in the lives of the Lacks family—especially Henrietta’s daughter Deborah. Deborah was consumed with questions: Had scientists cloned her mother? Had they killed her to harvest her cells? And if her mother was so important to medicine, why couldn’t her children afford health insurance? Intimate in feeling, astonishing in scope, and impossible to put down, *The Immortal Life of Henrietta Lacks* captures the beauty and drama of scientific discovery, as well as its human consequences.
