Economic Report of the President e-artnow
Finalist for the Pulitzer Prize (Biography) A New York Times bestseller, this "epic and elegant" biography (Wall Street Journal) profoundly recasts our understanding of the Vietnam War. Praised as a "superb scholarly achievement" (Foreign Policy), *The Road Not Taken* confirms Max Boot's role as a "master chronicler" (Washington Times) of American military affairs. Through dozens of interviews and never-before-seen documents, Boot rescues Edward Lansdale (1908-1987) from historical ignominy to "restore a sense of proportion" to this "political Svengali, or 'Lawrence of Asia'" (The New Yorker). Boot demonstrates how Lansdale, the man said to be the fictional model for Graham Greene's *The Quiet American*, pioneered a "hearts and minds" diplomacy, first in the Philippines and then in Vietnam. Bringing a tragic complexity to Lansdale and a nuanced analysis to his visionary foreign policy, Boot suggests Vietnam could have been different had we only listened. With contemporary reverberations in Iraq, Afghanistan, and Syria, *The Road Not Taken* is a "judicious and absorbing" (New York Times Book Review) biography of lasting historical consequence.

It is not a fairy tale, and unfortunately it is reality for so many. She invites you to join her and learn what being strong really entails. To accomplish its goals, Atlas enlists the help of Aaron Blake, a teenaged artist struggling with a handicap, and Otherlife security officer Steve Barrow, harbinger of a dark secret from his past. i AM shares personal anecdotes, tips, and revelations that reveal a different way of thinking that leads to inner peace and a better view of what it means to be alive. *Executive Outcomes* Scholastic Inc. We can't escape them; aliens are everywhere. They sell us soft drinks and star in their own sitcoms. But to the many people who believe they have been abducted aboard strange crafts, aliens are a very serious reality. Stories of these encounters, taken from investigators' files, have been vividly depicted in television specials and motion pictures. Despite their predominance as a cultural phenomenon, experts offer drastically conflicting opinions: aliens are harmless creatures whose aim is to better understand humans; aliens are angel-like entities here to enhance our spiritual awareness; aliens are conspiring with the government in a plot to enslave humans; and aliens are genetically breeding with humans to create a new race of hybrids. But, what is really going on? Are aliens abducting thousands of unsuspecting people each year? Are they then inserted with tracking devices and monitored? Based on his own investigative files and almost twenty-five years of research, science writer Chris Rutkowski asks hard questions, looking critically, yet compassionately, at the stories of abductees. He is an astronomer, educator and published commentator within the area of study known as "ufology." Rutowski presents case histories of many abductees, showing both their diversity and similarities, and examines how our understanding is shaped by media, by science, and by society itself.

The Dominican Republic is the most visited country in the Caribbean and, according to CNN, the second-happiest place on the planet. However, most of its workers make less than fifteen dollars a day, it has around two million stateless people, and 70 percent of its schools do not offer students safe drinking water. The island is certainly a fascinating place for students to research, so why not take a social justice trip there so they can see it for themselves? That was what Kevin LaMastra had in mind when he took his students to the DR for some snorkeling, horseback riding, and waterfall jumping, but also to check out a garbage dump, a sweatshop, and an HIV/AIDS orphanage. We learn the most when we step outside our comfort zones. That's not exactly

LaMastras sales pitch when he's looking for students to sign up each year, but it becomes the leading philosophy of the trip when he takes them to bond with survivors of Haiti's 2010 earthquake, to visit communities hidden deep inside sugarcane fields, and to witness an actual Vodou ceremony.

George Orwell set out 'to make political writing into an art', and to a wide extent this aim shaped the future of English literature - his descriptions of authoritarian regimes helped to form a new vocabulary that is fundamental to understanding totalitarianism. While *1984* and *Animal Farm* are amongst the most popular classic novels in the English language, this new series of Orwell's essays seeks to bring a wider selection of his writing on politics and literature to a new readership. In *Why I Write*, the first in the Orwell's Essays series, Orwell describes his journey to becoming a writer, and his movement from writing poems to short stories to the essays, fiction and non-fiction we remember him for. He also discusses what he sees as the 'four great motives for writing' - 'sheer egoism', 'aesthetic enthusiasm', 'historical impulse' and 'political purpose' - and considers the importance of keeping these in balance. *Why I Write* is a unique opportunity to look into Orwell's mind, and it grants the reader an entirely different vantage point from which to consider the rest of the great writer's oeuvre.
