Health care
systems
worldwide are
faced with the
challenge of
improving the
quality of
care.
Providing
evidence from
health
research is
necessary but
not sufficient
for the

provision of
optimal care
and so
knowledge
translation
(KT), the
scientific
study of
methods for
closing the
knowledge-to-
action gap
and of the
barriers and
facilitators
inherent in the
process, is
gaining
significance.
Knowledge
Translation in
Health Care
explains how
to use
research
findings to
improve
health care in
real life,
everyday
situations. The
authors define

and describe
knowledge
translation,
and outline
strategies for
successful
knowledge
translation in
practice and
policy making.
The book is
full of
examples of
how
knowledge
translation
models work
in closing the
gap between
evidence and
action. Written
by a team of
authors
closely
involved in the
development
of knowledge
translation
this unique
book aims to
extend
understanding

and implementation worldwide. It is an introductory guide to an emerging hot topic in evidence-based care and essential for health policy makers, researchers, managers, clinicians and trainees.

Advances in Minimally Invasive Gynecologic Reproductive Surgery

Emerald Group Publishing Features papers directed to fire protection in various environments

other than building structures including fuel transporting vehicles, spacecraft, a sports arena, an offshore oil rig and propane fueling bus facilities.

Performance-Based Financing Toolkit Taylor

& Francis "A resounding character study just as much as it is an action novel, and both are equally triumphant."

—Kirkus Reviews To most people, Maj. John Rexford is a

retired Marine living in the Catskill Mountains of New York on disability.

Even John's girlfriend, Maggie, has no idea he's really a CIA spook recruited in Afghanistan and assigned to kill enemies on US soil.

With exemplary skills in hand-to-hand combat and small arms weaponry, John Rexford completes a string of successful kills, eliminating terrorists and their money

supply in the New York Metropolitan area. With the FBI hot on his trail for these illegal assassinations, John must find a way to stop an international team of explosives experts from destroying New York City's aqueducts, killing thousands with chlorine gas, and burning the five boroughs to the ground. During his mission, John runs afoul of a high level underworld assassin who

uses his mastery of yoga to silently strangle his victims. When the assassin discovers John's one liability—his girlfriend, Maggie—John will have to make a terrible choice between her life and the capture of her abductor. This tightly scripted story begins with a terrorist plot and gradually turns into a clash between two professional killers, with the lives of both John Rexford and

Maggie hanging in the balance. As the characters collide with deadly force on the streets of New York in *Cut and Cover*, the line between right and wrong blurs, long-standing loyalties are questioned, and no one is really sure, even if they succeed, what the final outcome will be. Skyhorse Publishing, as well as our Arcade, Yucca, and Good Books imprints, are proud to publish a broad range of

books for readers interested in fiction—novels, novellas, political and medical thrillers, comedy, satire, historical fiction, romance, erotic and love stories, mystery, classic literature, folklore and mythology, literary classics including Shakespeare, Dumas, Wilde, Cather, and much more. While not every title we publish becomes a New York

Times bestseller or a national bestseller, we are committed to books on subjects that are sometimes overlooked and to authors whose work might not otherwise find a home.

**The Stars
Are Legion**

Random House This is a new and engaging examination of the emergence of a Muslim women’s movement in India. The state of Bhopal, a Muslim principality in

central India, was ruled by a succession of female rulers throughout the nineteenth and twentieth centuries, most notably the last Begam of Bhopal, Nawab Sultan Jahan Begam. Siobhan Lambert-Hurley puts forward the importance for early Muslim female activists to balance continuity and innovation. By operating within the framework of Islam, these women built on traditional norms in order

to introduce incremental change in terms of veiling, female education, marriage, motherhood and women's political rights. For the first time, this book analyzes the role of the 'daughters of reform', the first generation of Muslim women who contributed to the reformist discourse, particularly at the regional level. Based on numerous primary sources in Urdu, including the tracts, books,

reports, letters and journal articles of Sultan Jahan Begam and the other women of Bhopal along with official records such as the reports of early organizations and institutions in the Bhopal State, the author sheds light on an important part of India's history. *Rational Emotive Behavior Therapy in Sport and Exercise* Simon and Schuster Jonathan Gruber's

market-leading Public Finance and Public Policy was the first textbook to truly reflect the way public policy is created, implemented, and researched. Like no other text available, it integrated real-world empirical work and coverage of transfer programs and social insurance into the traditional topics of public finance. By augmenting the traditional approach of public finance texts with a

true integration of theory, application, and evidence, Public Finance and Public Policy engages students like no other public finance text. Thoroughly updated, this timely new edition gives students the basic tools they need to understand the driving issues of public policy today, including healthcare, education, global climate change, entitlements, and more.

Hop Routledge "Another masterpiece in health economics from a doyen in the field, this expanded and updated dictionary will undoubtedly become a standard reference work for scholars, practitioners and others working in this area. The definitions are concise, the coverage is comprehensive, the cross-referencing is excellent, and the subject and name indexes greatly assist navigation of

this substantial tome. You will want to keep this one within arm's reach." Jim Butler, Australia National University "Health economics and health service research as well as health care policy, delivery and finance rely on a dizzying array of terms drawn from a diverse set of disciplines including (but not limited) to economics, epidemiology, risk science and statistics. Moreover, the health and

health care systems are replete with acronyms and specialized institutions. The Dictionary of Health Economics provides the most comprehensive set of definitions and explanations of these terms available. It is a fantastic resource for anyone working in any health related field." Michael Chernew, Harvard Medical School, US "This dictionary is unique. What other dictionary

borders on being an enjoyable read? Its breadth is quite astonishing. It is also very clearly a health economics dictionary and will allow those in mainstream economics, in the other social sciences and in health sciences and health care to understand and be better able to communicate with health economists. It will also be a most useful addition to the bookshelves

of health economists like myself." Gavin Mooney, University of Sydney, Australia "This book is a welcome addition for graduate students or professionals interested in the taxonomy of health care." David Cutler, Harvard University, US "Health economics is at the crossroads of medicine, economics, statistics, insurance, and the law. This often makes for difficult

reading. But help is now available thanks to this amazingly comprehensive Dictionary of Health Economics. I for one ran into several entries that I did not or did not fully understand, but the very clear explanations changed that within a few moments! This Dictionary is a true service to the scientific community." Peter Zweifel, University of Zurich, Switzerland "The Dictionary

provides a comprehensive overview and authoritative yet accessible explanation of important terms and concepts from the increasingly important field of health economics. This excellent work will enable many entering this field, students and professionals alike, to quickly yet thoroughly grasp the meaning of the health economics jargon, facilitating study and

(multi-disciplinary) co-operation. Anthony Culyer is sharing his impressive knowledge in this field in a clear and user-friendly fashion, hopefully to the benefit of many readers." Werner Brouwer, Erasmus University Rotterdam, the Netherlands "An essential book to steer the student away from a minefield of inaccurate and woolly definitions and an important

resource of the practitioner of health economics. A book that offers the reader accuracy and rigour in the definitions it provides of key terms in health economics alongside ready access." John Brazier, University of Sheffield, UK This second edition of Culyer's authoritative Dictionary of Health Economics brings the material up to date and adds large amounts of new

information. Some definitions have been revised. There are over 700 new entries. The Dictionary now also contains extensive references to the literature to identify original source material or to provide illustrations of the headword in use. The bibliography comprises some 1,000 items. In view of the huge growth in cost-effectiveness studies and the continuing variability in their quality,

an appendix lists 100 high quality cost-effectiveness studies from all parts of the world. There are now many more entries and references relating to the developing world. New and separate subject and name indices provide supplementary means of searching the material and identifying individuals who have contributed significantly to the oeuvre. **Handbook of Undergraduate Second Language**

Acclaimed author Jorey Hurley shows us how bees make and store honey in this bold and graphic picture book that includes informative backmatter on the process. With just one word on each page and the vivid illustrations Joey Hurley is

known for, Beehive showcases the cycle of bees making honey. Detailed backmatter further explains this fascinating natural process.
Perspectives and Practice Across Higher Education
Macmillan
Higher Education
Addressing the challenge of covering health care expenses—while minimizing economic risks. Moral hazard—the tendency to change behavior when the cost of

that behavior will be borne by others—is a particularly tricky question when considering health care. Kenneth J. Arrow's seminal 1963 paper on this topic (included in this volume) was one of the first to explore the implication of moral hazard for health care, and Amy Finkelstein—recognized as one of the world's foremost experts on the topic—here examines this issue in the context of contemporary

American health care policy. Drawing on research from both the original RAND Health Insurance Experiment and her own research, including a 2008 Health Insurance Experiment in Oregon, Finkelstein presents compelling evidence that health insurance does indeed affect medical spending and encourages policy solutions that acknowledge and account for this. The volume also features commentaries and insights from other renowned economists, including an introduction by Joseph P. Newhouse that provides context for the discussion, a commentary from Jonathan Gruber that considers provider-side moral hazard, and reflections from Joseph E. Stiglitz and Kenneth J. Arrow. “Reads like a fireside chat among a group of distinguished, articulate health economists.” —Choice

What the Eyes Don't See CRC Press
 Planning Health Promotion Programs This thoroughly revised and updated third edition of *Planning Health Promotion Programs* provides a powerful, practical resource for the planning and development of health education and health promotion programs. At the heart of the book is a streamlined

<p>presentation of Intervention Mapping, a useful tool for the planning and development of effective programs. The steps and tasks of Intervention Mapping offer a framework for making and documenting decisions for influencing change in behavior and environmental conditions to promote health and to prevent or improve a health problem. Planning Health Promotion</p>	<p>Programs gives health education and promotion professionals and researchers information on the latest advances in the field, updated examples and explanations, and new illustrative case studies. In addition, the book has been redesigned to be more teachable, practical, and practitioner-friendly. <u>Beehive</u> Routledge This book examines NATO's engagement</p>	<p>with gender issues through its military structures. Drawing on newly declassified NATO documents, this volume provides the first comprehensive account of NATO's long-established engagement with gender issues. These documents bring to the fore the stories of the NATO women and 'gendermen' who have organised within NATO across the decades to advocate on</p>
---	---	--

gender issues and highlights the continued challenges to pursuing transformative agendas within resistant institutions. The book argues that NATO is an institution of international hegemonic masculinity, with gender norms and values learned by member and partner states through socialisation and the engagement of a masculinist protection logic. It therefore provides an

important context for NATO's recent implementation of the Women, Peace and Security agenda encapsulated in UN Security Council Resolution 1325 and the seven follow-up resolutions. The volume interrogates how Women, Peace and Security has mapped on to NATO's pre-existing concerns as a global security actor, providing impetus for further critical knowledge building of

NATO which centres on gender. This book will be of interest to students and scholars of NATO, Critical Military Studies, Gender Studies, Critical Security Studies and IR in general. *An Introduction* Simon and Schuster After her record-breaking two year tree sit, Julia Butterfly Hill has ceaselessly continued her efforts to promote sustainability and

ecologically-minded ways to save the old-growth redwoods she acted so valiantly to protect. Here she provides her many young fans with what they yearn for most -- her advice on how to promote change and improve the health of the planet, distilled into an essential handbook. This book will be accessible to school-aged children, while accomodating the audience of parents and teachers who look to Julia as

an example of how one person can "change the world." Packed with a variety of charts, diagrams, and interesting factoids, the book will be broken down into a series of steps and easy-to-follow lessons. It will be written broadly so as to accommodate all kinds of activism, though its core focus will be on environmental issues. *One Makes the Difference* Simon and Schuster Essentials of

Health Care Marketing, Fourth Edition will provide your students with a foundational knowledge of the principles of marketing and their application in health care. Moreover, the text offers a perspective on how these principles must shift in response to the changing environmental forces that are unique to this market. *Essentials of Health Care Marketing* John Wiley & Sons Happy

Letters to a Young

Feminist John Wiley & Sons
A NEW YORK TIMES

NOTABLE BOOK • The dramatic story of the Flint water crisis, by a relentless physician who stood up to power.

“Stirring . . . [a] blueprint for all those who believe . . . that ‘the world . . . should be full of people raising their voices.’” —The New York Times

“Revealing,

with the gripping intrigue of a Grisham thriller.” —O: The Oprah Magazine
Here is the inspiring story of how Dr. Mona Hanna-Attisha, alongside a team of researchers, parents, friends, and community leaders, discovered that the children of Flint, Michigan, were being exposed to lead in their tap water—and then battled her own government

and a brutal backlash to expose that truth to the world. Paced like a scientific thriller, *What the Eyes Don’t See* reveals how misguided austerity policies, broken democracy, and callous bureaucratic indifference placed an entire city at risk. And at the center of the story is Dr. Mona herself—an immigrant, doctor, scientist, and mother whose family’s activist roots

inspired her pursuit of justice. What the Eyes Don't See is a riveting account of a shameful disaster that became a tale of hope, the story of a city on the ropes that came together to fight for justice, self-determination, and the right to build a better world for their—and all of our—children. Praise for What the Eyes Don't See “It is one thing to point out a problem. It is another thing altogether to

step up and work to fix it. Mona Hanna-Attisha is a true American hero.”—Erin Brockovich “A clarion call to live a life of purpose.”—The Washington Post “Gripping . . . entertaining . . . Her book has power precisely because she takes the events she recounts so personally. . . . Moral outrage present on every page.”—The New York Times Book Review “Personal and emotional. . . She vividly

describes the effects of lead poisoning on her young patients. . . . She is at her best when recounting the detective work she undertook after a tip-off about lead levels from a friend. . . . ‘Flint will not be defined by this crisis,’ vows Ms. Hanna-Attisha.”—The Economist “Flint is a public health disaster. But it was Dr. Mona, this caring, tough pediatrican turned detective, who cracked the case.”—Rache
