"This handbook supports the quality auditor Body of Knowledge (BoK), developed for the ASQ Certified Quality Auditor (CQA) program. This edition addresses new and expanded BoK topics, common auditing (quality, environmental, safety, and so on) methods, and process auditing. It is designed to provide practical guidance for system and process auditors. Practitioners in the field provided content, example audit situations, stories, and review comments as the handbook evolved. New to the edition are the topics of common and special causes, outliers, and risk management tools. Besides the new topics, many current topics have been expanded to reflect changes in auditing practices since 2004 and ISO 19011 guidance, and they have been rewritten to promote the common elements of all types of system and process audits. The handbook can be used by new auditors

to gain an understanding of auditing. Experienced auditors will find it to be a useful reference. Audit managers and quality managers can use the handbook as a guide for leading their auditing programs. The handbook may also be used by trainers and educators as source material for teaching the fundamentals of auditing"--

This anthology presents the results of a comprehensive empirical study of internal control evaluation and auditor judgment initiated by Peat, Marwick, Mitchell & Co. in 1977 and originally published as an American Institute of CPAs research monograph in 1981. The research consisted of a series of five field experiments and a related verbal protocol study. The experimental task involved audit program planning given a comprehensive set of audit work-papers. The AICPA monograph was awarded the American Accounting Association Wildman Award in 1982. The anthology extends the original AICPA

monograph in the following ways: An updated review of the professional literature related to internal control has been integrated into chapter 2. * The original statistical results that were based primarily on univariate analyses have been augmented by multivariate analyses. * The process tracing (verbal protocol) results have been revised to include additional decision process analyses and also to include an analysis of the decision criteria utilized by the auditors. * The summary and implications chapter has been augmented to include the new analyses listed above. In addition, we now discuss how the research was field tested and implemented at Peat Marwick Mitchell & Co. (now KPMG) into a new audit approach designated as "SEADOC"
