International  
commissions and the

power of ideas

Springer

The American institute for contemporary German studies, which sponsors research and discussion on German politics, foreign policy and history since 1945, has compiled this book on the German army and its involvement with NATO, German politics and future strategic alternatives.

Bundeswehr and Western Society Taylor & Francis

Defence diplomacy enhances the diplomatic and security capacity of a state, providing the only link between executive office and the ministries of foreign affairs and defence, three vital institutions in the Long War. Using a case study of US defence diplomacy in Afghanistan from

2001-2014, the paper argues simply that the practice of defence diplomacy far outweighs current theories on what it is, how it works and why it matters?

Policies for Common Security Rowman & Littlefield

First Published in 1992  
Reconstruction and Regional Diplomacy in the Persian Gulf goes beyond a description of the recent events by analysing the social, political, and economic patterns of interaction between the Gulf states. The argument is strengthened by a consideration of the role of the superpowers in the region's political discourse, and of religion as a force for a change. Not only do the authors provide an easily accessible basis

for explaining the current problems in the region, but they also offer their own, sometimes provocative policy prescriptions. This book is an important read for scholars and researchers of Middle East politics and Middle East history.

Elusive Security

Springer

First published in 2004, this work is based on a collaborative research project, this trilogy considers the dynamics of demilitarisation and peace-building in southern Africa in the aftermath of major violent conflicts. The overall aim of the research is to support and facilitate the achievement of sustainable peace and human development in southern Africa, by

analysing demilitarisation and peace-building processes in the region and identifying policy options and interventions for peace-building. The central focus of the research is the extent to which demilitarisation following the termination of wars has contributed to broad processes of peace-building in the affected region. Has the military in southern Africa downsized and refocused towards new roles? Has there been a 'peace-dividend', allowing more investment in economic and human development, thereby dealing with some of the root causes of conflict? Volume I provides a conceptual framework for the

analysis of demilitarisation and peace-building processes, applicable particularly in the southern Africa context. This volume argues that a broad concept of peace-building has to take into account economic, political, social and cultural factors, at the local, national and regional level.

*National, International, and Human Security*  
Springer

This reader brings together key contributions from many of the leading scholars in the field, offering students an informed overview of the most significant work in security studies. The editors chart the development of the key theoretical and empirical debates in security studies in

the Cold War and post-Cold War periods, introducing the ideas of the most influential 'past masters' and contemporary thinkers on security in the UK, US and elsewhere. The book is divided into five areas: What is Security? Security Paradigms Security Dimensions and Issues Security Frameworks and Actors The Future of Security. In order to guide students through the issues, the book has a substantial critical introduction exploring the development of security studies, as well as introductory essays that provide an overview of each section, highlighting clearly how the readings fit together. Suggestions for further reading and key questions for

discussion are also included. Security Studies is an invaluable resource for all students of security studies and international relations.

**Emerging Technologies and Military Doctrine**

Routledge

This clear and concise text offers a comprehensive comparison of national, international, and human security concepts and policies. Laura Neack argues that security remains elusive because of a centuries-old ethic insisting that states are the primary and most important international actors, can rely ultimately only on themselves for protection, and must keep all options on the table for national security. The author

compellingly demonstrates how a state-first security ethic ultimately fails to secure states, the international community and--most important--human beings. Although security as a concept can be widened to include almost any aspect of existence, Neack focuses especially on security from physical violence, beginning with efforts by states to defend themselves against violent attack. She explores such topics as the internal and external dimensions of security, terrorism, and defending the homeland; threat perception and responses; preemptive and preventive wars; and other military interventions. Next, Neack examines efforts

over the past century to protect states through the construction of the United Nations international security system and how collective security, peacekeeping, and peace enforcement have been used in that system. Throughout, Neack shows that human security has only mattered in terms of servicing the state's security needs, a critique she takes up directly in the final chapters. A range of short and extended case studies are offered to illustrate the conceptual materials and policy debates over security. In this state-first world, we only can choose between degrees of insecurity; true security remains elusive.

*Demilitarisation and Peace-Building in Southern Africa*  
 Bloomsbury Publishing  
 Routledge Library Editions: Peace Studies (12 Volume set)  
 contains titles, originally published between 1928 and 1985. Looking at peace movements and the people involved in them around the world, who seek to learn lessons from war and find solutions to a peaceful existence. It includes titles from a number of well-known pacifists, both pre- and post-war who have influenced ideas and policy throughout the twentieth century.  
In Defense Of Nato  
 Lancer Publishers  
 An examination of nuclear arms control and defence containing papers that present opposing sides of the

debate. Nuclear deterrence, Britain's defence budget, the state of Anglo-American relations, NATO strategies and Mr Gorbachev's security arrangements in Europe proposals are discussed.

Towards a Peace Economy in the United States Rowman & Littlefield

Integrating theory and case studies, this cogent text explores the processes and factors that shape foreign policy. Following a levels-of-analysis organization, Neack considers all elements that influence foreign policy, including the role of leaders, bargaining, national image, political culture, public opinion, the media, and nonstate actors.

**Common Security and Non-provocative Defence** Rowman & Littlefield

Published in 1997, the work explores the reorientation of security policies and the accompanying restructuring of the armed forces going on in Southern Africa under entirely new circumstances: Democracy has come to South Africa, the civil wars in Angola and Mozambique have ended, and the region is establishing a regional framework for cooperation. While covering the entire region, a special focus is placed on South Africa which is predestined to play a leading role, but which is struggling with the legacy of the apartheid regime and its repeated aggressions

against neighbouring states. A defensive restructuring of the South African of the South African military is an element in the building of mutual trust. The implications of such defensive restructuring to a non-offensive defence are described in detail. In addition to the analytical contribution, the work also contains central documents and a bibliography.

**NATO Rules of Engagement** New York : United Nations, Department for Disarmament Affairs  
A review of the full range of recent official and non-official schemes for improving NATO's conventional posture, from exploitation of emerging technologies to non-provocative defences, in the light of

prevailing military, political, economic and demographic trends.

**Disarmament**

**Possibilities** Cornell University Press

This book examines the viability of non-provocative defence - the controversial idea that defensive military policies and practices reduce the risk of wars and provide a viable basis for defending a society should war break out. Drawing on case studies from Europe, the 1991 Persian Gulf War, and Asia-Pacific, the author concludes that non-provocative defence concepts remain relevant and that they can help in deterring, conducting, and settling wars.

**Reconstruction and Regional Diplomacy in the Persian Gulf**

Routledge

The essays in this volume consider the nature of the war economy and the possibilities for change that the relaxation of the Cold War presents. They ask what the effects of a security policy of substantial disarmament on the economy and political climate of the USA might be.

*Strategic Power*

Routledge

Jonathan Dean (1924-2014) was a distinguished U.S. diplomat (1950-1980) and from 1984 to 2007 global security adviser to the Union of Concerned Scientists, Washington, D.C. During the 1980s and 1990s he was a pioneering conceptual thinker, writer and speaker on détente in Europe, global cooperative security,

arms control and disarmament. He authored: Watershed in Europe (1987), Meeting Gorbachev's Challenge (1989) and Ending Europe's Wars (1994). This volume contains his biography and bibliography, six texts on détente and arms control in Europe in the 1980s: Beyond First Use; MBFR; Alternative Defence; Berlin; A Crisis Management Center; Conventional Arms Control in Europe and six texts on the new security order in Europe since the 1990s: Components of a Post-Cold War Security System for Europe; Constraining Technological Weapons Innovation; NATO Enlargement: Act II; Ten Years after the Wall; Future Security in Space; Rethinking Security: Return to the

Grotean Pattern.

Security Studies ECPR Press

The second edition of this widely acclaimed book takes as its main theme the question of how states and societies pursue freedom from threat in an environment in which competitive relations are inescapable across the political, economic, military, societal and environmental landscapes.

Throughout, attention is placed on the interplay of threats and vulnerabilities, the policy consequences of overemphasizing one or the other, and the existence of contradictions within and between ideas about security. Barry Buzan argues that the concept of security is a versatile, penetrating

and useful way to approach the study of international relations. Security provides an analytical framework which stands between the extremes of power and peace, incorporates most of their insights and adds more of its own.

*ASEAN-U.S. Relations*  
Springer

This book highlights the impact and relevance of "strategic culture". Each section contains essays contrasting United States and Soviet perceptions on specific topics. Each section closes with a synthesizing commentary, to help readers to get a better sense of differences and similarities.

**Constructing Global Order** Routledge

This book is about the strategic importance of

NATO-Europe and why Western Europe should continue to remain the primary geographic area of importance in U.S. national security planning. It argues that making fundamental changes in U.S. security commitment to Europe would not be in U.S. interests.

Defending Europe

Springer

The Bulletin of the Atomic Scientists is the premier public resource on scientific and technological developments that impact global security. Founded by Manhattan Project Scientists, the Bulletin's iconic "Doomsday Clock" stimulates solutions for a safer world.

Rethinking Power, Institutions and Ideas in World Politics

Springer

To remove the threat of nuclear annihilation changes in attitudes are required, such as the acceptance of the concept of common security to take the place of reliance on nuclear deterrence to keep the peace. This book gives an insight into thinking about ways to deal with the crisis.

An Introduction to Strategic Studies

Routledge

In NATO Rules of Engagement, Camilla Guldahl Cooper provides a thorough analysis of NATO rules of engagement, and offers clarity on a concept which despite its considerable political, strategic and operational importance, is often misunderstood.
