 A growing number of art therapists are also trained in group analytic psychotherapy. This book explores the new theories and models for practice arising from the merging of these two disciplines. Contributors ask whether a model can be applied universally to art therapy group work with diverse client groups. They present in-depth case studies looking at work with the following:- * children * drug and alcohol abusers * forensic patients * patients on acute psychiatric wards * the cognitively-impaired elderly * institutionalised patients moving into the community A common theme which emerges is that the physical use of art materials and the space of the art room offer a possibility for communication of feelings which is not possible in purely verbal groups. This allows

clients who would not normally be considered for group therapy to benefit from a psychodynamic group process.

Group Work SAGE

Group Counseling in the School and Clinic offers a comprehensive introduction on how to lead task, psychoeducational, counseling, and psychotherapy groups from a systemic, theoretically integrative perspective. Giving significant attention to pro-developmental leader and member roles, multicultural applications, outcome research, and accountability in group work, this text goes far beyond the traditional focus on only counseling and psychotherapy. The effective preparation of group leaders has become increasingly more important in recent years due to managed care and educational reform movements, and *Group Counseling in the School and Clinic* emphasizes the systemic approach to group work; that is, preparing group leaders to facilitate the systemic group process, from planning the group through the four stages of group work: forming and orienting, transition, working, and termination. Showing students how to master the facilitation of these defined stages of group work allows them to effectively work with clients in all types of

group contexts and topics, and from a theoretically integrative perspective. Throughout the book, readers are exposed to the foundations of group work by exploring the historical forces that shaped group work today, the therapeutic factors that underlie effective group approaches, and the advantages and disadvantages of group work. Students will build a foundation of multicultural, ethical and legal group work attitudes, and knowledge and skills before learning to distinguish the roles of group members and group leaders. While many comparable texts portray group member roles from a negative or destructive perspective, this text looks at the pro-developmental needs of group members with a focus on helping members to appropriately self-disclose and give and receive feedback to enhance the therapeutic value of the group experience. Leader skills are emphasized early in the text to help students understand and master the role of the leader as a facilitator of group process and techniques that group leaders find helpful in keeping groups moving in a positive direction.

Group Exercises for Addiction Counseling Routledge

The authors present a thorough discussion of the rationale for using group counseling with an emphasis on the group's role as a preventive environment and as a setting for self-discovery. They examine the group facilitator's internal frame of reference and ways to overcome initial anxiety about leading groups, and they also explore typical problems in the development, facilitation, and termination of the group process and provide suggested solutions. Individual chapters are included to explore the application of group counseling with children and adolescents. Notable additions include: an expanded chapter on diversity and social justice in group work; an expanded chapter on co-leadership, a topic often ignored in other group counseling texts; a new chapter on ethics and leadership training; a reworked chapter on leader functions, styles, and skills; and a reworking of the chapter on group counseling with children that includes an in-depth look at Landreth's innovative and empirically validated Child-Parent-Relationship Therapy.
