How has the regulation of business shifted from national to global institutions? What are the mechanisms of globalization? Who are the key actors? What of democratic sovereignty? In which cases has globalization been successfully resisted? These questions are confronted across an amazing sweep of the critical areas of business regulation--from contract, intellectual property and corporations law, to trade, telecommunications, labor standards, drugs, food, transport and environment. This book examines the role played by global institutions such as the World Trade Organization, World Health Organization, the OECD, IMF, Moodys and the World Bank, as well as various NGOs and significant individuals. Incorporating both history and analysis, Global Business Regulation will become the standard reference for readers in business, law, politics, and international relations.

Essential Readings in Canadian Constitutional Politics introduces students, scholars, and practitioners to classic authors and writings on the principles of the Canadian Constitution as well as to select contemporary material. To complement rather than duplicate the state of the field, it deals with the Canadian Charter of Rights and Freedoms and with Canadian mega-constitutional politics in passing only, focusing instead on institutions, federalism, intergovernmental relations, bilingualism and binationalism, the judiciary, minority rights, and constitutional renewal. Many of the selections reverberate well beyond Canada's borders, making this volume an unrivalled resource for anyone interested in constitutional governance and democratic politics in diverse societies.

The Law of Hockey John Wiley & Sons

The book focusses on the enforcement of consumer law in order to identify commonalities and best practices across nations. It is composed of twenty-eight contributions from national rapporteurs to the IACL Congress in Montevideo in 2016 and the introductory comparative general report. The national contributors are drawn from across the globe, with representation from Africa (1), Asia (5), Europe (15), Oceania (2) and the Americas (5). The general report proposes a general introduction to the question of enforcement and effectiveness of consumer law. It then proceeds to identify the variety of ways in which national legislatures approach this question and the diversity of mechanisms put in place to address it. The general report uses examples drawn from the reports to illustrate common approaches and to identify more original or distinct unique approaches, taking into account the reported strengths and weaknesses of each. The general report consistently points readers to particular national reports on specific issues, inviting readers to consult these individual contributions for more details. The national contributions deal with the following areas: the national legal framework for consumer protection, the general design of the enforcement mechanism, the number and characteristics of consumer complaints and disputes,

the use of courts and specialized agencies for the enforcement of consumer law, the role of consumer organizations and of private regulation in the enforcement of consumer law, the place of collective redress mechanism and of alternative dispute resolution modes, the sanctions for breaches of consumer law and the nature of external relations or cooperation with other countries or international organizations. These enriching national and international perspectives offer a comprehensive overview of the current state of consumer law around the globe.

This open access book discusses the socio-political context of the COVID-19 crisis and questions the management of the pandemic emergency with special reference to how this affected the governance of migration and asylum. The book offers critical insights on the impact of the pandemic on migrant workers in different world regions including North America, Europe and Asia. The book addresses several categories of migrants including medical staff, farm labourers, construction workers, care and domestic workers and international students. It looks at border closures for non-citizens, disruption for temporary migrants as well as at special arrangements made for essential (migrant) workers such as doctors or nurses as well as farmworkers, 'shipped' to destination with special flights to make sure emergency wards are staffed, and harvests are picked up and the food processing chain continues to function. The book illustrates how the pandemic forces us to rethink notions like membership, citizenship, belonging, but also solidarity, human rights, community, essential services or 'essential' workers alongside an intersectional perspective including ethnicity, gender and race.

Scores of talented and dedicated people serve the forensic science community, performing vitally important work. However, they are often constrained by lack of adequate resources, sound policies, and national support. It is clear that change and advancements, both systematic and scientific, are needed in a number of forensic science disciplines to ensure the reliability of work, establish enforceable standards, and promote best practices with consistent application. Strengthening Forensic Science in the United States: A Path Forward provides a detailed plan for addressing these needs and suggests the creation of a new government entity, the National Institute of Forensic Science, to establish and enforce standards within the forensic science community. The benefits of improving and regulating the forensic science disciplines are clear: assisting law enforcement officials, enhancing homeland security, and reducing the risk of wrongful conviction and exoneration. Strengthening Forensic Science in the United States gives a full account of what is needed to advance the forensic science disciplines, including upgrading of systems and organizational structures, better training, widespread adoption of uniform and enforceable best practices, and mandatory certification and accreditation programs. While this book provides an essential call-to-action for congress and policy makers, it also serves as a vital tool for law enforcement agencies, criminal prosecutors and attorneys, and forensic science educators.

It opens with two Canadian scholars exchanging thoughts on the legacy of the reference from a domestic perspective as one of the most questioned decisions of the Canadian Supreme Court. To follow, non-Canadian scholars discuss the impact of this reference abroad, reflecting upon its influence in European and non-European contexts (Spain, Scotland, the EU after Brexit, Eastern European Countries, Ethiopia, and Asia). Two final chapters, one by a lawyer and one by a political scientist, explore the democratic theory behind that reference.
