The Tibetan Buddhist practice of Nyungne ("nyoong-nay") has been gaining increased attention in Buddhist centers across North America. Participants say the practice purifies them both physically and spiritually. This volume is the only comprehensive treatment in English of these powerful teachings. Nyungne is a profound, two-and-a-half-day practice, a length of time especially helpful for people whose schedules cannot accommodate long-term retreat. It involves the keeping of strict vows; the second day is devoted to complete silence and fasting. The meditation centers on the recitations, mantras, and guided visualizations of the Thousand-Armed Chenrezig, the embodiment of all the buddhas' loving-kindness and compassion. Translated as "abiding in the fast," Nyungne is said to be effective in the healing of illness, the nurturing of compassion, and the purification of negative karma.

The Berlin newspaper Der Angriff (The Attack), founded by Joseph Goebbels in 1927, was a significant instrument for arousing support for Nazi ideas. Berlin was the center of the political life of the Weimar Republic, and Goebbels became an actor upon this frenetic stage in 1926, becoming Gauleiter of Berlin's Nazis. Focusing on the period from 1927 to 1933, a time the Nazis later called "the blood years," Russel Lemmons examines how Der Angriff was used to promote support for Nazism. Some of the most important propaganda motifs of the Third Reich first appeared in the pages of Der Angriff. Horst Wessel, murdered by the German Communist Party in 1930, became the archetypal Nazi hero; much of his legend began on the pages of Der Angriff. Other Nazi propaganda

themes—the "Unknown SA man" and the "myth of resurrection and return"—made their first appearances in this newspaper. How could the Germans, seemingly among the most cultured people in Europe, hand over their fate to the Nazis? As this book demonstrates, Der Angriff had much to do with the rise of National Socialism in Berlin and the cataclysmic results.

The first book to help organizations understand and harness the extraordinary workplace learning potential of social media Cowritten by the CEO of the world's largest workplace learning organization and a consultant and writer with extensive experience on the forefront of workplace learning technology Features case studies showing how organizations around the world have transformed their businesses through social media Most business books on social media have focused on using it as a marketing tool. Many employers see it as simply a workplace distraction. But social media has the potential to revolutionize workplace learning. People have always learned best from one another -- social media enables this to happen unrestricted by physical location and in extraordinarily creative ways. The New Social Learning is the most authoritative guide available to leveraging these powerful new technologies. Tony Bingham and Marcia Conner explain why social media is the ideal solution to some of the most pressing educational challenges organizations face today, such as a widely dispersed workforce and striking differences in learning styles, particularly across generations. They definitively answer common objections to using social media as a training tool and show how to win over even the most resistant employees. Then, using examples from a wide range of organizations -- including Deloitte, IBM, TELUS, and others -- Bingham and Conner help readers sort through the dizzying array of technological options available and decide when and how to use each one to achieve key strategic goals. Social media technologies -- everything from 140-character "microsharing" messages to media-rich online communities to complete virtual environments and more -- enable people to connect, collaborate, and innovate on levels never before dreamed of. They make learning dramatically more dynamic, stimulating, enjoyable, and effective. This greatly anticipated book helps organizations create a contemporary learning strategy that is as timely as it is transformative.

The Social Media Handbook explores how social media are changing disciplinary understandings of the internet and our everyday lives. In addition to person-to-person social networking services like Facebook and Twitter, this volume considers a broad range of networked information services that support in-depth social interaction, community formation, and collaboration in the Web 2.0 era. Rather than considering social media in terms of specific technologies, the chapters in this book engage topics across a range of research, techniques, practices, culture and society, and theories. These broader topics—including community, gender, fandom, disability, and journalism—are entryways through which students and faculty can explore ways of thinking about social media and find new paradigms for analysis.
