The history of paint and color in interior design, spanning a period of three centuries Why were primary colors popular in postwar kitchens? Why did the Art Deco era prefer clean lines and pastel shades? This comprehensive illustrated history of the use of color and paint in interior decoration answers these questions and many more. Drawing on his huge specialist archive, historian and paint expert Patrick Baty traces the evolution of pigments and paint colors together with color systems and standards, and he examines their impact on the color palettes used in interiors from the 1650s to the 1960s. He charts the creation in paint of the common and expensive colors made from traditional earth pigments between 1650 and 1799. He then explores the emergence of color systems and standards and their influence on paint colors together with the effect of industrialized production on the texture and durability of paints. Finally, Baty turns his attention to twentieth-century color standards. Woven throughout the authoritative and revealing text are specially commissioned photographs of pages from rare color reference books.

Reproductions of interiors from home decor books, dating from every era, are included throughout, highlighting the distinctive color trends and styles of painting particular to each period.

New Theory of Beauty Rowman & Littlefield

The New York Times best-selling author's time-travel classic that makes us feel the horrors of American slavery and indicts our country's lack of progress on racial reconciliation The series adaption from FX premieres December 13 on Hulu. Developed for television by writer/executive producer Branden Jacobs-Jenkins (Watchmen), executive producers also include Joe Weisberg and Joel Fields (The Americans, The Patient), and Darren Aronofsky (The Whale). Janicza Bravo (Zola) is director and an executive producer of the pilot. Kindred stars Mallori Johnson, Micah Stock, Ryan Kwanten, and Gayle Rankin. "I lost an arm on my last trip home. My left arm." Dana's torment begins when she suddenly vanishes on her 26th birthday from California, 1976, and is dragged through time to antebellum Maryland to rescue a boy named Rufus, heir to a slaveowner's plantation. She soon realizes the purpose of her summons to the past: protect Rufus to ensure his assault of her Black ancestor so that she may one day be born. As she endures the traumas of slavery and the soul-crushing normalization of savagery, Dana fights to keep her autonomy and return to the present. Blazing the trail for neo-slavery narratives like Colson Whitehead's The Underground Railroad and Ta-Nehisi Coates's The Water Dancer, Butler takes one of speculative fiction's oldest tropes and infuses it with lasting depth and power. Dana not only experiences the cruelties of slavery on her skin but also grimly learns to accept it as a condition of her own existence in the present. "Where stories about American slavery are often gratuitous, reducing its horror to explicit violence and brutality, Kindred is controlled and precise" (New York Times).

The Magic Eye, Volume I Abrams

A history of color and commerce from haute couture to automobile showrooms to interior design. When the fashion industry declares that lime green is the new black, or instructs us to "think pink!," it is not the result of a backroom deal forged by a secretive cabal of fashion journalists, designers, manufacturers, and the editor of Vogue. It is the latest development of a color revolution that has been unfolding for more than a century. In this book, the award-winning historian Regina Lee Blaszczyk traces the relationship of color and commerce, from haute couture to automobile showrooms to interior design, describing the often unrecognized role of the color profession in consumer culture. Blaszczyk examines the evolution of the color profession from 1850 to 1970, telling the stories of innovators who managed the color cornucopia that modern artificial dyes and pigments made possible. These "color stylists," "color forecasters," and "color engineers" helped corporations understand the art of illusion and the psychology of color. Blaszczyk describes the strategic burst of color that took place in the 1920s, when General Motors introduced a bright blue sedan to compete with Ford's all-black Model T and when housewares became available in a range of brilliant hues. She explains the process of color forecasting—not a conspiracy to manipulate hapless consumers but a careful reading of cultural trends and consumer taste. And she shows how color information flowed from the fashion houses of Paris to textile mills in New Jersey. Today professional colorists are part of

design management teams at such global corporations as Hilton, Disney, and Toyota. The Color Revolution tells the history of how colorists help industry capture the hearts and dollars of consumers.

This compelling biography draws on interviews, letters, and Morgan's diaries, including never-before-seen reflections on faith, art, and her life experiences. Ever since the eighteenth century, when Kant opened the floodgates of subjectivism in aesthetics, common men and

philosophers alike have despaired of finding a basis for judgments about beauty. This book provides a comprehensive theory that encompasses beauty in art and nature, as well as intellectual, utilitarian, and moral beauty. The author argues that the beauty of objects can be reduced to the beauty of properties of those objects, which in turn can be understood in terms of "properties of qualitative degree." The theory, developed first with respect to color, is then extended to include all sensory and non-sensory qualities. The author shows how the theory explicates and resolves disagreements about what is beautiful and discusses its relevance to the traditional notions of harmony and sublimity. His is an objectivist theory of beauty, and it enables him, in conclusion, to demonstrate why we enjoy perceiving beauty. Originally published in 1975.
