*Indian Sociological Thought* S. Chand Publishing

It is through the contributions of the pioneering scholars that not only a particular discipline derives its name but also the foundations on which a particular discipline is built and grows. G.S. Ghurye (1893–1983), Radhakamal Mukerjee (1889–1968), D.P. Mukerji (1894–1961) and M.N. Srinivas (1916–1999) are known as the pioneers of sociology in India. It is mainly on them and on their contributions that the contemporary sociologists in India have extensively published in the issues of the Sociological Bulletin. Volume 10, *Pioneers of Sociology in India*, contains a selection of papers that have been published since 1977 on these founding fathers of Sociology in India.

Pierre Bourdieu has been making a distinguished contribution to European sociology for the past 25 years. He is Professor of Sociology at the Collge de

France in Paris and author of many influential books including, most recently, *Distinction* and *Homo Academicus*, which have both been translated into English. This book serves to introduce this important body of work to the Anglo-American world. In a cross-disciplinary collaboration Richard Harker, Cheleen Mahar and Chris Wilkes provide the reader with the necessary tools to understand this complex and rewarding body of French sociology. Post modernist sociology has already been influenced by the French theorist Foucault; it is likely that the generation to come will be reading Bourdieu.

*How to Explain the World Without*

*Becoming a Bore* S. Chand Publishing

HOW DO POLITICIANS IN TODAY'S world attain power? How do nations become powerful? Why do human beings follow others unquestioningly, even if it is to their own detriment? What factors determine which politicians, nations and organizations will dominate the modern world? Through much of human history, societal control was determined by militaristic strength. Individuals and tribes fought to control vital resources and land. In the next part of evolution marked by colonialism and the emergence of mega-corporations, money determined power. In the recent decade, the key to supremacy has shifted again. The power and control

individuals, leaders and nations have is now determined by their ability to mould the information environment. In *The Art of Conjuring Alternate Realities*, Shivam Shankar Singh and Anand Venkatanarayanan dive into the operations of political parties, cyber criminals, godmen, nation states and intelligence agencies from around the world to explain how the power to manipulate your thoughts is being harnessed, and how information warfare is shaping your life and world.

Social Problems in India S. Chand Publishing

This book proposes a new representation of Emile Durkheim, as the philosopher and moralist who wanted to renovate rationalism, challenge positivism, reform sociology, and extend Schopenhauer's philosophy to the new domain of sociology. Above all, it highlights Durkheim's vision of sociology as the 'science of morality' that would eventually replace moralities based on religion.

**Sociology in Action** Xlibris Corporation Peter L. Berger is arguably the best-known American sociologist living today. Since the 1960s he has been publishing books on many facets of the American social scene, and several are now considered classics. So it may be hard to believe Professor Berger's description of himself as an "accidental sociologist."

But that in fact accurately describes how he stumbled into sociology. In this witty, intellectually stimulating memoir, Berger explains not only how he became a social scientist, but the many adventures that this calling has led to. Rather than writing an autobiography, he focuses on the main intellectual issues that motivated his work and the various people and situations he encountered in the course of his career. Full of memorable vignettes and colorful characters depicted in a lively narrative often laced with humor, Berger's memoir conveys the excitement that a study of social life can bring. The first part of the book describes Berger's initiation into sociology through the New School for Social Research, "a European enclave in the midst of Greenwich Village bohemia." Berger was first a student at the New School and later a young professor amidst a clique of like-minded individuals. There he published *The Social Construction of Reality* (with colleague Thomas Luckmann), one of his most successful books, followed by *The Sacred Canopy* on the sociology of religion, also still widely cited. The book covers Berger's experience as a "globetrekking sociologist" including trips to Mexico, where he studied approaches to Third World poverty; to East Asia, where he discovered the potential of capitalism to improve social conditions; and to South Africa, where he chaired an international study group on the future of post-Apartheid society. Berger then tells about his role as the director of a research center at Boston University. For over two decades he and his colleagues have been tackling such important issues as globalization, the secularization of Europe, and the ongoing dialectic between relativism and fundamentalism in contemporary

culture. What comes across throughout is Berger's boundless curiosity with the many ways in which people interact in society. This book offers longtime Berger readers as well as newcomers to sociology proof that the sociologist's attempt to explain the world is anything but boring.
