Discovered in the attic in which she spent the last years of her life, Anne Frank's remarkable diary has since become a world classic—a powerful reminder of the horrors of war and an eloquent testament to the human spirit. "The single most compelling personal account of the Holocaust ... remains astonishing and excruciating."—The New York Times Book Review In 1942, with Nazis occupying Holland, a thirteen-year-old Jewish girl and her family fled their home in Amsterdam and went into hiding. For the next two years, until their whereabouts were betrayed to the Gestapo, they and another family lived cloistered in the "Secret Annex" of an old office building. Cut off from the outside world, they faced hunger, boredom, the constant cruelties of living in confined quarters, and the ever-present threat of discovery and death. In her diary Anne Frank recorded vivid impressions of her experiences during this period. By turns thoughtful, moving, and amusing, her account offers a fascinating commentary on human courage and frailty and a compelling

self-portrait of a sensitive and spirited young woman whose promise was tragically cut short.

Due to a constantly high population growth of India's sixth largest metropolis Hyderabad, a strongly growing middle-class and the subsequent rise of traffic and motorised vehicles in particular, sustainable solutions are needed to secure daily routines. For up to 50 % of the - predominantly poor - population, walking is crucial for everyday life. There is a tendency towards suburbanisation, still, for many people living in the city's central areas even low fares for busses or rickshaws are often not affordable. Additionally, the high level of air pollution poses a risk for people's health. This paper presents the action research conducted in 2009 (Citizens' Exhibition, expert workshop and online-dialogue). It analyses the degree of participation at different levels and evaluates the participative tools and methods used. It explains the most important problems in the field of traffic and transport from the citizens' point of view on the local level and gives an outlook on the problems and tasks at the city level. The analysis shows that the situation of pedestrians can be seen as one of the most important problems in the field of traffic and transport: a high rate of fatal

accidents in which pedestrians lose their lives. Also missing or unattractive footpaths lead to a high probability of switching over to motorised transport modes by those pedestrians who cannot afford it and to the marginalisation of those who cannot afford it. At the same time the topic bears good opportunities to come up with low-tech, cost effective and at the same time highly efficient solutions in terms of CO2 reduction. Although for the reason that the topic is not on the top list of the political agenda, there is a civil movement to push it forward and forcefully improve mobility and quality of life.

In July 1923, less than three years after Westinghouse station KDKA signed on, company engineer Frank Conrad began regular simulcasting of its programs on a frequency in the newly-discovered shortwave range. It was an important event in a technological revolution that would make dependable worldwide radio communication possible for the first time. In subsequent years, countless stations in practically all countries followed suit, taking to shortwave to extend reception domestically or reach audiences thousands of miles away. Shortwave broadcasting would also have an important role in World War II and in the Cold War. In this, his fourth book on shortwave broadcast history, the author revisits the period of his earlier work, *On the Short Waves, 1923-1945*, and focuses on the stations that were on the air in those early days. The year-by-year account chronicles the birth and operation of the large international broadcasters, as well as the numerous smaller stations that were a great attraction to the DXers, or long-distance radio enthusiasts, of the time. With more than 100 illustrations and extensive notes, bibliography and index, the book is also a valuable starting point for further study and research.

Globalization and global equity are built on the premise of peace. The causes of many divisions and tensions in human communities lie in the imagined or real gain of financial or material assets of some elements of the community to be at the expense of others. The global community however lacks clear

definitions and methods of stability, whether political, economic, or social. Digital Bridges: Developing Countries in the Knowledge Economy provides insight into the methods and theories behind the globalization of information technologies.
