Highlighting a wide array of topics such as cyberbullying, predatory crimes, and psychological violence, this book is ideal for criminologists, forensic psychologists, psychiatrists, victim advocates, law enforcement, criminal profilers, crime analysts, therapists, rehabilitation specialists, psychologists, correctional facilities, wardens, government officials, policymakers,

academicians, researchers, and students. A Criminology of War? Routledge This second edition of the Handbook of Victims and Victimology presents a comprehensively revised and updated set of essays, bringing together internationally recognised scholars and practitioners to offer substantial research informed overviews within their specialist fields of investigation. This handbook is divided into five parts, with each part addressing a different theme within victimology: Part I offers a scene-setting exploration of new developments in the field, enduring issues that remain relatively unchanged and the

gaps and traps within the contemporary victimological agenda Part II examines of the complex dimensions to victim experiences as structured by gender, age, ethnicity, sexuality and intersectionality Part III reflects on the problems and possibilities of formulating policy responses in the light of the changing appreciation of the nature and extent of victimhood Part IV focused on the value of a comparative lens and the problems and possibilities of victim policies when seen through this lens, explored along three geographical axes: Europe, Australia and Asia Part V considers other ways of thinking about who counts as a victim and what counts as victimhood and extends the boundaries of the victimological imagination outward Building on the success of the previous edition, this book provides an international focus on cutting-edge issues in the field of victimology. Including brand new chapters on intersectionality, child victims, sexuality, hate crime and crimes of the powerful, this handbook is essential reading for students and academics studying victims and victimology and an essential reference tool for those working within the victim

support environment. *Handbook of Crime Prevention and Community Safety* Routledge *Abusive Endings* offers a thorough analysis of the social-science literature on one of the most significant threats to the health and well-being of women today—abuse at the hands of their male partners. The authors provide a moving description of why and how men abuse women in myriad ways during and after a separation or divorce. The material is punctuated with the stories and voices of both perpetrators and survivors of abuse, as told to the authors over many years of fieldwork. Written in a highly readable fashion, this book will be a useful resource for researchers, practitioners, activists, and policy makers. *Current Issues and Perspectives* Routledge Comprehensive and current, this handbook combines a wide range of international contributors to chart the uneasy relationship between feminism, criminology and victimology. It explores both the historical and contemporary questions posed by feminist work and is essential reading for anyone interested in feminism, criminology and social change.

*The Victim and the Criminal Justice Process* Routledge At the outset of the twenty-first century, more than 9 million people are held in custody in over 200 countries around the world. --from the essay "Prisons and Jails" by Ron King The first comparative study of this increasingly integral social subject, *International Handbook of Penology and Criminal Justice* provides a comprehensive and balanced review of the philosophy and practicality of punishment. Drawn from the expertise of scholars and researchers from around the world, this book covers the theory, practice, history, and empirical evidence surrounding crime prevention, identification, retribution, and incarceration. It analyzes the efficacy of both traditional methods and thinking as well as novel concepts and approaches. Beginning with a study of the changing attitude of penal practice in Florida from one of offender transformation to one of risk-management, imprisonment, surveillance, and control, this volume embarks on an objective and sober appraisal of every aspect of the field. Contributions consider the sociology of incarcerated prisoners including the

increasing prevalence of prison suicides. The book evaluates arguments regarding the world-wide abolition of capital punishment from moral, utilitarian, and practical positions. It examines non-incarcerative and alternative punishments such as financial restoration and restrictions of liberty, as well as the positive effects of Victim Offender Mediation. It also considers several methods aimed at achieving measurable crime prevention including identifying at-risk juveniles and minimizing crimes of opportunity, as well as the pros and cons of employing the coercive power of police. Further essays consider subjects such as international policing, the roles of prosecution and defense attorneys, current discretionary sentencing practices, and the role and treatment of victims. The volume concludes with two chapters of case studies that provide a "hands-on" feel for the interplay of the concepts discussed. This volume is the first in a three-part trilogy. With the academic study of 'war' gaining renewed popularity within criminology in recent years, this book illustrates the long-standing engagement with this social phenomenon within the discipline. Foregrounding established criminological work addressing war and connecting it to a wide range of extant sociological literature, the authors present and further develop theoretical and conceptual ways of thinking critically about war. Within this book, whilst providing an implicit critique of mainstream criminology the authors seek to question if a 'criminology of war' is possible, and if so how this seemingly 'new horizon' of the discipline might be usefully informed by sociology.

Dynamically written and richly illustrated, the *Routledge International Handbook of Visual Criminology* offers the first foundational primer on visual criminology. Spanning a variety of media and visual modes, this volume assembles established researchers whose work is essential to understanding the role of the visual in criminology and emergent thinkers whose work is taking visual criminology in new

directions. This book includes a vibrant colour plate section and over a hundred black and white images, breaking down the barriers between original photography and artwork, historic

paintings and illustrations and modern comics and films. This interdisciplinary book will be of interest to criminologists, sociologists, visual ethnographers, art historians and those engaged with media studies.

Over the last thirty years, victims of crime have become a staple topic of media interest and policy-making discourse. Drawing on an extensive programme of first-hand empirical data gathered at some 300 English criminal trials, this book examines the practical outcomes of this reform agenda and assesses the meaning, implications and impact of the government's pledge to put victims 'at the heart' of the criminal justice system. The study also draws on in-depth interviews with barristers and solicitors, as well as court administrators and other Local Criminal Justice Board members. The book delves into the policy-making process behind these reforms, based on interviews conducted at key government departments, and offers a model for what a genuinely 'victim centred' criminal justice system might look like in the

twenty-first century, drawing on the psychological and sociological literature on narrative responses to traumatic events.

Victims of crime may experience a wide variety of traumas that result in physical, sexual, financial, psychological, emotional, and/or social consequences. While the types of trauma can vary greatly and include lesser-known forms such as vicarious and secondary trauma, identifying and recognizing victims can be complicated. Throughout this book, experts and professionals from academia and the fields of criminal justice, social work, and mental health acknowledge victims historically overlooked by society, political movements, the media, and/or the criminal justice system - we

acknowledge the invisible victims. *Invisible Victims and the Pursuit of Justice:*

*Analyzing Frequently Victimized Yet Rarely Discussed Populations* pioneers the

assertion that our view of victims needs to be more inclusive by exploring invisible victims that are rarely, if ever, a focus of discussions in traditional victimology textbooks. To educate the reader and begin working toward positive change, each chapter identifies an invisible victim and provides the background,

controversies, issues, solutions, and areas of future research. It is crucial to identify these gaps in the field as some of the most victimized populations remain absent from important dialogue on crime victims. This book is appropriate for a wide range of readership including but not limited to criminologists, victim service providers, psychologists, sociologists, social workers, advocate groups, law enforcement, lawyers, defense attorneys, criminal justice practitioners, academicians, researchers, and students studying criminology, criminal justice, victimology, social work, psychology, and social justice.
