Cambridge Primary Science Stage 3 Teacher's Resource Bantam
The "Heinemann Science Scheme" offers an approach to the QCA's Scheme of Work. Teacher's resource packs provide support with lesson planning, with each chapter matching the Scheme of Work, and in-built assessment.
Cambridge Primary

Science Stage 5 Activity Book Cambridge University Press

This book is an invaluable resource for teaching primary science for the National Curriculum, and the QCA Scheme of Work, and the Scottish 5-14 Guidelines for Environmental Studies - Science. It covers all the main requirements and provides:

Lower Secondary Science Student's Book: Stage 8
(Collins Cambridge Lower Secondary Science)

Heinemann

What do I need to know about science to teach children in primary school? How can I make my science teaching successful? How do children learn to investigate scientifically? What are the dos and don'ts of science teaching? Written to support teachers who need to boost their science knowledge, this book covers science knowledge in sufficient breadth and depth to enable you to teach science effectively up to the end of Key Stage 2, as well as the core teaching and learning issues involved in the investigative process. Whether you are a student or a fully qualified teacher, the book is

designed to help you find what you need quickly. The introduction provides a guide to how to use the book, including a table which cross references the subject knowledge against the National Curriculum, the QCA Scheme of Work and Primary Science Topics. This enables you to use the book in different ways, depending on your individual requirements. To ensure that teachers will be able to teach and respond to questions appropriately, the authors take science knowledge beyond what is required for Key Stage 2. This is important, as it helps to avoid over-simplifying concepts which can then cause misconceptions at Key Stage 3 and beyond. It also helps to broaden and develop the primary teacher's own knowledge. Science for Primary School Teachers is a core text for teachers in training, and in professional development into the induction year and beyond.

Planning and Producing a Scheme of Work for Science

Cambridge University Press

Cambridge Primary Science is a flexible, engaging course written specifically for the

Cambridge Primary Science curriculum framework. This Teacher's Resource for Stage 3 contains guidance on all components in the series. you the opportunity to adapt it to your needs.

Teaching Science

Heinemann

The "Heinemann Science Scheme" offers an approach to the QCA's Scheme of Work.

Teacher's resource packs provide support with lesson planning, with each chapter matching the Scheme of Work, and in-built assessment. The scheme aims to improve on the Scheme of Work by building in progression and a comprehensive revision programme to help prepare pupils for their National Tests. It also aims to make the Scheme of Work accessible to all pupils. The scheme builds on what students already know, following on from the Scheme of Work at Key Stages 1 and 2. It takes into account what pupils already know at the start of Key Stage 3 and builds from there. The "Heinemann Science Scheme" is also designed to build on the literacy and numeracy work pupils have done in primary schools.

Inspire and engage your students with this brand new Lower Secondary Science course from Collins offering

comprehensive coverage of the curriculum framework including all suggested practicals and scientific enquiry skills.

Learning to Teach Science in the Secondary School SAGE

Learning to Teach Science in the Secondary School is an indispensable guide with a fresh approach to the process, practice and reality of teaching and learning science in a busy secondary school. This fourth edition has been fully updated in the light of changes to professional knowledge and practice and revisions to the national curriculum.

Written by experienced practitioners, this popular textbook comprehensively covers the opportunities and challenges of teaching science in the secondary school. It provides guidance on:

- the knowledge and skills you need, and
- understanding the science department at your school

- development of the science curriculum
- the nature of science and how science works, biology, chemistry, physics and astronomy, earth science
- planning for progression, using schemes of work to support planning, and evaluating lessons
- language in science,

practical work, using ICT, science for citizenship, Sex and Health Education and learning outside the classroom

- assessment for learning and external assessment and examinations

Every unit includes a clear chapter introduction, learning objectives, further reading, lists of useful resources and specially designed tasks – including those to support Masters Level work – as well as cross-referencing to essential advice in the core text Learning to Teach in the Secondary School, sixth edition. Learning to Teach Science in the Secondary School is designed to support student teachers through the transition from graduate scientist to practising science teacher, while achieving the highest level of personal and professional development.
