 This volume investigates the different attitudes of historians and other social scientists to questions of causality. It argues that historical theorists after the linguistic turn have paid surprisingly little attention to causes in spite of the centrality of causation in many contemporary works of history.

discipline from other fields of study? That's the animating question of Sarah Maza's *Thinking About History*, a general introduction to the field of history that revels in its eclecticism and highlights the inherent tensions and controversies that shape it. Designed for the classroom, *Thinking About History* is organized around big questions: Whose history do we write, and how does that affect what stories get told and

how they are told? How did we come to view the nation as the inevitable context for history, and what happens when we move outside those boundaries? What is the relation among popular, academic, and public history, and how should we evaluate sources? What is the difference between description and interpretation, and how do we balance them? Maza

provides choice examples in place of definitive answers, and the result is a book that will spark classroom discussion and offer students a view of history as a vibrant, ever-changing field of inquiry that is thoroughly relevant to our daily lives.

They have chronicled language, madness, gender, and sexuality and have experimented with new forms of presentation. They have turned to the histories of non-Western peoples and to the troubled relations between “the West” and the rest. Allan Megill welcomes these developments, but he also suggests that there is now confusion among</p>	<p>historians about what counts as a justified account of the past. In Historical Knowledge, Historical Error, Megill dispels some of the confusion. Here, he discusses issues of narrative, objectivity, and memory. He attacks what he sees as irresponsible uses of evidence while accepting the art of speculation, which incomplete evidence</p>

The story of Black British theatre at its most radical, entertaining and profound - told through the lives of its great trailblazers. In *Deep Are the Roots*, Stephen Bourne celebrates the

pioneers of Black British theatre, beginning in 1825, when Ira Aldridge made history as the first Black actor to play Shakespeare's Othello in the United Kingdom, and ending in 1975 with the success of Britain's first Black-led theatre company. In addition to providing a long-overdue critique of Laurence Olivier's Othello, too-often cited as the zenith of the role, Bourne has

unearthed the forgotten story of Paul Molyneaux, a Shakespearean actor of the Victorian era. The twentieth-century trailblazers include Paul Robeson, Florence Mills, Elisabeth Welch, Buddy Bradley, Gordon Heath, Edric Connor and Pearl Connor-Mogotsi, all of them active in Great Britain, though some first found fame in the United States or the Caribbean. Then there are the groundbreaking

works of playwrights Barry Reckord and Errol John at the Royal Court; the first Black drama school students; pioneering theatre companies; and three influential dramatists of the 1970s: Mustapha Matura, Michael Abbensetts and Alfred Fagon. Drawing on original research and interviews with leading lights, Deep Are the Roots is a powerful study of theatre's

Black trailblazers and their profound influence on British culture today.

Exploring identity, eroticism, relationships, hidden desires, love
