Edward Lucie-Smith follows craft through three historical stages. Starting from the time when everything was made by hand, he proceeds to a second period, from the Renaissance onward, when there emerged an intellectual distinction between the idea of craft and that of fine art, which eventually came to be regarded as superior. The third period occurred during the Industrial Revolution, which introduced a separation between the craft object and the product made by machine. Continuing his account chronologically, Lucie-Smith treats the Arts and Crafts movements in Great Britain and America, as well as Art Nouveau, Jugendstil, Art Deco, the Bauhaus, and craft today. His absorbing narrative is enlivened by a stunning collection of more than 300 photographs (42 in color) of a wide variety of objects -- the finest examples of craft work from all over the world. -- Form publisher's description.
