[Young Children Coping with Stress and Transition in Military Childcare Settings](#) What's New in Early Childhood

Clearly babies come into the world remarkably receptive to its

wonders. Their alertness to sights, sounds, and even abstract concepts makes them inquisitive explorers--and learners--every waking minute. Well before formal schooling begins, children's early experiences lay the foundations for their later social behavior, emotional regulation, and literacy. Yet, for a variety of reasons, far too little attention is given to the quality of these crucial years. Outmoded theories, outdated facts, and undersized budgets all play a part in the uneven quality of early childhood programs throughout our country. What will it take to provide better early education and care for our children between the ages of two and five? Eager to Learn explores this crucial question, synthesizing the newest research findings on how young children learn and the impact of early learning. Key discoveries in how young children learn are reviewed in language accessible to parents as well as educators: findings about the interplay of biology and environment, variations in learning among individuals and children from different social and economic groups, and the importance of health, safety, nutrition and interpersonal warmth to early learning. Perhaps most significant, the book documents how very early in life learning really begins. Valuable conclusions and recommendations are presented in the areas of the teacher-child relationship, the organization and content of curriculum, meeting the needs of those children most at risk of school failure, teacher preparation, assessment of teaching and learning, and more. The book discusses: Evidence for competing theories, models, and approaches in the field and a hard look at some day-to-day practices and activities generally used in preschool. The role of the teacher, the importance of peer interactions, and other relationships in the child's life. Learning

needs of minority children, children with disabilities, and other special groups. Approaches to assessing young children's learning for the purposes of policy decisions, diagnosis of educational difficulties, and instructional planning. Preparation and continuing development of teachers. Eager to Learn presents a comprehensive, coherent picture of early childhood learning, along with a clear path toward improving this important stage of life for all children.

The city-run early childhood program of Reggio Emilia, Italy, has become recognized and acclaimed as one of the best systems of education in the world. Over the past 30 years, educators there have evolved an innovative approach that fosters children's intellectual development through a systematic focus on symbolic representation. Young children are encouraged to explore their environment and express themselves through many "languages", or modes of expression, including words, movement, drawing, painting, sculpture, shadow play, collage and music.... This book brings together the reflections of the Italian educators who founded and developed the system, as well as North Americans who have observed and/or studied there. It is a comprehensive introduction covering history and philosophy, curriculum and methods of teaching, school and system organization, the use of space and physical environments, and adult professional roles. - Back cover.

A Trainee's Manual for Child Care Professionals University Press of America

This book examines why workplaces around the world have become involved in childcare and the nature of the programs that have been implemented. It provides an overview of diverse workplace initiatives beyond traditional preschool care.

Partnership is a key theme, and the authors highlight the fruitfulness of collaborations that combine the resources and capabilities of different actors. Ten industrialized and developing countries are examined through a national overview on policies and facilities for childcare and the implications for working parents, followed by case studies of specific workplaces. The studies provide considerable detail on why the childcare support was started, how it is funded and managed, how various partners are involved, and the perspectives of workers and employers on the support provided. The book shows how support for childcare has been organized and funded in a variety of workplaces and the diversity of the partnerships that have evolved in both developing and industrialized countries. It will be a useful resource for policymakers and workplace partners looking for practical ways to help working parents with their childcare needs.
