CULLEN JAMAL

In Pursuit of Conceptual Excellence Routledge

This new and updated edition of *Understanding Naval Warfare* offers the reader an accessible introduction to the study of modern naval warfare, providing a thorough grounding in the vocabulary, concepts, issues, and debates, set within the context of relevant history. Navies operate in an environment that most people do not understand and that many avoid. They are equipped with a bewildering range of ships, craft and other vessels and types of equipment, the purpose of which is often unclear. Writings on naval warfare are usually replete with references to esoteric concepts explained in specialist language than can serve as a barrier to understanding. The objective of this book, therefore, is to cut through the obscure and the arcane to offer a clear, coherent and accessible guide to the key features

of naval warfare which will equip the reader with the knowledge and understanding necessary for a sophisticated engagement with the subject. This second edition is divided into two key parts. The first focuses on concepts of naval warfare and introduces readers to the ideas associated with the theory and practice of naval operations. It also includes a new chapter in which the history of the last century of naval warfare is explored in order to illustrate the key concepts. The second part focuses on the conduct of war at sea and on peacetime roles for contemporary navies. This latter section concludes with a chapter that looks ahead to the likely future of naval warfare. This textbook will be essential reading for students of naval warfare, sea power and maritime security, and highly recommended for those studying military history, strategic studies and security studies in general. The Criminal Liability of NATO Commanders within International Law Cornell University Press

Noam Zamir provides a thorough examination of the theoretical basis of classification of conflicts in international humanitarian

law (IHL), with special focus on the legal impact of armed foreign intervention in civil wars. *Classification of Conflicts in International Humanitarian Law* enriches the discourse on IHL by providing an in-depth analysis of classification of conflicts and examining recent civil wars with foreign interventions, such as the Libyan civil war (2011), Mali civil war (2012-2015) and the ongoing civil war in Yemen.

Department of Defense Dictionary of Military and Associated Terms Springer Nature

The application of the right to life during armed conflict is an issue that polarizes opinion and generates considerable debate. Many believe that human rights law has no place in armed conflict, yet the European Court of Human Rights, and domestic courts, have ruled that it can apply. The exact contours of how the right to life applies during armed conflict remain largely unresolved. In this text, Ian Park seeks to clearly articulate the right to life obligations of states during both international and non-international armed conflict in respect of those individuals affected by the actions of states' armed forces and members of the armed forces themselves. In determining the right to life obligations of states, Park identifies the sources of law from which right to life obligations arise, how case law has developed and modified these obligations, and analyses how the law creates obligations in practice. Implicit in this analysis is a consideration of recent armed conflicts, and the actions of states, that lead to a series of concrete proposals designed to best ensure compliance with a state's right to life obligations.

Critical Infrastructure Protection Research John Wiley & Sons

Since the publication of the Institute of Medicine (IOM) report *Clinical Practice Guidelines We Can Trust* in 2011, there has been an increasing emphasis on assuring that clinical practice guidelines are trustworthy, developed in a transparent fashion, and based on a systematic review of the available research evidence. To align with the IOM recommendations and to meet the new requirements for inclusion of a guideline in the National Guidelines Clearinghouse of the Agency for Healthcare Research and Quality (AHRQ), American Psychiatric Association (APA) has adopted a new process for practice guideline development. Under this new process APA's practice guidelines also seek to provide better clinical utility and usability. Rather than a broad overview of treatment for a disorder, new practice guidelines focus on a set of discrete clinical questions of relevance to an overarching subject area. A systematic review of evidence is conducted to address these clinical questions and involves a detailed assessment of individual studies. The quality of the overall body of evidence is also rated and is summarized in the practice guideline. With the new process, recommendations are determined by weighing potential benefits and harms of an intervention in a specific clinical context. Clear, concise, and actionable recommendation statements help clinicians to incorporate recommendations into clinical practice, with the goal of improving quality of care. The new practice guideline format is also designed to be more user friendly by dividing information into modules on specific clinical questions. Each module has a consistent organization, which will assist users in finding clinically useful and relevant information quickly and easily. This new edition of the practice guidelines on psychiatric evaluation for

adults is the first set of the APA's guidelines developed under the new guideline development process. These guidelines address the following nine topics, in the context of an initial psychiatric evaluation: review of psychiatric symptoms, trauma history, and treatment history; substance use assessment; assessment of suicide risk; assessment for risk of aggressive behaviors; assessment of cultural factors; assessment of medical health; quantitative assessment; involvement of the patient in treatment decision making; and documentation of the psychiatric evaluation. Each guideline recommends or suggests topics to include during an initial psychiatric evaluation. Findings from an expert opinion survey have also been taken into consideration in making recommendations or suggestions. In addition to reviewing the available evidence on psychiatry evaluation, each guideline also provides guidance to clinicians on implementing these recommendations to enhance patient care.

Redefining Information Warfare Boundaries for an Army in a Wireless World Jeffrey Frank Jones

The phrase "lessons learned is such a common one, yet people struggle with developing effective lessons learned approaches. The Lessons Learned Handbook is written for the project manager, quality manager or senior manager trying to put in place a system for learning from experience, or looking to improve the system they have. Based on experience of successful and unsuccessful systems, the author recognises the need to convert learning into action. For this to happen, there needs to be a series of key steps, which the book guides the reader through. The book provides practical guidance to learning from experience, illustrated with case histories from the author,

and from contributors from industry and the public sector. The book is a practitioner-level guide to the design and the mechanics of lessons learned processes Takes a holistic approach, tracking lessons from identification to reapplication Makes the case for the assignment of actions for learning

Netherlands Annual Review of Military Studies 2015

American Psychiatric Pub

This book seeks to bridge the gap between academic, political and military thinking concerning the success and failure of peacekeeping operations and their termination. Exit strategies have recently gained attention in political, military, academic and public debates, due to the Western engagement in international and intrastate conflicts since the end of the Cold War. Yet, many of those debates took place separately. This volume, which is predominantly a joint product of academics and the military of the Faculty of Military Sciences of the Netherlands Defence Academy, shows new venues by bridging the putative political-military divide. Drawing on theory, empirics, and personal experiences the authors address exits at political, strategic, operational and tactical levels of current and past military missions and interventions, ranging from decolonisation wars to Afghanistan and Iraq. Although some of those conflicts are still ongoing, valid inferences can be drawn. An important one is that exit forms a problem for those who leave and for those who stay. While political and military objectives might not have been reached and many of those involved have the feeling that the job is still not yet done, the termination of the entire mission or transitions at operational level necessitate both departures and handovers-takeovers and are thereby characterised by

discontinuities and continuities at the same time. It is these dynamics between unfulfilled end states and end dates that, in the end, lead to the dilemma of leaving. All the editors, except van den Wollenberg, are affiliated with the Faculty of Military Sciences of the Netherlands Defence Academy in Breda, the Netherlands. Jörg Noll is Associate Professor of International Conflict Studies. First Lieutenant Air-Commodore Frans Osinga is Professor of Military Operational Art and Sciences. Georg Frerks is Professor International Security Studies and Irene van Kemenade runs the Research Office of the Faculty. Daan van den Wollenberg is Commander of a mechanized artillery platoon of the Netherlands armed forces.

The Role of Soldiers Oxford University Press

INTRODUCTION This graphic training aid (GTA) is an indispensable reference tool for tactical Psychological Operations (PSYOP) Soldiers assigned to leadership positions. It contains valuable, comprehensive, and timesaving information in a concise format, making it easily transportable and simple to use. The focus of this GTA is to provide requisite information to help the tactical PSYOP Soldier better plan and execute PSYOP in support of a maneuver commander. Noncommissioned officers (NCOs) leading a three-man tactical Psychological Operations team (TPT) or planning PSYOP at division or corps levels will find this GTA extremely helpful. This GTA includes a number of worthwhile tools and techniques to assist in the planning and conduct of tactical-level PSYOP. From the basic principles of military decision-making process (MDMP) and PSYOP planning through the determination of measures of effectiveness (MOEs), this GTA will help the PSYOP NCO plan and execute doctrinally accurate and successful PSYOP.

Numerous formats and guides, such as how to conduct PSYOP estimates, complete operational area assessments, and radio station assessments, are also included. The proponent of this GTA is the United States Army John F. Kennedy Special Warfare Center and School (USAJFKSWCS). Submit comments and recommended changes to Commander, USAJFKSWCS, ATTN: AOJK-DTD-PO, Fort Bragg, NC 28310-5000. Unless this publication states otherwise, masculine nouns and pronouns do not refer exclusively to men.

The Legal Impact of Foreign Intervention in Civil Wars

DIANE Publishing

Army Doctrine Publication (ADP) 1 is prepared under the direction of the Chief of Staff of the Army and is his vision for the Army. It states what the Army is, what the Army does, how the Army does it, and where the Army is going. It establishes the Army's contribution to America's landpower. ADP 1 delineates the Army's mission, purpose, and roles, deriving them from the Constitution; the Congress, in Title 10, United States Code; and the Department of Defense, in Department of Defense Directive 5100.01. Army doctrine supports and is consistent with joint doctrine. This publication connects Army doctrine to joint doctrine as expressed in the relevant joint publications, especially Joint Publication (JP) 1, Doctrine for the Armed Forces of the United States, and JP 3-0, Joint Operations. ADP 1 also links the National Security, National Defense, and National Military Strategies with the Army's operational doctrine in ADP 3-0. The principal audience of ADP 1 includes combatant commanders, other Services, all serving Soldiers, and all Army Civilians. All photographs in this publication are from Department of Defense photographic archives available online at DefenseImagery.mil

and associated Army Web pages. ADP 1 implements the standardization agreement entitled Allied Joint Publication (AJP)-01, Allied Joint Doctrine. ADP 1 uses joint terms where applicable. For terms and their definitions in the text, the term is italicized and the number of the proponent publication follows the definition. ADP 1 applies to the Active Army, Army National Guard/Army National Guard of the United States, and United States Army Reserve unless otherwise stated. United States Army Combined Arms Center is the proponent for this publication. The preparing agency is the Combined Arms Doctrine Directorate, United States Army Combined Arms Center.

Explanations for Limited and Unlimited Conflicts Springer

The gender-differentiated and more severe impacts of armed conflict upon women and girls are well recognised by the international community, as demonstrated by UN Security Council Resolution (UNSCR) 1325 on Women, Peace and Security and subsequent resolutions. Similarly, the development community has identified gender-differentiated impacts upon women and girls as a result of the effects of climate change. Current research and analysis has reached no consensus as to any causal relationship between climate change and armed conflict, but certain studies suggest an indirect linkage between climate change effects such as food insecurity and armed conflict. Little research has been conducted on the possible compounding effects that armed conflict and climate change might have on at-risk population groups such as women and girls. *Armed Conflict, Women and Climate Change* explores the intersection of these three areas and allows the reader to better understand how military organisations across the world need to

be sensitive to these relationships to be most effective in civilian-centric operations in situations of humanitarian relief, peacekeeping and even armed conflict. This book examines strategy and military doctrine from NATO, the UK, US and Australia, and explores key issues such as displacement, food and energy insecurity, and male out-migration as well as current efforts to incorporate gender considerations in military activities and operations. This innovative book will be of great interest to students and scholars of international relations, international development, international security, sustainability, gender studies and law.

Department Of Defense Index of Specifications and Standards Alphabetical Listing Part I July 2005 CreateSpace

A wide range of contemporary challenges and threats, and their volatility, uncertainty, complexity and ambiguity make it necessary to develop a new, flexible and integrated holistic approach. The modern world requires NATO to build institutional partnerships with a range of actors. This applies not only to the other major international organizations, such as the United Nations and the European Union, but also to non-governmental organizations (NGOs) as well as the private sector, for example the energy and IT sectors. All these players must become partners in the attempt to cope with multi-dimensional security-related problems. Given the vast differences in their goals, mandates, methods and philosophy of action, building trusting and effective relationships between them will be an arduous process. Nevertheless, as the biggest political and military organization in the world, NATO cannot avoid contemporary challenges if it does not want to “go out of business”.

Urban Warfare in the Twenty-First Century Rand Corporation
 Powerful and compelling. One of the worlds most prolific writers on military intelligence and U.S. public administration has woven together a concise and commanding book on NATO and its continued relevance in peace keeping and global security. A must read. Lorenda Naylor, PH.D., Associate Professor and Schaefer Center Faculty Fellow, College of Public Affairs, University of Baltimore, USA If you think NATO is a Cold War relic, this book will convince you of the contrary. Historys longest lasting defense alliance will continue to play an important role in the XXI century. Utilizing recent information, the author explains how NATO has repeatedly risen to the occasion to address conflicts in Europe, North Africa, and the Middle East. It is also a critical approach that identifies and explains its shortcomings and new challenges. Javier Aguayo, PH.D., Assistant Professor of Political Science, York College of Pennsylvania, USA This book builds on the six years of hands-on experience that the author had while working in the North Atlantic Treaty Organization. It provides an overview and history of NATO, looks at the political and military components of the Alliance, as well as the military command from the perspective of real-world contemporary NATO operations and planning. The author also looks at the military training, lessons, and exercise components and how it prepares forces to support upcoming NATO Response Force (NRF) rotations to ensure that NATO is a viable threat deterrent and responsive organization to both Article 5 and non-Article 5 operations. This book will serve as a primer into the worlds longest enduring Alliance and one that has made an impact on real world operations over the last 20 years in Europe (Bosnia and Kosovo), Africa (Libya), Asia

(Afghanistan and Pakistan), and the Middle East (Iraq). John Michael Weaver, DPA (University of Baltimore), is Associate Professor of Intelligence Analysis, York College of Pennsylvania (USA), a retired lieutenant colonel from the US Army, and a retired civilian from the Intelligence Community of the US.

NATO Glossary of terms and definitions (English and French).

Listing terms of military significance and their definitions for use in NATO.

The Right to Life in Armed Conflict Routledge

This thesis deals with the individual criminal liability under international law of NATO commanders for crimes committed by their subordinates in the context of complex, multilateral command and control structures. After analysing the applicable law, the elements that must be fulfilled in order to be able to prosecute commanders and other superiors under the doctrine of Command Responsibility are comprehensively described and the Command, Control & Communication structures within NATO and in NATO-led operations explained. Subsequently, the doctrine of Command Responsibility is applied to the identified structures taking into account the role of a commander acting in a multilateral NATO operation, the role of the Troop Contributing Nation, the methods of conferral of powers as well as the de iure and de facto effective control of such a commander leading a multilateral force. Die vorliegende Arbeit befasst sich mit der individuellen strafrechtlichen Verantwortlichkeit von NATO-Befehlshabern nach dem Völkerrecht für Straftaten ihrer

Untergebenen im Rahmen komplexer, multilateraler Befehls- und Kommandostrukturen. Nach einer Darstellung des anwendbaren Rechts, werden die Voraussetzungen für eine Vorgesetztenverantwortlichkeit von Befehlshabern und anderen Vorgesetzten umfassend beschrieben und die Führungs-, Befehls- und Kommunikationsstrukturen innerhalb der NATO und bei NATO-geführten Einsätzen erläutert. Anschließend wird der Tatbestand der Vorgesetztenverantwortlichkeit unter Berücksichtigung der Stellung eines Befehlshabers in einem multilateralen NATO-Einsatz, der Rolle des truppenstellenden Staates, der Methoden der Befugnisübertragung sowie der de iure und de facto wirksame Kontrolle eines solchen Befehlshabers auf die ermittelten Strukturen angewandt.

The Lessons Learned Handbook Routledge

NTTP 3-54M/MCWP 3-40.9 provides the commander with an operations security (OPSEC) overview, OPSEC evolution, and guidance for the most crucial aspect of OPSEC, that of identifying critical information (CI). It explains the OPSEC process, also known as the OPSEC five-step process. This publication addresses the areas of OPSEC and force protection, public affairs officer (PAO) interaction, the role of the Naval Criminal Investigative Service (NCIS) in coordination with OPSEC, the OPSEC/OMBUDSMAN/KEY VOLUNTEER relationship and the conduct of OPSEC assessments. This publication includes separate chapters on Web page registration, Web risk assessment, and Red team activity. Appendices provide guidance to implement effective plans/programs at the individual unit, strike group, and shore establishment levels. NWP 3-13 (FEB 2014), NAVY INFORMATION OPERATIONS, provides information

operations guidance to Navy commanders, planners, and operators to exploit and shape the information environment and apply information-related capabilities to achieve military objectives. This publication reinforces the integrating functionality of information operations to incorporate informationrelated capabilities and engage in the information environment to provide a military advantage to the friendly Navy force. It is effective upon receipt. 1. NWP 1-14M/MCTP 11-10B/COMDTPUB P5800.7A (AUG 2017), THE COMMANDER'S HANDBOOK ON THE LAW OF NAVAL OPERATIONS, is available in the Navy Warfare Library. It is effective upon receipt and supersedes NWP 1-14M/MCWP 5-12.1/COMDTPUB 5800.7A (JUL 2007), The Commander's Handbook on the Law of Naval Operations. 2. Summary. This revision updates and expands upon various topics regarding the law of the sea and law of war. In particular, it updates the history of U.S. Senate consideration of the UN Convention on the Law of the Sea, to include its 2012 hearings; emphasizes that islands, rocks, and low-tide elevations are naturally formed and that engineering, construction, and land reclamation cannot convert their legal status; provides more detail on U.S. sovereign immunity policy for Military Sealift Command chartered vessels and for responding to foreign requests for health inspections and medical information; removes language indicating that all USN/USCG vessels under command of a noncommissioned officer are auxiliary vessels; emphasizes that only warships may exercise belligerent rights during international armed conflicts; adds a description of U.S.-Chinese bilateral and multilateral agreements promoting air and maritime safety; updates the international law applicable to vessels seeking a

place of refuge; updates the description of vessels assimilated to vessels without nationality; provides detailed descriptions of the five types of international straits; states the U.S. position on the legal status of the Northwest Passage and Northern Sea Route; updates the list of international duties in outer space; updates the law regarding the right of safe harbor; adds “honor” as a law of war principle; adds information about weapons reviews in the Department of the Navy; updates the law regarding unprivileged enemy belligerents; includes information about the U.S. position on the use of landmines; expands on the discussion of the International Criminal Court (ICC); and updates the law of targeting.

Understanding Contemporary Air Power Springer

This book aims to explain air power to both military and civilian audiences in an accessible manner, approaching the topic in a balanced and systematic way. The past 100 years illustrates that air power is an inevitable feature of any type of modern warfare. It has a key role to play in any of the three main operational environments: conventional (inter-state) wars, peace-support operations, and counterinsurgencies. This book examines the strengths and challenges of using air power in these situations, and each type of operation is explained using modern and historical examples, with an emphasis on the relevant lessons for the contemporary and future use of air power. The book also looks into the complexity of media coverage of air warfare and changes in the public perception of air power in recent years. The specifics of structuring national air forces is also discussed, along with the future of air power based on current trends. One of the enduring themes in the book is the necessity of inter-service and

cross-domain integration, emphasizing the increasingly important role of cyber and space domains in the future of network-centric warfare. This book will be essential reading for students of air power and air warfare, and recommended reading for students of international security, strategic studies, defence studies, and foreign policy.

IGI Global

This book investigates the challenges related to civil-military cooperation (CIMIC) and offers a new perspective by examining the social role of NATO CIMIC soldiers. The intertwining of the civilian and military spheres has become a significant part of the contemporary security environment. However, the relationship between the military and civilian actors is often troubled, filled with misunderstandings and rivalry. In their duty to provide a link between the military and diverse civilian environment, soldiers involved in CIMIC are exposed to varied, often-conflicted expectations that make up their social role and put stress on their performance and the effectiveness of CIMIC. By drawing on analysis of NATO CIMIC documents and a series of interviews with CIMIC soldiers, the author is able to, first, identify the elements of the CIMIC role and, second, diagnose the inherent role conflict and describe methods of dealing with it. Looking at civil-military cooperation through this lens reveals new layers of challenges that impact its effectiveness and a better way to understand the complexity of civil-military interaction. This book will be of much interest to students of military studies, military sociology, peacekeeping, security studies, and international relations, as well as military practitioners.

Handbook BRILL

Field manual (FM) 3-13 provides doctrinal guidance and directions for conducting inform and influence activities (IIA) and discusses the importance of information in operational environments. It describes the Army's view of how IIA aid the commander to gain an advantage through information. It develops the other principles, tactics, and procedures detailed in subordinate doctrinal publications. The publication does not address every information-related capability commanders can use to help shape their complex operational environments. It should, however, generate introspection and provide just enough guidance to facilitate flexibility and innovative approaches for commanders to execute the art of command to inform and influence. It also provides guidance to the staff to conduct IIA to achieve the desired effects that support the commander's intent and objectives. Commanders designate an information-related capability and are only limited by available resources. The principal audience for FM 3-13 is commanders and staffs at all echelons of command, Army civilians, and government contractors. Commanders, staffs, and subordinates ensure their decisions and actions comply with applicable United States, international, and, in some cases, host nation laws and regulations. Commanders at all levels ensure their Soldiers operate according to the law of war and the rules of engagement. (See FM 27-10.) FM 3-13 implements standardization agreement (STANAG) Allied Joint Publication (AJP)-3 (B). FM 3-13 uses joint terms where applicable. Selected joint and Army terms and definitions appear in both the glossary and the text. Terms for which FM 3-13 is the proponent publication (the authority) have an asterisk (*) in the glossary. Definitions for which FM 3-13 is the

proponent publication are boldfaced in the text. For other definitions shown in the text, the term is italicized and the number of the proponent publication follows the definition. FM 3-13 applies to the Active Army, the Army National Guard (ARNG)/Army National Guard of the United States (ARNGUS), and the United States Army Reserve (USAR) unless otherwise stated. The proponent of FM 3-13 is the United States Army Combined Arms Center. The preparing agency is the Combined Arms Doctrine Directorate, United States Army Combined Arms Center. **NATO Towards the Challenges of a Contemporary World 2013** CreateSpace

Warfare has migrated into cities. From Mosul to Mumbai, Aleppo to Marawi, the major military battles of the twenty-first century have taken place in densely populated urban areas. Why has this happened? What are the defining characteristics of urban warfare today? What are its military and political implications? Leading sociologist Anthony King answers these critical questions through close analysis of recent urban battles and their historical antecedents. Exploring the changing typography and evolving tactics of the urban battlescape, he shows that although not all methods used in urban warfare are new, operations in cities today have become highly distinctive. Urban warfare has coalesced into gruelling micro-sieges, which extend from street level - and below - to the airspace high above the city, as combatants fight for individual buildings, streets and districts. At the same time, digitalized social media and information networks communicate these battles to global audiences across an urban archipelago, with these spectators often becoming active participants in the fight. A timely reminder of the costs and the

horror of war and violence in cities, this book offers an invaluable interdisciplinary introduction to urban warfare in the new millennium for students of international security, urban studies and military science, as well as military professionals.

Practical Approaches to Learning from Experience Cuvillier Verlag

“Over the past dozen years special operations forces (SOF) have been one of the few areas of growth and expansion in a number of militaries. This growth and expansion, however, has not been mirrored by a comparable one in academic inquiries into the

subject. Special Operations from a Small State Perspective - Future Security Challenges, which contains a wide range of perspectives from both practitioners and academics, makes a unique contribution to the literature and offers fascinating insights into the opportunities provided by and challenges confronting small states such as Sweden in their evolutionary development and use of SOF.” Dr James Kiras, Associate Professor, School of Advanced Air and Space Studies, The Air University, Alabama, USA.
