*The Due Process of Law* Routledge

Two central themes run through this book. The first is the workings of the various 'measures authorised by the law so as to keep the streams of justice pure', and the second is the recent development of family law, focusing particularly on Lord Denning's contribution to the law of husband and wife.

**Justice, Lord Denning, and the Constitution** Oxford University Press, USA

Lord Denning draws from a wide range of sources to support his arguments and incorporates coverage of many different cases, including that of the Russell baby, the Granada 'mole' and the case of Harriet Harman, all of which are selected on the grounds that 'the experience of the past points the way to the future'. The book also discusses the proposals for law reform which have come from numerous Royal Commissions, Departmental Committees and Blue Books and which were all rejected by successive governments at the time of publication.

The Law of the Manor is the definitive work on the subject, providing detailed, up-to-date and comprehensive coverage for lawyers and also to those owning, managing, selling or buying historic houses and estates. It provides a modern description of the law associated with lordships of the manor. Principally concerned with the lands and rights of the lord, the book also considers rights that tenants of the manor can claim against him. These are put in context with a discussion of associated topics such as franchises and titles of nobility. The second edition has been updated to cover

numerous developments in the law since 1998, in particular the Land Registration Act 2002 with a full discussion of the way manorial rights, including minerals, will cease to be overriding interests after 12 October 2013. The book includes changes made by the Countryside and Rights of Way Act 2000, the Commons Act 2006, the Hunting Act 2004, the House of Lords Act 1999, and the Legal Services Act 2007 as well as the relevant case law. New material has been included on escheat, rectorial manors and roadside verges. There is also greater coverage of legal authorities including over 50 decisions since the first edition and a selection of useful precedents for the practitioner. Although the book is about the law of the manor in England and Wales, there is some reference to other jurisdictions, most notably the experimental extension of the manorial system to some American colonies. The text is arranged in five parts. Part 1 describes the context, summarises the history and analyses custom which is the basis of manorial law. Part 2 describes the lands of tenants and lords and the relations between them. Part 3 discusses rights and comprises a detailed

commentary on section 62(3) of the Law of Property Act 1925. It covers rights of common, mineral and sporting rights, courts and remaining revenues. Part 4 sets the manor in the context of other institutions, namely the village, the church, towns and feudal relationships. Part 5 summarises and looks at the modern manor, its documents, conveyancing (with particular reference to registered land) and taxation, concluding with suggestions for reform. This work is for property lawyers, owners, managers, buyers and sellers of historic houses and estates, and surveyors concerned with rural matters.

Written in Lord Denning's familiar vivid, staccato style, *Landmarks in the Law* discusses cases and characters whose names will be known to all readers, grouped together under headings such as High Treason, Freedom of the Press, and

Murder. Thus, for example, the chapter on High Treason tells the stories of Sir Walter Raleigh, Sir Roger Casement, and William Joyce - three very different cases, the first occurring nearly 350 years before the last, but each one raising constitutional issues of the greatest importance.

*Liberty, Law, and Justice* Cambridge University Press

The Literature of the Law brings together examples of the very best in judicial pronouncements over four centuries and two continents. Assembled into themes, such as life and death decisions, freedom of speech and the protection of minorities, they form a fascinating summary of the law's interaction with society. The Literature of the Law also paints an intriguing and sometimes humorous picture of the lawyer's life in and out of court, illustrating with examples some of the different styles of advocacy. The text is stripped of legal references, which might get in the way of the general reader, and is finished with a number of line illustrations of legal London.

**CLOSING CHAPTER** Cambridge University Press

Commercial contract law is in every sense

optional given the choice between legal systems and law and arbitration. Its 'doctrines' are in fact virtually all default rules. Contract Law Minimalism advances the thesis that commercial parties prefer a minimalist law that sets out to enforce what they have decided - but does nothing else. The limited capacity of the legal process is the key to this 'minimalist' stance. This book considers evidence that such minimalism is indeed what commercial parties choose to govern their transactions. It critically engages with alternative schools of thought, that call for active regulation of contracts to promote either economic efficiency or the trust and co-operation necessary for 'relational contracting'. The book also necessarily argues against the view that private law should be understood non-instrumentally (whether through promissory morality, corrective justice, taxonomic rationality, or otherwise). It sketches a restatement of English contract law in line with the thesis.

**Due Process Of Law** Bloomsbury Publishing

This book lays out foundations for a "science of morals." Binmore uses game theory as a systematic tool for

investigating ethical matters. He reinterprets classical social contract ideas within a game-theory framework and generates new insights into the fundamental questions of social philosophy. In contrast to the previous writing in moral philosophy that relied on vague notion such as "societal well-being" and "moral duty," Binmore begins with individuals; rational decision-makers with the ability to empathize with one another. Any social arrangement that prescribes them to act against their interests will become unstable and eventually will be replaced by another, until one is found that includes worthwhile actions for all individuals involved.

The Closing Chapter contains, in Book One, a sequel to Lord Denning's autobiography, *The Family Story*. In it he tells with disarming and touching candour of the circumstances of the publication and withdrawal of *What Next in the Law* and of his decision to retire from the Master of the Rolls. Book Two contains a fascinating account of some of the leading contentious legal issues of the day, in which he has played a singular part.

Commonwealth Caribbean Law and Legal Systems Butterworth-Heinemann

"The underlying theme of this book is that the principles of law laid down by the Judges in the 19th century--however suited to social conditions of the time--are not suited to the social necessities and social opinion of the 20th century. They should be moulded and shaped to meet the needs and opinions of today. The Discipline of Law is a fascinating account of Lord Denning's personal contribution to the changing face of the law in this century." -- from publ. descr.

*What Next In The Law* Oxford University Press

Two central themes run through *The Due Process of Law*. The first is the workings of the various "measures authorised by the law so as to keep the streams of justice pure" - that is to say, contempt of court, judicial inquiries, and powers of arrest and search. The second is the recent development of family law, focusing particularly on Lord Denning's contribution to the law of husband and wife. These broad themes are elaborated through a discussion of Lord Denning's own judgments and opinions on a wide range

of topics.

The original thesis of this book is that, in Australia, natural justice has become an aspect of constitutional rather than administrative law. This view of procedural justice is developed in the context of UK and Commonwealth law in a way that brings both historical and doctrinal research to bear on important contemporary issues in judicial review. The author traces the origins and fluctuating development of the idea and practice of natural justice in England and its adaptation to the planned state in Australia. Consideration is given to the impact of the so-called new property and the broadening protection of citizens' rights, the growing significance of the doctrine of legitimate expectations, and the changing role of the notion of ultra vires as a legitimizing basis for judicial review. The book culminates in a critical examination of the idea of common law constitutionalism and the need to develop present-day rationales for the protection of procedural rights.

Freedom Under the Law Butterworth-Heinemann

The Politics of the Common Law offers a critical introduction to the legal system of England and Wales. Unlike other

conventional accounts, this revised and updated second edition presents a coherent argument, organised around the central claim that contemporary postcolonial common law must be understood as an articulation of human rights and open justice. The book examines the impact of the European Convention and European Union law on the structures and ideologies of the common law and engages with the politics of the rule of law. These themes are read into normative accounts of civil and criminal procedure that stress the importance of due process. The final sections of the book address the reality of

civil and criminal procedure in the light of recent civil unrest in the UK and the growing privatisation of public services. The book questions whether it is possible to find a balance between the requirements of economics and the demands of justice.
