A practical, skill-based introduction to data analysis and literacy We are swimming in a world of data, and this handy

guide will keep you afloat while you learn to make sense of it all. In *Data Literacy: A User's Guide*, David Herzog, a journalist with a decade of experience using data analysis to transform information into captivating storytelling, introduces students and professionals to the fundamentals of data literacy, a key skill in today's world. Assuming the reader has no advanced knowledge of data analysis or statistics, this book shows how to create insight from

publicly-available data through exercises using simple Excel functions. Extensively illustrated, step-by-step instructions within a concise, yet comprehensive, reference will help readers identify, obtain, evaluate, clean, analyze and visualize data. A concluding chapter introduces more sophisticated data analysis methods and tools including database managers such as Microsoft Access and MySQL and standalone statistical programs such as SPSS, SAS and R.

This work offers an evaluation of competing theoretical perspectives and nosological systems for personality disorders. The editors have brought

together recognized authorities in the field to offer a synthesis of competing perspectives that provide readers with an assessment for each disorder. The result is a comprehensive, current, and critical summary of research and practice guidelines related to the personality disorders. Key Features focuses on controversies and alternative conceptualizations; separate chapters are dedicated to each personality disorder and considered from various

points of view. It presents authoritative perspectives; leading scholars and researchers in the field provide a critical evaluation of alternative perspectives on each personality disorder. And it frames the current state of personality disorder research and practice issues; cutting edge and streamlined research is presented to be used in courses on diagnosis, assessment, psychopathology and abnormal psychology, especially those that

include the DSM IV. It also offers an integrative understanding of elusive personality categorizations; wherever possible, case examples are offered as illustrations of each disorders clinical presentation. The use of technical terms are minimized; each contributor takes the approach of a user friendly summary and integration of major trends, findings, and future directions.

*50 Ways to Close the Achievement Gap*  
Routledge

The appropriate amount of punishment for a given crime is an issue that has been debated by scholars, philosophers and legal professionals since the beginning of civilizations. This book seeks to address this issue in all of its complexity by providing a comprehensive overview of the sentencing process in the United States. The book begins by discussing the overall concept of punishment and then proceeds to dissect individual aspects of punishment. Topics

include: the sentencing process; responsibility of the judge; disparity and discrimination in sentencing; and sentencing reform. This book is an ideal text for introductory courses on the judicial system, criminal law, law and society. It can be an essential resource to help students understand patterns in the wide discretion and latitude given to judges when determining punishments within the framework of the United States judicial system.

Data Literacy Cambridge University Press  
Offers practical illustrations from different disciplines and perspectives, showing how researchers from various backgrounds deal with narrative data.

EPA Publications Bibliography Quarterly Abstract Bulletin SAGE Publications

The impact agenda is set to shape the way in which social scientists prioritise the work they choose to pursue, the research methods they use and how they publish their

findings over the coming decade, but how much is currently known about how social science research has made a mark on society? Based on a three year research project studying the impact of 360 UK-based academics on business, government and civil society sectors, this groundbreaking new book undertakes the most thorough analysis yet of how academic research in the social sciences achieves public policy impacts, contributes to economic prosperity, and

informs public understanding of policy issues as well as economic and social changes. The Impact of the Social Sciences addresses and engages with key issues, including: identifying ways to conceptualise and model impact in the social sciences developing more sophisticated ways to measure academic and external impacts of social science research explaining how impacts from individual academics, research units and universities can be

improved. This book is essential reading for researchers, academics and anyone involved in discussions about how to improve the value and impact of funded research.

*The Essential Guide to Using the Web for Research* SAGE Publications Ltd

Excerpt: ...tribe. He had faculties. He had also various idiosyncrasies. He was undeniably the best hunter and trapper and trainer of dogs to sledge, as well as the most expert upon snowshoes of all the

Indians living upon the point, and he was, furthermore, one of the dirtiest of them and the biggest drunkard whenever opportunity afforded. Fortunately for him and for his squaw, Bigbeam, as she had been facetiously named by an agent of the company, the opportunities for getting drunk were rare, for the company is conservative in the distribution of that which makes bad hunters. Given an abundance of firewater and tobacco, Red Dog was the happiest Indian between the

northern boundary of the United States and Lake Gary; deprived of them both he hunted vigorously, thinking all the while of the coming hour when, after a long journey and much travail, he should be in what was his idea of heaven again. To-day, though, the rifle bought from the company stood idle beside the ridge-pole, the sledge dogs snarled and fought upon the snow outside, and Bigbeam, squat and broad as became her name, looked askance at her lord as she prepared

the moose meat, uncertain of his temper, for his face was cloudy. Red Dog was, in fact, perplexed, and was planning deeply. Good reason was there for Red Dog's thought. Events of the immediate future were of moment to him and all his fellows, among whom, though no chief was formally acknowledged, he was recognized as leader; for had he not at one time been with the company as a hired hunter? Had he not once gone with a fur-carrying party even to

Hudson's Bay, and thence to the far south and even to Quebec? And did he not know the ways of the company, and could not he talk a French patois which enabled him to be understood at the stations? Now, as fitting representative of himself and of his clan, a great responsibility had come upon him, and he was lost in as anxious thought as could come to a biped of his quality. Like a more or less...

Powell on Real Property

SAGE Publications

This short and accessible

book is the first to focus exclusively on the inter-relation between transitional justice and rule of law reconstruction in post-conflict and post-authoritarian states. In so doing it provides a provocative reassessment of the various tangled relationships between the two fields, exploring the blind-spots, contradictions and opportunities for mutually-beneficial synergies in practice and scholarship between them. Though it is commonly assumed that transitional justice for

past human rights abuses is inherently conducive to restoring the rule of law, differences in how both fields conceptualise the rule of law, the scope of transition and obligations to citizens have resulted in divergent approaches to transitional criminal trial, international criminal law, restorative justice and traditional justice mechanisms. Adopting a critical comparative approach that assesses the experiences of post-authoritarian and post-conflict polities in Latin America, Asia, Europe and

Africa undergoing transitional justice and justice sector reform simultaneously, it argues that the potential benefits of transitional justice are exaggerated and urges policy-makers to rebalance the compromises inherent in transitional justice mechanisms against the foundational demands of rule of law reconstruction. This book will be of interest to scholars in the fields of transitional justice, rule of law, legal pluralism and peace-building concerned by the

failure of transitional justice to leave a positive legacy to the justice system of the states where it operates. 'This is a bold and nuanced scrutiny of the international system's approach to transitional justice and the much vaunted rule of law project. Dr McAulifee should be congratulated for this well-researched book which should be a must read for not only scholars and researchers in transitional justice and peace and conflict studies, but also policy-

makers in the international system.' Dr. Hakeem O. Yusuf, Senior Lecturer, University of Strathclyde and author of *Transitional Justice, Judicial Accountability and the Rule of Law*.

This book will be vital reading for anyone doing research, since using the web to find high quality information is a key research skill. It introduces beginners and experts alike to the most effective techniques for searching the web,

assessing and organising information and using it in a range of scenarios from undergraduate essays and projects to PhD research. Nigel Ford shows how using the web poses opportunities and challenges that impact on student research at every level, and he explains the skills needed to navigate the web and use it effectively to produce high quality work. Ford connects online skills to the research process. He helps readers to understand research questions and how to

answer them by constructing arguments and presenting evidence in ways that will enhance their impact and credibility. The book includes clear and helpful coverage of beginner and advanced search tools and techniques, as well as the processes of:  
 @!critically evaluating online information  
 @!creating and presenting evidence-based arguments  
 @!organizing, storing and sharing information  
 @!referencing, copyright and plagiarism. As well as

providing all the basic techniques students need to find high quality information on the web, this book will help readers use this information effectively in their own research. Nigel Ford is Professor in the University of Sheffield's Information

School.
