stories about 27 ways in Edited by Shannon Page It looks straightforward from the outside, doesn't it? Write an amazing book, get an agent, get a book deal, and voila! Fame and fortune! As you will see in these essays, however, a writer is vastly more likely to follow a complex, switch-backing trail than a straightforward path,

one strewn with the boulders of rejection letters, the quicksand of endless revisions, and the snake pits of publishing house reorganizations, business failures, and would-be scammers. To the right is the sheer cliff of despair; to the left, the impassible mountain of the slush pile. Fear not, brave writer! There is a destination at the end of that journey. Here are twenty-seven tales to inspire and encourage you-if they don't send you off to a more accessible pursuit, like lion-taming or rocket science or spinning straw into gold. “Three Years with the Rat is a mind-warping thriller that will make you question reality as you conceive of it. One of the most assured and haunting debuts I’ve read in recent memory.” —Blake Crouch, author of *Dark Matter* After several years of drifting between school and go-nowhere jobs, a young man is drawn back into the big city of his youth. The magnet is his beloved older sister, Grace: always smart and charismatic even when she was rebelling, and always his hero. Now she is a promising graduate student in psychophysics and the center of a group of

friends who take “Little Brother” into their fold, where he finds camaraderie, romance, and even a decent job. But it soon becomes clear that things are not well with Grace. Always acerbic, she now veers into sudden rages that are increasingly directed at her adoring boyfriend, John, who is also her fellow researcher. When Grace disappears, and John shortly thereafter, the narrator makes an astonishing discovery in their apartment: a box big enough to crawl inside, a lab rat, and a note that says This is the only way back for us. Soon he embarks on a mission to discover the truth, a pursuit that forces him to question time and space itself, and ultimately toward a

perilous confrontation at the very limits of imagination. This kinetic novel catapults the classic noir plot of a woman gone missing into the twenty-first-century city, where so-called reality crashes into speculative science. Jay Hosking's *Three Years with the Rat* is simultaneously a mind-twisting mystery that plays with the very nature of time and the story of a young man who must face the dangerously destructive forces we all carry within ourselves.

Greg Egan's *Perihelion Summer* is a story of people struggling to adapt to a suddenly alien environment, and the friendships and alliances they forge as they try to find their way in a world where the old maps have lost their meaning.

*Taraxippus* is coming: a black hole one tenth the mass of the sun is about to enter the solar system. Matt and his friends are taking no chances. They board a mobile aquaculture rig, the *Mandjet*, self-sustaining in food, power and fresh water, and decide to sit out the encounter off-shore. As *Taraxippus* draws nearer, new observations throw the original predictions for its trajectory into doubt, and by the time it leaves the solar

system, the conditions of life across the globe will be changed forever. Praise for *Perihelion Summer* “Egan here doubles down on climate change with his typically rigorous exploration of a cosmic accident’s effect on Earth and all its people. His characters are sharp and funny and their courageous response to the massive challenge they face works as a spur to cause us to think—why couldn’t we do as well with our own great challenge? This is what the best science fiction can do that no other genre can, and we need it now more than ever. Bravo!” — Kim Stanley Robinson At the Publisher's request, this title is being sold without Digital Rights Management Software

On board an obsolete ship, nine weeks out from home, the latest batch of colonists arrive at their destination. A grim penal settlement in a wilderness worlds away from the homes they will never see again. TASMANIA? BOTANY BAY? No. For this is tomorrow, not yesterday. The dumping ground for social outcasts and political deportees is Mars, barren, unproductive, but invaluable as a convict settlement. What kind of welcome will the twenty-four deportees receive when the reception party from the Settlement reaches their stranded ship? And how will they survive in a primitive

environment, an alien system?

From acclaimed, award-winning author Jo Walton: *Philosopher Kings*, a tale of gods and humans, and the surprising things they have to learn from one another. Twenty years have elapsed since the events of *The Just City*. The City, founded by the time-traveling goddess Pallas Athene, organized on the principles espoused in Plato's Republic and populated by people from all eras of human history, has now split into five cities, and low-level armed conflict between them is not unheard-of. The god Apollo, living (by his own choice) a human life as "Pythias" in the City, his true identity known only to

a few, is now married and the father of several children. But a tragic loss causes him to become consumed with the desire for revenge. Being Apollo, he goes handling it in a seemingly rational and systematic way, but it's evident, particularly to his precocious daughter Arete, that he is unhinged with grief. Along with Arete and several of his sons, plus a boatload of other volunteers--including the now fantastically aged Marsilio Ficino, the great humanist of Renaissance Florence--Pythias/Apollo goes sailing into the mysterious Eastern Mediterranean of pre-antiquity to see what they can find—possibly the man who may have caused his great grief, possibly communities

of the earliest people to call themselves "Greek." What Apollo, his daughter, and the rest of the expedition will discover...will change everything. At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied.  
*Starlings* Small Beer Press  
 From the 2017 John W. Campbell Award Winner for Best Writer, Ada Palmer's *Perhaps the Stars* is the final book of the Hugo Award-shortlisted *Terra Ignota* series. *World Peace* turns into global civil war. In the future, the leaders of Hive nations—nations without fixed location—clandestinely committed nefarious deeds in order to maintain an outward semblance of utopian

stability. But the facade could only last so long. The comforts of effortless global travel and worldwide abundance may have tempered humanity's darkest inclinations, but conflict remains deeply rooted in the human psyche. All it needed was a catalyst, in form of special little boy to ignite half a millennium of repressed chaos. Now, war spreads throughout the globe, splintering old alliances and awakening sleeping enmities. All transportation systems are in ruins, causing the tyranny of distance to fracture a long-united Earth and threaten to obliterate everything the Hive system built. With the arch-criminal Mycroft nowhere to be found, his successor, Ninth

Anonymous, must not only chronicle the discord of war, but attempt to restore order in a world spiraling closer to irreparable ruin. The fate of a broken society hangs in the balance. Is the key to salvation to remain Earth-bound or, perhaps, to start anew throughout the far reaches of the stars? Liz McGinnis never imagined herself living

in a luxurious gated community like The Palms. Ever since she and her family moved in, she's felt like an outsider amongst the Stepford-like wives and their obnoxiously spoiled children. Still, she's determined to make it work—if not for herself, then for her husband, Phil, who landed them this lavish home in the first place, and for her daughter, Danielle, who's about to enter high school. Yet underneath the glossy veneer of The Palms, life is far from idyllic. In a place where reputation is everything, Liz soon discovers that even the friendliest residents can't be trusted. So when the gorgeous girl next door befriends Danielle, Liz can't help but find sophisticated Kelsey's interest in her

shy and slightly nerdy daughter a bit suspicious. But while Kelsey quickly becomes a fixture in the McGinnis home, Liz's relationships with both Danielle and Phil grow strained. Now even her own family seems to be hiding things, and it's not long before their dream of living the high life quickly spirals out of control... Provocative, erudite, inventive, resplendent.” —Ken Liu, author of *The Grace of Kings* The long years of near-utopia have come to an abrupt end. Peace and order are now figments of the past. Corruption, deception, and insurgency hum within the once steadfast leadership of the Hives, nations without fixed location. The heartbreaking truth is that for decades, even centuries, the leaders of the great Hives

bought the world's stability with a trickle of secret murders, mathematically planned. So that no faction could ever dominate. So that the balance held. The Hives' façade of solidity is the only hope they have for maintaining a semblance of order, for preventing the public from succumbing to the savagery and bloodlust of wars past. But as the great secret becomes more and more widely known, that façade is slipping away. Just days earlier, the world was a pinnacle of human civilization. Now everyone—Hives and hiveless, Utopians and sensayers, emperors and the downtrodden, warriors and saints—scrambles to prepare for the

seemingly inevitable war. “Seven Surrenders veers expertly between love, murder, mayhem, parenthood, theology, and high politics. ... and nothing is as he remembers. In his mind he's a teenager, a cadet—a nobody. But he finds himself in the body of an old man, a general controlling the

elite forces of the hexarchate, and the most feared—and reviled—man in the galaxy. Jedao carries orders from Hexarch Nirai Kujen to reconquer the fractured pieces of the hexarchate on his behalf.
