"High praise to Hodgson, Lamson, Mendenhall, and Crane and in creating a seminal work for systemic researchers, educators, supervisors, policy makers and financial experts in health care. The comprehensiveness and innovation explored by every author reflects an in depth understanding that reveals true pioneers of integrated health care. *Medical Family Therapy: Advances in Application* will lead the way for Medical Family Therapists in areas just now being acknowledged and explored." - Tracy Todd, PhD, LMFT, Executive Director of the American Association for Marriage and Family Therapy Integrated, interdisciplinary health care is growing in stature and gaining in numbers. Systems and payers are facilitating it. Patients and providers are benefitting from it. Research is supporting it, and policymakers are demanding it. The emerging field of Medical Family Therapy (MedFT) is contributing greatly to these developments and *Medical Family Therapy: Advanced Applications* examines its implementation in depth. Leading experts describe MedFT as it is practiced today, the continuum of services provided, the necessary competencies for practitioners, and the biological, psychological, social, and spiritual aspects of health that the specialty works to integrate. Data-rich chapters model core concepts such as the practitioner as scientist, the importance of context in health care settings, collaboration with families and communities, and the centrality of the relational perspective in treatment. And the book's wide-spectrum coverage takes in research, training, financial, and policy issues, among them: Preparing MedFTs for the multiple worlds of health care Extending platforms on how to build relationships in integrated care Offering a primer in program evaluation for MedFTs Ensuring

health equity in MedFT research Identifying where policy and practice collide with ethics and integrated care Recognizing the cost-effectiveness of family therapy in health care With its sophisticated insights into the current state – and the future – of healthcare reform, *Medical Family Therapy: Advanced Applications* is essential reading for researchers and practitioners in the fields of clinical psychology, counseling, family therapy, healthcare policy, psychiatric nursing, psychiatry, public health, and social work.

Designing and Conducting Health Surveys is written for students, teachers, researchers, and anyone who conducts health surveys. This third edition of the standard reference in the field draws heavily on the most recent methodological research on survey design and the rich storehouse of insights and implications provided by cognitive research on question and questionnaire design in particular. This important resource presents a total survey error framework that is a useful compass for charting the dangerous waters between systematic and random errors that inevitably accompany the survey design enterprise. In addition, three new studies based on national, international, and state and local surveys—the UNICEF Multiple Indicator Cluster Surveys, California Health Interview Survey, and National Dental Malpractice Survey—are detailed that illustrate the range of design alternatives available at each stage of developing a survey and provide a sound basis for choosing among them.

Admiral James G. Stavridis, USN, reflects on his tenure as Commander of United States Southern Command (SOUTHCOM).

The first Admiral to command Southern Command, Admiral Stavridis broke with tradition from day one, discarding the customary military staff model and creating an innovative organization designed not solely to subdue adversaries, but... to build durable and lasting partnerships. From his unique perspective as commander, Stavridis uses his personal style to describe his vision for the command's role in the Americas, making most of limited resources to create goodwill and mutual respect, while countering illegal drug trafficking, overcoming a dangerous insurgency in Colombia, and responding to humanitarian crises. He devotes chapters to USSOUTHCOM's role in nurturing institutional respect for human rights among military and security forces of the region, advancing health security, and supporting a new regional strategy to counter the increasing challenge of urban and transnational gang violence. Citing the hemisphere's common geography, culture, economy, and history, Stavridis makes a case for a common approach and strategy for defending our "shared home of the Americas" through an international, interagency, and private-public approach, all connected through coherent effective strategic communication--

As Dr. Ryan shares insights from these impact innovators about how we can meet these challenges in the next few decades and beyond, she encourages readers to think about how our own consequential actions in the present can propel us—individually and collectively—toward more optimal futures. Or increasingly destructive futures.
