Mansourou comes out of the gate firing and does not relent in this criticism of religious notions and influence. Rather than refer to religion in general terms or acts in the name of religion, Mansourou attacks religious undertones and what is not often looked at in religious subtext along with modern religious theology for their shallow and vacant themes in today's complex society.

On the origin of Mind

" ... Structure of capitalism, the nature and history of social class, and the role of the state [government]. Attention is also paid to social inequality in Canadian society as manifest in income, race, ethnicity, and gender, as well as to the ways in which the agents of socialization -- particularly the mass media and the education system -- help perpetuate the dominant ideologies."--Back cover.

For seventeen-year-old Lena, living in the trailer park with the rest of town's throwaways isn't exactly paradise. Dealing with a drunken father who can't keep his fists to himself doesn't help matters either. The only good thing in her life, other than track, is the mysterious man who visits her dreams, promising to find her. When a chair burns her arms, Lena chalks it up to stress-induced crazy. Yet as bizarre incidents escalate, even being crazy can't explain it all away... until one day dream guy does find her. Tarek lost Lena seventeen years ago after she was accused of treason and

marked Tainted. He finally discovers her reborn on Earth into a life of suffering as punishment for her crime. However, someone else has already found her... and wants her dead. Willing to sacrifice everything, he fights to keep her safe so she can live the only life she's ever known-even if that life doesn't include him.

The author uses prose and poetry to describe the nature of his unexpected relationship with a married woman. The book also features events which shaped his life from an early age as well as an analysis of current events and the alarming trends shaping our society. This work of nonfiction is told from an unabashed, conservative viewpoint. While highly critical of politicians and contemporary politics, there is a prevailing sense of optimism based on the power of individuality and spirituality.

A "brilliant" (The Washington Post), "clear-eyed and incisive" (The New Republic) analysis of how the wealthiest group in American society is making life miserable for everyone—including themselves. In 21st-century America, the top 0.1% of the wealth distribution have walked away with the big prizes even while the bottom 90% have lost ground. What's left of the American Dream has taken refuge in the 9.9% that lies just below the tip of extreme wealth. Collectively, the members of this group control more than half of the wealth in the country—and they are doing whatever it takes to hang on to their piece of the action in an increasingly unjust system. They log insane hours at the office and then turn their leisure time into an excuse for more career-building, even as they rely on an underpaid servant class to power their economic success and satisfy their personal needs. They have segregated themselves into zip codes designed to exclude as many people as possible. They have made fitness a national obsession even as swaths of the population lose healthcare and grow sicker. They have created an unprecedented demand for admission to elite schools and helped to fuel the dramatic cost of higher education. They channel their political energy into symbolic conflicts over identity in order to avoid acknowledging the economic roots of their privilege. And they have created an ethos of "merit" to justify their advantages. They are all around us. In fact, they are us—or what we are supposed to want to be. In this "captivating account" (Robert D. Putnam, author of *Bowling Alone*), Matthew Stewart argues that a new aristocracy is emerging in American society

and it is repeating the mistakes of history. It is entrenching inequality, warping our culture, eroding democracy, and transforming an abundant economy into a source of misery. He calls for a regrouping of American culture and politics on a foundation closer to the original promise of America.

The Sociological Imagination Penguin

From the author of *Guns, Germs and Steel*, Jared Diamond's *Collapse: How Societies Choose to Fail or Survive* is a visionary study of the mysterious downfall of past civilizations. Now in a revised edition with a new afterword, Jared Diamond's *Collapse* uncovers the secret behind why some societies flourish, while others founder - and what this means for our future. What happened to the people who made the forlorn long-abandoned statues of Easter Island? What happened to the architects of the crumbling Maya pyramids? Will we go the same way, our skyscrapers one day standing derelict and overgrown like the temples at Angkor Wat? Bringing together new evidence from a startling range of sources and piecing together the myriad influences, from climate to culture, that make societies self-destruct, Jared Diamond's *Collapse* also shows how - unlike our ancestors - we can benefit from our knowledge of the past and learn to be survivors. 'A grand sweep from a master storyteller of the human race' - Daily Mail 'Riveting, superb, terrifying' - Observer 'Gripping ... the book fulfils its huge ambition, and Diamond is the only man who could have written it' - Economist 'This book shines like all Diamond's work' - Sunday Times

The study of communication, language, and discourse is at once simple, elegant, and complex. Each of these areas is informed by "micro" subjective experiences of individuals and the "macro" processes of a culture. Communication itself is thoroughly modern yet it seeks anchorage in the traditions of the humanities and social sciences. All of this creates a significant challenge. In this monograph, Ellis considers the study of communication as he discusses three key issues in communication theory: (1) the growing emphasis on meaning, (2) the importance of a mediated culture, and (3) the links between micro communication activities and macro social categories such as ethnicity and social class. In response to these three issues, this book deals with the way people use language and communication to construct their world; this world is not constructed purely but is influenced by attitudes, ideologies, and biases. In the modern world the medium of communication has an impact on consciousness and society, and Ellis shows how the media are responsible for some of the fault lines in society. The book also explores principles of medium theory and documents the impact of media on psychological and sociological phenomena. Finally, work of Goffman, Giddens, and Randall Collins is extended to show how micro communication behaviors are implicated in and by social conditions. **ADDITIONAL COPY FOR MAILER** Expanded features: * The chapters work out a logic connecting real communication patterns with the broad principles upon which societies are explored. Thus the title "Crafting" Society--the crafting is purposefully active to indicate the dynamic processes involved in creating what we call society. Society and culture have their roots and empirical bases in communication; that is, in the daily struggles of interaction. * Two chapters on two of the most important and controversial issues of the day--ethnicity and class. These two chapters are clear illustrations of the new theoretical principles discussed throughout the book. * A chapter on social class is very unique for a book devoted to communication processes.

Communication theorists do not usually write about class, even though it is a highly symbolic process and rooted in communication patterns. Class is a difficult concept in America since so few people, other than sociologists, care to talk about it. * A chapter on medium theory takes the bold step of experimenting a little by summarizing basic causal statements and propositions. This device underscores the goal of a theory which is to come to grips with testable statements. The focus is on medium theory and how the media influence consciousness and social structure. * A unique chapter takes up the issue of how communication processes are constitutive of social structures. It draws on work by Giddens and others to return to a concept of structure based on actions that produce and reproduce structure.

It had seemed so simple, even fun, when they explained it: New York needed non-satellite-based relay towers. Commco sent me to find towns along the needed pathway, to offer to restore some of the boons of civilization in return for an agreement to build, power and guard the towers. After all, it had only been fifty years. I would never have believed that the countryside would have turned barbaric so fast. Thus begins Martin Barrister's journey through an unfamiliar landscape, where his training and skills are of little help, and only quick wits and creativity will allow him to survive. When his job turns out to be a ruse, and he becomes bait in a dispute he can barely fathom, Martin discovers what loyalty is worth. And what civilization is - and isn't - comprised of.

Golding's iconic 1954 novel, now with a new foreword by Lois Lowry, remains one of the greatest books ever written for young adults and an unforgettable classic for readers of any age. This edition includes a new Suggestions for Further Reading by Jennifer Buehler. At the dawn of the next world war, a plane crashes on an uncharted island, stranding a group of schoolboys. At first, with no adult supervision, their freedom is something to celebrate. This far from civilization they can do anything they want. Anything. But as order collapses, as strange howls echo in the night, as terror begins its reign, the hope of adventure seems as far removed from reality as the hope of being rescued.

Time for Anything Rowman & Littlefield

IN A PLACE OF PEACE DURING A TIME OF WAR THE UNFORGIVEN WILL NOT GO FORGOTTEN. Edenville, 1940. In a rural hamlet where the majority of men are overseas to fight Hitler's Nazi war machine, someone is killing veterans of the first world war. Wartime Special Constable 'Lame' Eddie Sommers, a crippled rich boy and the butt of derision, is doing his best to fill a uniform he believes in, yet wears too large. Inexperienced and out of his depth, he turns to a former detective and veteran of the western front for assistance. Involving Marshall Geary might be his biggest mistake. Marshall wears a copper mask, as much to hide behind as to conceal his disfigurements. He struggles against howling flashbacks and the lingering stench of his own concealed crimes. In a town meant for sanctuary, repressed horrors awaken like worms in a collapsing coffin. The closer they get to the truth, the nearer everyone is dragged to their limits, their failings and their buried pasts.

Research into the impact of the First World War on European societies has recently begun on a major scale and Dr Waites has been one of the pioneers in this field in Britain. His book considers the War's effects on such major issues as popular images of class, the distribution of income and wealth in society, social relations within the working class, class consciousness and the educational experiences of children from different backgrounds. This study is noteworthy not only for its wide range of hitherto unpublished sources, but also for its attempt to bring social theory to bear upon the study of class relations in England during the first of this century's total wars.

Exposing the social and political landscape of homelessness in Fresno, Dispatches from the War Zone offers the reader a rare opportunity to understand this issue from the perspective of the homeless, their allies and an investigative journalist who closely followed this story for more than 10 years. What at first appeared to be builders and developers working with Fresno City Hall and the police to move the homeless to more remote areas of town turns into something else entirely. We find government corruption, a class action lawsuit against the city for its unconstitutional attacks against the homeless and the suspicious death of Pamela Kincaid, the lead plaintiff in the legal action. Originally, it was the federal government's de-funding of affordable housing in the early 1980s that led to today's homeless crisis. The book examines those structural reasons for homelessness but also looks at what grassroots groups in Fresno, working on alternatives, have accomplished. Although the end to homelessness has been elusive for those groups doing business as usual, the paradigm shifts this book suggests give new hope that a better world is possible. There is a pathway to ending homelessness and treating all people with the dignity and respect they deserve.

The New Class Society Angelpay Foundation

From one of our most important scholars and civil rights activist icon, a powerful study of the women's liberation movement and the tangled knot of oppression facing Black women. "Angela Davis is herself a woman of undeniable courage. She should be heard."—The New York Times Angela Davis provides a powerful history of the social and political influence of whiteness and elitism in feminism, from abolitionist days to the present, and demonstrates how the racist and classist biases of its leaders inevitably hampered any collective ambitions. While Black women were aided by some activists like Sarah and Angelina Grimke and the suffrage cause found unwavering support in Frederick Douglass, many women played on the fears of white supremacists for political gain rather than take an intersectional approach to liberation. Here, Davis not only contextualizes the legacy and pitfalls of civil and women's rights activists, but also discusses Communist women, the murder of Emmitt Till, and Margaret Sanger's racism. Davis shows readers how the inequalities between Black and white women influence the contemporary issues of rape, reproductive freedom,

housework and child care in this bold and indispensable work.

In the most complete, accurate and accessible presentation of Karl Marx's theory of capitalism to date, Johan Fornäs presents a guide for anyone who wants to understand how today's crisis-ridden society has emerged and is able to sustain and intensify its own deep inner contradictions. Capitalism clearly explains these contradictions, which are so relevant again today in the wake of the financial crisis. This clear and engaging guide explains capitalism for absolute beginners. Fornäs situates Marx's ideas in context, remaining faithful to the concepts and structure of his work. This complete introduction to Marx's economy critique covers all three volumes of Capital. It explores all the main aspects of Marx's work - including his economic theory, his philosophical sophistication and his political critique - introducing the reader to Marx's typical blend of sharp arguments, ruthless social reportage and utopian visions. This book will be of interest to students throughout the social sciences and humanities, including those studying sociology, social theory, economics, business studies, history, cultural studies, and politics.
