Organized by content areas rather than by theory, this comprehensive, accessible handbook helps readers gain greater insight into how key theories have impacted today's family research. Most competing books, organized by theory, do not provide a strong sense of the links between theory and research. Using the 2000 and 2010 decade-in-review issues of the *Journal of Marriage and Family* as a resource, the book addresses the most important topics impacting family studies research today. The introductory chapter, written by the editors, provides an overview of the role family theories have had on the field. This chapter is followed by 23 others on family-related content areas written by renowned scholars in the field. The book is organized around the most important domains in the field: parenting and parent-child relationships, romantic relationships, conflict and aggression, structural variation and transitions, demographic variations, and families and extra-familial institutions. Each of the contributors describes how theory has been used to generate new knowledge in the field and suggests future directions for how theory may be used to extend our knowledge base. The book helps readers acquire a working knowledge of the key family science theories, findings, and issues and understand how researchers make use of these theories in their empirical efforts. To maximize accessibility, each of the renowned contributors addresses a common set of issues in their chapter:

- Introduction to the content area
- Review of the key topics, issues, and findings
- A description of each of the major theories used to study that particular content area
- Limitations of the theories
- Suggestions for better use of the theories and/or new theoretical advances
- Conclusions about future theoretical developments.

An ideal text for graduate and/or advanced undergraduate family theories courses, this book's unique organization also lends itself to use in content-based family studies/science courses taught in family studies, human development, psychology, sociology, communication, education, and nursing. Due to its comprehensive and current approach, the book also appeals to scholars and researchers in these areas.

Research is vital in moving the field of family therapy forward, but the myriad of possibilities inherent in working with systems and individuals can overwhelm even the most seasoned researcher. *Advanced Methods in Family Therapy Research* is the best resource to address the day-to-day questions that researchers have as they investigate couples and families, and the best source for learning long-term theory and methodology. The contributors of this volume share their wisdom on a wide variety of topics including validity concerns, measuring interpersonal process and relational change, dyadic data analysis (demonstrated through a sample research study), mixed methods studies, and recruitment and retention. The volume contains one of the most detailed descriptions of data collections and covers interviewing, using questionnaires, and observing brain activity. Also addressed are suggestions to meaningfully reduce cultural bias, to conduct ethical research, and, in the Health Services Research chapter, to examine interventions for clients in various

income brackets. A separate, ground-breaking chapter also addresses psychophysiological research in a couple and family therapeutic context. As an added benefit, readers will learn how to become informed consumers of journal articles and studies, how to produce quality, publishable research, and how to write fundable grant proposals. Each chapter provides a clear and detailed guide for students, researchers, and professionals, and as a whole *Advanced Methods in Family Therapy Research* advances the field by teaching readers how to provide evidence that marriage and family therapy not only relieves symptoms, but also effects behavioral change in all family members.

Handbook of Applied Developmental Science SAGE

This handbook brings together the international research focussing on prisoners' families and the impact of imprisonment on them. Under-researched and under-theorised in the realm of scholarship on imprisonment, this handbook encompasses a broad range of original, interdisciplinary and cross-national research. This volume includes the experiences of those from countries often unrepresented in the prisoner's families' literature such as Russia, Australia, Israel and Canada. This broad coverage allows readers to consider how prisoners' families are affected by imprisonment in countries embracing very different penal philosophies; ranging from the hyper-incarceration being experienced in the USA to the less punitive, more welfare-orientated practices under Scandinavian 'exceptionalism'. Chapters are contributed by scholars from numerous and diverse disciplines ranging from law, nursing, criminology, psychology, human geography, and education studies. Furthermore, contributions span various methodological and epistemological approaches with important contributions from NGOs working in this area at a national and supranational level. The Palgrave Handbook of Prison and the Family makes a significant contribution to knowledge about who prisoners' families are and what this status means in practice. It also recognises the autonomy and value of prisoners' families as a research subject in their own right.

Handbook of Family Theories SAGE

While insights sometimes are slow in coming, they often seem obvious when they finally arrive. This handbook is an outcome of the insight that the topics of social support and the family are very closely linked. Obvious as this might seem, the fact remains that the literatures dealing with social support and the family have been deceptively separate and distinct. For example, work on social support began in the 1970s with the accumulation of evidence that social ties and social integration play important roles in health and personal adjustment. Even though family members are often the key social supporters of individuals, relatively little research of social support was targeted on family interactions as a path to specifying supporter processes. It is now recognized that one of the most important features of the family is its role in providing the individual with a source of support and acceptance. Fortunately, in recent years, the distinctness and separateness of the fields of social support and the family have blurred. This handbook provides the first collation and integration of social support and family research. This integration calls for specifying processes (such as the cognitions associated with poor support availability and unrewarding family constellations) and factors (such as cultural differences in family life and support provision) that are pertinent to integration.

Sponsored by the National Council on Family Relations, the *Sourcebook of Family Theory and Research* is the reference work on theory and methods for family scholars and students around the world. This volume provides a diverse, eclectic, and paradoxically mature approach to theorizing and demonstrates how the development of theory is crucial to the future of family research. The *Sourcebook* reflects an interactive approach that focuses on the process of theory building and designing research, thereby engaging readers in "doing" theory rather than simply

reading about it. An accompanying Web site, <http://www.ncfr.org/sourcebook>, offers additional participation and interaction in the process of doing theory and making science.

Resilience is a topic that is currently receiving increased attention. In general, resilience refers to the capacity of those who, even under the most stressful circumstances, are able to cope, to rebound, and to go on and thrive. Resilient families are able to regain their balance following crises that arise as a function of either nature or nurture, and to continue to encourage and support their members as they deal with the necessary requirements for accommodation, adaptation and, ultimately, healthy survival. *Handbook of Family Resilience* provides a broad body of knowledge regarding the traits and patterns found to characterize resilient individuals and well-functioning families, including those with diverse structures, various ethnic backgrounds and a variety of non-traditional forms. This *Handbook* brings together a variety of perspectives aimed at understanding and helping to facilitate resilience in families relative to a full range of challenges.

In today's industrialized societies, the majority of parents work full time while caring for and raising their children and managing household upkeep, trying to keep a precarious balance of fulfilling multiple roles as parent, worker, friend, & child. Increasingly demands of the workplace such as early or late hours, travel, commute, relocation, etc. conflict with the needs of being a parent. At the same time, it is through work that people increasingly define their identity and self-worth, and which provides the opportunity for personal growth, interaction with friends and colleagues, and which provides the income and benefits on which the family subsists. The interface between work and family is an area of increasing research, in terms of understanding stress, job burn out, self-esteem, gender roles, parenting behaviors, and how each facet affects the others. The research in this area has been widely scattered in journals in psychology, family studies, business, sociology, health, and economics, and presented in diverse conferences (e.g., APA, SIOP, Academy of Management). It is difficult for experts in the field to keep up with everything they need to know, with the information dispersed. This *Handbook* will fill this gap by synthesizing theory, research, policy, and workplace practice/organizational policy issues in one place. The book will be useful as a reference for researchers in the area, as a guide to practitioners and policy makers, and as a resource for teaching in both undergraduate and graduate courses.

Interdisciplinary Perspectives SAGE Publications, Incorporated
Over the last three decades, family therapy has revolutionized the mental health field, changing the way human problems are conceived and therapy is conducted. In concert with the dynamic growth of family therapy, the field of family therapy training and supervision has also expanded enormously yielding many new ideas and skills. Yet, until now, few books have been devoted to it, and no single volume has attempted to relate the full breadth of this growing field in terms of its conceptual and theoretical expansion as well as its practical application. **HANDBOOK OF FAMILY THERAPY TRAINING AND SUPERVISION** fills this need by presenting a truly comprehensive view of this dynamic area. To accomplish this broad yet in-depth scope, editors Liddle, Breunlin, and Schwartz have assembled 30 highly acclaimed authorities to author chapters in their respective areas of expertise. For further clarification, the editors have included segues that introduce and analyze each of the book's four major sections providing the reader with an overview of the section, highlights of themes that run through it, and discussion of the issues raised in a way that ties the chapters together. The book opens with a presentation of the unique and innovative approaches to training and supervision that have evolved in each separate school of family therapy. Offering a panoramic view of the entire field of family therapy, these seven chapters allow for fascinating comparisons among the different schools regarding the process by which ideas about therapy evolve into training techniques and philosophies. Section II follows with an explication of the pragmatics of family therapy supervision. Helping family therapy trainers avoid and anticipate the common mistakes involved with supervision, the skills described in this section create an atmosphere conducive to learning and maintaining a working trainer-trainee relationship, and finally, for training of supervisors. Practical guidelines for using live and video supervision are included. Section III features family therapy trainers in such diverse fields as psychiatry, psychology, family medicine, social work, nursing, free-standing

and academic family therapy programs, who describe the problems and advantages they encounter teaching these new ideas within their idiosyncratic contexts. The book closes with a section that includes reflections on the field by such innovative and respected leaders as Cloe Madanes and Jay Haley. Among topics covered are perspectives and recommendations for researchers evaluating family therapy, practical advice for incorporating a cultural perspective into training programs, feedback on the experience of live supervision from trainees' perspectives. An appendix follows that provides over 400 references organized by subject for easy reference. Given the level and scope of this extraordinary text, **FAMILY THERAPY TRAINING AND SUPERVISION** is an invaluable resource for anyone interested in teaching, learning, or simply appreciating family therapy.

"This engaging collection gathers theoretical and empirical insights from leading family policy experts. The authors - representing diverse countries, disciplines, and methods - bring to life the volume's innovative conceptual framework, which is organized around policy institutions, both public and private. The volume closes with a call for new lines of research that should inform family policy scholars for years to come."--Janet Gornick, Professor of Political Science and Sociology, and Director of the Stone Center on Socio-Economic Inequality, The Graduate Center, City University of New York, USA "Featuring exciting contributors from a range of often-siloed scholarly disciplines, countries and cultures, this Handbook offers nuanced insights into how interacting societal inequality factors influence family policy enactment to reinforce or improve inequality outcomes across gender, class, and nations. It is ambitious, broad-reaching, and succeeds in providing a strategic view within and across nations to inspire thoughtful evidence-based policy implications to improve societies in the future." - Ellen Ernst Kossek, Basil S. Turner Professor of Management, Purdue University, USA This open access handbook provides a multilevel view on family policies, combining insights on family policy outcomes at different levels of policymaking: supra-national organizations, national states, sub-national or regional levels, and finally smaller organizations and employers. At each of these levels, a multidisciplinary group of expert scholars assess policies and their implementation, such as child income support, childcare services, parental leave, and leave to provide care to frail and elderly family members. The chapters evaluate their impact in improving children's development and equal opportunities, promoting gender equality, regulating fertility, productivity and economic inequality, and take an intersectional perspective related to gender, class, and family diversity. The editors conclude by presenting a new research agenda based on five major challenges pertaining to the levels of policy implementation (in particular globalization and decentralization), austerity and marketization, inequality, changing family relations, and welfare states adapting to women's empowered roles
