This is the story of one of the youngest county prosecutors in the country whose mission was to finally end the system of vice and corruption that had infiltrated Seattle's police department, municipal departments, and even the mayor's office. In the late 1960s, Christopher T. Bayley was a young lawyer with a fire in his belly to break the back of Seattle's police payoff system, which was built on licensing of acknowledged illegal activity known as the "tolerance policy." Against the odds, he became the youngest prosecutor in King County (which includes Seattle). Six months into his first term, he indicted a number of prominent city and police officials. Bayley shows how vice and payoffs became rules of the game in Seattle, and what it took to finally clean up the city.

Am I ready to be a mom (and will I be good at it)? How do I make that happen (Sex Ed. was so long ago)? When does morning sickness end (and why does it last all day)? Why is everyone touching my belly (and how do I make them stop)? Are contractions supposed to hurt this bad (or am I being a sissy)? Is this kid supposed to eat so often (and will my shirts ever button again)? Where is the old me (and do I even want her back)? The frank humor and refreshing honesty with which Crib Notes approaches conception, pregnancy, and parenthood will not only provide a welcome distraction from all those questions in your pretty little head, but will offer some explanations along the way as well. True Confessions of real moms at various stages of motherhood, and a mini Daddy Dictionary are added bonus features!

This volume covers aspects of sudden infant and early childhood death, ranging from issues with parental grief, to the most recent theories of brainstem neurotransmitters. It also deals with the changes that have occurred over time with the definitions of SIDS (sudden infant death syndrome), SUDI (sudden unexpected death in infancy) and SUDIC (sudden unexpected death in childhood). The text will be indispensable for SIDS researchers, SIDS organisations, paediatric pathologists, forensic pathologists, paediatricians and families, in addition to residents in training programs that involve paediatrics. It will also be of use to other physicians, lawyers and law enforcement officials who deal with these cases, and should be a useful addition to all medical examiner/forensic, paediatric and pathology departments, hospital and university libraries on a global scale. Given the marked changes that have occurred in the epidemiology and understanding of SIDS and sudden death in the very young over the past decade, a text such as this is very timely and is also urgently needed.

Gain the skills and knowledge needed to create effective data security systems This book updates readers with all the tools, techniques, and concepts needed to understand and implement data security systems. It presents a wide range of topics for a thorough understanding of the factors that affect the efficiency of secrecy, authentication, and digital signature schema. Most importantly, readers gain hands-on experience in cryptanalysis and learn how to create effective cryptographic systems. The author contributed to the design and analysis of the Data Encryption Standard (DES), a widely used symmetric-key encryption algorithm. His recommendations are based on firsthand experience of what does and does not work. Thorough in its coverage, the book starts with a discussion of the history of cryptography, including a description of the basic encryption systems and many of the cipher systems used in the twentieth century. The author then discusses the theory of symmetric- and public-key cryptography. Readers not only discover what cryptography can do to protect sensitive data, but also learn the practical limitations of the technology. The book ends with two chapters that explore a wide range of cryptography applications. Three basic types of chapters are featured to facilitate learning: Chapters that develop technical skills Chapters that describe a

cryptosystem and present a method of analysis Chapters that describe a cryptosystem, present a method of analysis, and provide problems to test your grasp of the material and your ability to implement practical solutions With consumers becoming increasingly wary of identity theft and companies struggling to develop safe, secure systems, this book is essential reading for professionals in e-commerce and information technology. Written by a professor who teaches cryptography, it is also ideal for students.

This is an account, at once rigorously theological and warmly devotional, of the death and resurrection of Christ, and their significance for the Christian life. Von Balthasar offers sharp insights into some current controversies-for example, the 'bodiliness' of the Resurrection-and spiritual inspiration for the year round. This scholarly reflection of the climax of the Christian year is an established classic of contemporary Catholic theology.

Certified sleep consultant Natalie Willes, known also as The Baby Sleep Trainer, shares her effective and efficient sleep training method in her new book, *Getting Your Baby to Sleep the Baby Sleep Trainer Way*. Thousands of families throughout the world have used the Baby Sleep Trainer method to help their infants and toddlers learn to sleep through the night and take healthy naps, all with the fewest tears possible. Backed by thorough scientific data and years of professional experience, the Baby Sleep Trainer Method offers parents a tried and true solution for children aged 16 weeks through 3.5 years. Step-by-step, comprehensive contents include: The science of baby sleep habits How to prepare your child's room for optimal sleep Discussions on cortisol and crying in babies Creating healthy sleep habits with newborns Exactly when and how to start sleep training for nighttime sleep and naps Tips and tricks for multiples Troubleshooting common sleep training issues and pitfalls Detailed eat-wake-sleep schedules for children on 3, 2, and 1 nap Sleep training toddlers and children in beds Praise for the Baby Sleep Trainer method: "My 5 month old was waking up every 2-3 hours at night and I was seriously sleep deprived. My sleep deprivation was affecting every aspect of my life. I read several books on sleep training, as well as blogs and websites. I was at my wits end. After following the program for two weeks, my child was consistently sleeping 11-12 hours a night and was on a consistent schedule during the day! This program has literally given me my life back." - McKel Neilsen "Two months ago I was at

the end of my sleep rope with our 6-month-old, boy/girl twins. Exhausted doesn't begin to explain it, I felt desperate. After using the Baby Sleep Trainer Method we feel like we have our lives back. The babies are happy and well rested, and so are we! We have our evenings back to cook dinner, spend time with our 4-year-old daughter, hang out together, and actually do things we enjoy. The process took commitment but has been absolutely worth every bit of it." - Beth Oller, MD "Using the Baby Sleep Trainer Method, my daughter quickly went to a routine nap schedule during the day and sleeping through the night from 6:30pm to 6:30am! Also, rather than the exhausting and often unsuccessful rocking or soothing or feeding to sleep, we were able to put her down awake in her crib and she would fall asleep on her own in just a few minutes. It was just incredible." - Online Review

The crib: its meaning

This classic psychological case study focuses on one talkative child's emerging ability to use language, her capacity for understanding, for imagining, and for making inferences and solving problems. In wide-ranging essays, scholars offer multifaceted linguistic and psychological analyses of two-year-old Emily's bedtime conversations with her parents and pre-sleep monologues, taped over a fifteen-month period. In a foreword written for this new edition, Emily, now an adult, reflects on the experience of having been a research subject without knowing it.
