Electronic Design's Gold Book Fonthill Media

By presenting the basics of building science along with a prescribed set of details, *Designing the Exterior Wall* helps you understand why buildings fail and how they can be made more durable through design. Author Linda Brock connects the science and aesthetics of building envelopes through the examination of a variety of construction and cladding types. She features details from real world projects in a variety of climates, successful and unsuccessful case studies, and checklists you can use on your own projects. Helps you reduce your liability by showing why building envelopes fail and how they can be designed to endure. Moves from theory to actual construction by including hundreds of building envelope details from a broad array of projects and climates. Integrates numerous contemporary case studies, including Frank Gehry's Experiential Music Center in Seattle (thin skins), Renzo Piano's Rue de Meaux housing in Paris (terra cotta cladding), and Mario Botta's San Francisco Museum of Modern Art (prefabricated brick panels). *Designing the Exterior Wall* is a must-have book, whether you're an architect or a student. Order your copy today.

Whether seeking deeper knowledge of LabVIEW®'s capabilities or striving to build enhanced VIs, professionals know they will find everything they need in *LabVIEW: Advanced Programming Techniques*. Now accompanied by *LabVIEW 2011*, this classic second edition, focusing on LabVIEW 8.0, delves deeply into the classic features that continue to make LabVIEW one of the most popular and widely used graphical programming environments across the engineering community. The authors review the front panel controls, the Standard State Machine template, drivers, the instrument I/O assistant, error handling functions, hyperthreading, and Express VIs. It covers the introduction of the Shared Variables function in LabVIEW 8.0 and explores the LabVIEW project view. The chapter on ActiveX includes discussion of the Microsoft™ .NET® framework and new examples of

programming in LabVIEW using .NET. Numerous illustrations and step-by-step explanations provide hands-on guidance. Reviewing LabVIEW 8.0 and accompanied by the latest software, *LabVIEW: Advanced Programming Techniques, Second Edition* remains an indispensable resource to help programmers take their LabVIEW knowledge to the next level. Visit the CRC website to download accompanying software.

Electrical World

The untold story of Britain's oldest car makerMany previously unpublished images from the vaults of VauxhallA view from the inside that has been untold until nowOf interest to the motorcar historian and modellers Vauxhall has been making cars in Britain for longer than anyone else. The first Vauxhall car left a cramped Thames-side works in 1903. Moving to Luton in 1905, Vauxhall became famous as a maker of sporting and luxury cars. Bought by the American giant General Motors, the company entered the era of mass production and, with the addition of Bedford trucks and vans, became one of the top five UK producers. After the Second World War, Vauxhall became the household name it is today with models such as Viva, Astra, Cresta, Victor, Nova, Cavalier and Vivaro. The journey from the Thames to today's plants at Ellesmere Port and Luton is full of twists, turns, dramas and triumphs, and continues with the announcement of the sale of General Motors European operations to the PSA Groupe. The author worked at Vauxhall for 38 years, from apprentice to boardroom. He has told the Vauxhall story with the benefit of years of experience and a lifelong passion for the marque.

Nuclear Science Abstracts

Popular Science gives our readers the information and tools to improve their technology and their world. The core belief that Popular Science and our readers share: The future is going to be better, and science and technology are the driving forces that will help make it better.

U.S. Marines In Vietnam: Fighting The North Vietnamese, 1967

Cincinnati Magazine taps into the DNA of the city, exploring shopping, dining, living, and culture and giving readers a ringside seat on the issues shaping the region.

Electronic Industries & Tele-tech

This is the fourth volume in an operational and chronological series covering the U.S. Marine Corps' participation in the Vietnam War. This volume details the change in focus of the III Marine Amphibious Force (III MAF), which fought in South Vietnam's northernmost corps area, I Corps. This volume, like its predecessors, concentrates on the ground war in I Corps and III MAF's perspective of the Vietnam War as an entity. It also covers the Marine Corps participation in the advisory effort, the operations of the two Special Landing Forces of the U.S. Navy's Seventh Fleet, and the services of Marines with the staff of the U.S. Military Assistance Command, Vietnam. There are additional chapters on supporting arms and logistics, and a discussion of the Marine role in Vietnam in relation to the overall American effort.
