His second objective is, with the examples given, toencourage the practice of classroom assessment and research, andhis third objective is to promote the idea of curriculumleadership. The publication is divided into four main parts: Part I demonstrates how the underpinnings ofeducation—history, philosophy, psychology,sociology—determine the aims and objectives of the curriculumand the curriculum's internal structure, which integreatesassessment, content, teaching, and learning Part II focuses on the curriculum itself, considering such keyissues as content organization, trends, and change. A chapter oninterdisciplinary and integrated study and a chapter on project andproblem-based models of curriculum are included Part III examines problem solving, creativity, and design Part IV delves into teaching, assessment, and evaluation,beginning with a chapter on the lecture, cooperative learning, andteamwork The book ends with a brief, insightful forecast of the future ofengineering education.
