Malaysian Industrial Policy argues that selective government promotion efforts have been successful and crucial for Malaysia's industrialisation despite some disastrous consequences associated with the Mahathir governments heavy industrialisation programme. The authors present evidence to show that direct and indirect government interventions have induced and supported investments, accelerating the structural transformation of the Malaysian economy. However, industrial development in Malaysia has been modest compared with that in Northeast Asia because of weaknesses in industrial policy and excessive reliance on foreign investments.

Transfer of Learning in Organizations Notion Press

In the tradition of In Patagonia and Great Plains, Michael Meyer's In Manchuria is a scintillating combination of memoir, contemporary reporting, and historical research, presenting a unique profile of China's legendary northeast territory. For three years, Meyer rented a home in the rice-farming community of Wasteland, hometown to his wife's family. Their personal saga mirrors the tremendous change most of rural China is undergoing, in the form of a privately held rice company that has built new roads, introduced organic farming, and constructed high-rise apartments into which farmers can move in exchange for their land rights. Once a commune, Wasteland is now a company town, a phenomenon happening across China that Meyer documents for the first time; indeed, not since Pearl Buck wrote *The Good Earth* has anyone brought rural China to life as Meyer has here. Amplifying the story of family and Wasteland, Meyer takes us on a journey across Manchuria's past, a history that explains much about contemporary China--from the fall of the last emperor to Japanese occupation and Communist victory. Through vivid local characters, Meyer illuminates the remnants of the imperial Willow Palisade, Russian and Japanese colonial cities and railways, and the POW camp into which a young American sergeant parachuted to free survivors of the Bataan Death March. In Manchuria is a rich and original chronicle of contemporary China and its people.

The landlord's essential guide to residential rental law
Landlord's Legal Kit For Dummies is a comprehensive guide to the laws and legalities of renting property. This one-stop legal reference provides both guidance and the correct forms that help landlords avoid tenant issues, which could lead to legal ramifications. From screening potential tenants to handling your own insurance and taxes, you'll find expert insight in this easy-to-read style that simplifies complex legal matters into understandable terms. The book includes access to all the needed legal forms in both English and Spanish, and contains current information about applicable codes, ordinances, and policies across the country. Landlords have a responsibility to provide a safe, fully operational home for their tenants, and oversights can result in major court settlements. As a landlord, you need to know what the law requires of you. You also need to understand your rights, and the actions available to you when the tenant is in the wrong. This resource brings you up to speed, with the most current information about residential rental property law. The book covers privacy rights, domicile laws, paperwork, and more. Features up-to-date lease forms and contracts available for download online. Provides information about applicant screening questionnaires and anti-discrimination policies. Includes state and local building codes, health ordinances, and landlord-tenant laws. Instructs you how to handle breach of lease situations and evictions. There's even guidance on hiring a lawyer to protect your assets, property, and rights. Ignorance of the law is no excuse in court, and it frequently leads to misunderstandings that can hurt your wallet and your reputation. Before you lease another property, get all your ducks in a row with the essential instruction and tools in *Landlord's Legal Kit For Dummies*.

Facilitator's Manual for Orienting Field Workers United Nations
The European Agreement concerning the International Carriage of Dangerous Goods by Inland Waterways (ADN) done at Geneva on 26 May 2000 under the auspices of the United Nations Economic Commission for Europe (UNECE) and the Central Commission for Navigation on the Rhine (CCNR) has been in force since February

2008. This version has been prepared on the basis of amendments applicable as from 1 January 2017. The Regulations annexed to the ADN contain provisions concerning dangerous substances and articles, their carriage in packages and in bulk on board inland navigation vessels or tank vessels, as well as provisions concerning the construction and operation of such vessels. They also address requirements and procedures for inspections, the issue of certificates of approval, recognition of classification societies, monitoring, and training and examination of experts. They are harmonized to the greatest possible extent with the dangerous goods agreements for other modes of transport.

Creativity & Innovation NUS Press

The Asia Pacific Strategy for Emerging Diseases (APSED) was launched in 2005 as a common strategic framework for countries and areas of the region to strengthen their capacity to manage and respond to emerging disease threats, including influenza pandemics. Over the past five years, considerable progress has been made in the development and strengthening of the required core capacities. APSED 2010 will be implemented by building on the achievements of the original APSED, while recognizing variations in existing capacity levels across countries. It is intended that APSED 2010 will further support progress towards meeting International Health Regulations (2005) obligations and consolidate gains already made in establishing collective regional public health security. While APSED 2010 continued to focus on emerging diseases, it also seeks to maximize the benefits already achieved by widening its scope to include other acute public health threats and by identifying additional areas of synergy and special situations to which the Strategy can make important contributions. APSED (2010) seeks to provide a common framework for countries, WHO and partners to work together to enhance regional defence against public health threats.

Contemporary Security Studies is a uniquely engaging introduction to Security Studies, covering the key theories and contemporary issues in the field. A team of expert scholars strike a careful balance of depth and clarity, providing the essential companion for students exploring the modern security agenda.

In Manchuria Springer

This manual is designed to orient helpers to offer psychological first aid (PFA) to people following a serious crisis event. PFA involves humane, supportive and practical assistance for people who are distressed, in ways that respect their dignity, culture and abilities. The instructions and materials in this manual are for a half-day orientation (4 hours excluding breaks) to prepare helpers to support people recently affected by very stressful events. If you have more time available for the orientation, extra activities and slides are included in text boxes to deliver a full day orientation (five and a half hours excluding breaks). Where possible, one should organize full day orientations to allow for deeper learning. It is important to adapt the orientation and materials to the local culture, language and context, and to the likely kinds of crisis situations in which your participants would be helping. This facilitator's manual is to be used together with *Psychological First Aid: Guide for Field Workers*.

The Life and Death of a Garment Kuala Lumpur ; New York : Oxford University Press

The present book collects, integrates, and discusses the range of perspectives and discourses on agency at work. In addition, the book compiles the empirical research that has been generated by various perspectives. The chapters deal with the relationship between (a) agency at work, and (b) professional learning and development. They encompass a wide variety of working life domains and/or contexts, and are based on a broad range of epistemological and theoretical standpoints. This volume is not only thought to bring together current research, but also to foster the contemporary discourse on workplace agency a few steps further. Although the book strongly focuses on research originating in the field of workplace learning, its contents may be of interest to researchers from other scientific domains, such as socio-cognitive and development psychology, organisational behaviour, leadership, economics, life-course research, and philosophy.

New Trends in Intelligent Software Methodologies, Tools and

Techniques Springer Nature

In this volume, contributors look at response, recovery and adaptation to climate-induced disasters, in Asia-Pacific - the world's most disaster-prone region. Chapters examine case studies from Cambodia, Fiji, Solomon Islands and Samoa.

The Heart of a Leader: Fifty-Two Emotional Intelligence Insights to Advance Your Career uncovers insider secrets on leadership for go-getters who aren't satisfied with status quo careers. Authored by Kristin Harper, the book is based on more than twenty years of firsthand experience climbing the proverbial corporate ladder. Each chapter in *The Heart of a Leader* focuses on leadership and emotional intelligence competencies, actionable tools, bite-sized insights, and inspiring quotes to reference throughout your career. Whether you're an aspiring leader new in your career or a seasoned employee ready for the next level, adopting the time-tested insights in *The Heart of a Leader* will help accelerate your career.

2013 IEEE Business Engineering and Industrial Applications Colloquium (BEIAC) Carson-Dellosa Publishing

Software is an essential enabler for science and the new economy. It creates new markets and directions for a more reliable, flexible and robust society and empowers the exploration of our world in ever more depth, but it often falls short of our expectations. Current software methodologies, tools, and techniques are still neither robust nor reliable enough for the constantly evolving market, and many promising approaches have so far failed to deliver the solutions required. This book presents the keynote 'Engineering Cyber-Physical Systems' and 64 peer-reviewed papers from the 16th International Conference on New Trends in Intelligent Software Methodology Tools, and Techniques, (SoMeT_17), held in Kitakyushu, Japan, in September 2017, which brought together researchers and practitioners to share original research results and practical development experience in software science and related new technologies. The aim of the SoMeT conferences is to capture the essence of the new state-of-the-art in software science and its supporting technology and to identify the challenges such technology will have to master. The book explores new trends and theories which illuminate the direction of developments in this field, and will be of interest to anyone whose work involves software science and its integration into tomorrow's global information society.

Kedah, 1771-1821 Basic Books (AZ)

This book is a part of ICL new book series "ICL Contribution to Landslide Disaster Risk Reduction" founded in 2019. Peer-reviewed papers submitted to the Fifth World Landslide Forum were published in six volumes of this book series. This book contains the followings: • Four Forum lectures and one award paper • Sendai Landslide Partnerships, Kyoto Landslide Commitment, and International Programme on Landslides. • Landslide-induced tsunamis • Landslides at UNESCO designates sites and contribution from WMO, FAO, and IRDR • Education and Capacity Development for Risk Management and Risk Governance Prof. Kyoji Sassa is the Founding President and the Secretary-General of International Consortium on Landslides (ICL). He has been the Editor-in-Chief of International Journal Landslides since its foundation in 2004. Prof. Matjaž Mikoš is the Vice President of International Consortium on Landslides and Vice President of Slovenian Academy of Engineering. He is a Professor and Dean of Faculty of Civil and Geodetic Engineering, University of Ljubljana, Slovenia. Dr. Shinji Sassa is Head of Soil Dynamics Group and Research Director of International Research Center for Coastal Disasters, Port and Airport Research Institute, National Institute of Maritime, Port and Aviation Technology, Japan. Prof. Peter Bobrowsky is the President of International Consortium on Landslides. He is a Senior Scientist of Geological Survey of Canada, Ottawa, Canada. Prof. Kaoru Takara is the Executive Director of International Consortium on Landslides. He is a Professor and Dean of Graduate School of Advanced Integrated Studies (GSAIS) in Human Survivability (Shishu-Kan), Kyoto University. Dr. Khang Dang is the Secretary General of the Fifth World Landslide Forum. He also serves as the Research Promotion Officer of ICL and a Lecturer at the University of Science, Vietnam National University, Hanoi.

Good Is Not Enough Bloomsbury Publishing USA

This book presents peer-reviewed articles from the 1st International Conference on Dam Safety Management and Engineering (ICDSME 2019), organized by the Malaysian National Committee on Large Dams (MYCOLD), Tenaga Nasional Berhad (TNB), Department of Irrigation and Drainage (DID) and Universiti Tenaga Nasional (UNITEN). With the theme "resilient dams for resilient communities," the conference highlighted the latest

developments in the area and provided a platform for researchers and professionals to exchange ideas and to address dam safety and engineering issues with the environment in mind. The topics covered included, but was not limited to, best practices in dam safety, reservoir management, dam health monitoring, risk assessment, emergency management and sustainable dams.

Based on a systematic review of the literature on employee engagement, this report seeks to synthesise thinking and evidence.

Swim For It! Routledge

Longlisted for the FT/McKinsey Business Book of the Year Award A groundbreaking chronicle of the birth--and death--of a pair of jeans, that exposes the fractures in our global supply chains, and our relationships to each other, ourselves, and the planet Take a look at your favorite pair of jeans. Maybe you bought them on Amazon or the Gap; maybe the tag says "Made in Bangladesh" or "Made in Sri Lanka." But do you know where they really came from, how many thousands of miles they crossed, or the number of hands who picked, spun, wove, dyed, packaged, shipped, and sold them to get to you? The fashion industry operates with radical opacity, and it's only getting worse to disguise countless

environmental and labor abuses. It epitomizes the ravages inherent in the global economy, and all in the name of ensuring that we keep buying more while thinking less about its real cost. In *Unraveled*, entrepreneur, researcher, and advocate Maxine Bédard follows the life of an American icon--a pair of jeans--to reveal what really happens to give us our clothes. We visit a Texas cotton farm figuring out how to thrive without relying on fertilizers that poison the earth. Inside dyeing and weaving factories in China, where chemicals that are banned in the West slosh on factory floors and drain into waterways used to irrigate local family farms. Sewing floors in Bangladesh and Sri Lanka are crammed with women working for illegally low wages to produce garments as efficiently as machines. Back in America, our jeans get stowed, picked, and shipped out by Amazon warehouse workers pressed to be as quick as the robots primed to replace them. Finally, those jeans we had to have get sent to landfills--or, if they've been "donated," shipped back around the world to Africa, where they're sold for pennies in secondhand markets or buried and burned in mountains of garbage. A sprawling, deeply researched, and provocative tour-de-force, *Unraveled* is not just the story of a pair of pants, but also the story of our global economy and our role in it. Told with piercing insight and unprecedented reporting, *Unraveled* challenges us to use our relationship with our jeans--and all that we wear--to reclaim our central role as citizens to refashion a society in which all people can thrive and preserve the planet for generations to come. *Sambutan Hari Kebangsaan dan Hari Malaysia 2017 Career Examination Passbooks*

In this book, internationally respected scholars from the disciplines of educational science, business administration and psychology thoroughly discuss practice-related questions on learning transfer in organizations. Readers will learn solid

concepts for securing and evaluating learning transfer. This volume offers new insights about learning transfer in organizations and their implications for both research and practice. It examines the actual state in practice and provides the foundation for improvements in the design and evaluation of further training measures that are conducive to the transfer of learning. In addition, coverage details theoretical models on learning transfer in further vocational training and develops concepts that enable the transfer of learning for further training in organizations. The book also evaluates further training measures on different levels on the basis of relevant criteria.

Southeast Asian Minorities in the Wartime Japanese Empire Oxford University Press

"Creativity and innovation are to events, what the heart and soul are to the living." The book aims at encouraging readers to capture the traits and develop skills for enhancing their creative and innovative capabilities, cultivating the culture of creativity and innovation. Creativity is inventiveness with new ideas; critical thinking is generating and selecting ideas; and innovation turns creativity into products, processes and services. Creativity + Critical thinking + Innovation = Path of Desired Change The primary difference between creativity and innovation is that the former refers to conceiving a new idea while the latter involves converting that idea into a marketable commodity. Creativity and innovation are an attempt to gain a competitive advantage. Organizations are now focusing on enhancing their employees' creativity and not merely developing their technical competencies and skills. Undoubtedly, creativity is the most important human resource of all without which there would be no progress, and we would be forever repeating the same patterns. Innovation is at the heart of all successful companies.
