The renowned jewelry crafter teaches readers how to make beautiful creations using the traditional Japanese braiding technique of Kumihimo. Kumihimo is the centuries-old Japanese artform of creating elegant braids using intricate and beautiful patterns and designs. These braids are then fashioned into all kinds of objects, such as bracelets, necklaces and more. This illustrated guide features step-by-step diagrams and photographs to help you create your own Kumihimo jewelry projects at home. Written by expert jewelry crafter Dorothy Wood, *The Beginner’s Guide to Kumihimo* covers a range of techniques including flat braids, square braids, honeycomb braids, hollow braids, spiral braids, and braiding with beads. Readers will learn to use different cords and wire, as well as finishing techniques. This volume also features templates to make your own Kumihimo disk and plate, plus a handful of contemporary projects for jewelry and accessories so you can put your newfound braiding skills to use right away.

Beaded Kumihimo Jewelry is a collection of projects made using the most common kumihimo braid: kongoh gumi. The book includes 20+ all-new projects using this popular technique all in a friendly, easy-to-follow format made using an inexpensive kumihimo disk incorporating all your favorite beads. As you go through her third book, Rebecca will show you how to use many different types of beads in a variety of sizes to make kumihimo jewelry effectively. One beneficial section of this book is Rebecca’s “trouble shooting” section, used to help explain some of the most problematic areas of a kumihimo braid making each project more manageable for beginners. There is also a helpful Kumihimo Math section used to calculate the proper length and materials of the braid. Along with a few more detailed instructions for the foam disk, and a discussion about using the marudai. Beaded Kumihimo Jewelry is a great addition to your beading library not only for the beautiful designs, but the detailed discussions of both kumihimo math and trouble shooting.

Micro macramé is a term in jewelry making that refers to the tiny knots made with much thinner cords than traditional macramé art. Through 20 projects, this book aims to turn any novice jewelry maker into a master of this emerging technique. Many of the projects are bracelets, which are popular and quick to work up, but this book also includes necklaces and other projects for variety. This technique-focused book also teaches jewelry makers how to incorporate beads and crystals into their macramé jewelry, so they can make each piece their own and take macramé from a craft to an art.

Weaving is a highly accessible craft — over, under is the basic technique — but the stumbling block for many would-be weavers has been the high cost of a commercial loom. The Weaving Explorer removes that barrier, inviting crafters and artists to try out an amazing range of techniques and creative projects that are achievable with a simple homemade loom, or no loom at all! Weavers Deborah Jarchow and Gwen W. Steege take inspiration from the world of folk weaving traditions, adding a contemporary spin by introducing an unexpected range of materials and home dec projects. From sturdy rag fabric grocery bags to freeform wire baskets, delicately woven thread bracelets to colorful woven rugs, crafters will delight in exploring the opportunities to make their own personal variations on these beautiful — and functional — creations.

This is the second Kumihimo book by Rebecca Combs. This book will focus more on the beginner and shares some of the most popular features that made the first book a runaway success: conversational voice, skill-building format, Kumihimo math, and continuing to use the inexpensive Kumihimo foam disk. Kumihimo Simplified includes 5 “new” braids: 8-warp basket weave, 16-warp rectangular, 16-warp hollow basket, 8-warp half-round, and 8-warp square. Beads will be included within the braids where appropriate, however, the focus will be straight braid. Special sidebars will include Creative Closures - 5 different ways to finish Kumihimo braids, besides the common gluing of endcaps.

Kumihimo is a form of Japanese braiding using various types of stringing material, often combined with beads to make exceptional jewelry. The term Kumihimo in Japanese means the gathering of threads. This technique involves using different types of looms to achieve different types of braids. The possibilities are endless and can be customized to suit everybody, so find your Kumihimo supplies and get started When doing Kumihimo you will learn that using a different number of strands, as well as different colors, will change the overall look. Different types of stringing material can also change the look, as well as adding beads to all or some of the strands. Keep in mind that you may not want to use a stringing material that stretches. In Kumihimo, each thread in one single "slit" is referred to as a warp. Here we will be using the round Kumihimo disk with 32 slits to create an 8 warp basic round braid. A good rule of thumb when measuring stringing material is to multiply the length you want by three. This will accommodate most designs unless you are using larger beads, in which case you may need to adjust the length. Once you have mastered the basic round braid, learn how to add beads to Kumihimo. Discover kumihimo book for beginner 'Complete Guide Kumihimo Beginner to Make Friendship Bracelets'.
