Tan's delectable education through the landscape of Singaporean cuisine teaches us that food is the tie that binds." -- Jennifer 8. Lee, author of *The Fortune Cookie Chronicles* After growing up in the most food-obsessed city in the world, Cheryl Lu-Lien Tan left home and family at eighteen for America--proof of the rebelliousness of daughters born in the Year of the Tiger. But as a thirtysomething fashion writer in New

Was it too late to learn the secrets of her grandmothers' and aunties' kitchens, as well as the tumultuous family history that had kept them hidden before In her quest to recreate the dishes of her native Singapore by cooking with her family, Tan learned not only cherished recipes but long-buried stories of past generations. *A Tiger in the Kitchen*, which includes ten authentic recipes for Singaporean classics such as pineapple tarts and Teochew braised duck, is the charming, beautifully written story of a Chinese-Singaporean ex-pat who learns to infuse her New York lifestyle

In this series, acclaimed comics scholar Dr. Julian Darius argues that the DC Universe is old enough to have produced a canon of classic stories. Here, he analyzes this canon as it pertains to the Justice League and DC's universe-wide crossovers. Since 1940, DC Comics has been bringing its heroes together, first as the Justice Society, then (beginning in 1960) as the Justice League, and finally (beginning in 1985) in universe-wide crossovers. Shared super-hero universes achieved widespread attention in the wake

of Marvel's movies, but DC's been paving the way since 1940. A decade in the making, CLASSICS ON INFINITE EARTHS takes readers on a tour of this history, using discussion of classic stories as a unique way of illuminating the history and evolution of the DC Universe. In the process, Dr. Julian Darius offers what may be the very first long-term study of how to manage such a shared universe. From Sequart Organization. More info at <http://sequart.org>

The widespread belief that tech-savvy, educated millennials are well positioned to handle the challenges of the fourth industrial revolution is unfounded. It does not fully grasp the reality

of a flux society, where relevant technological skills and knowledge are continuously changing: no one is permanently tech-savvy. Millennials, like other generations, face the challenge of needing to continually reskill. This has compounded their struggle to begin their careers at a point when there is no longer any guarantee of lifetime employment or retirement at a set age. Shaping the Futures of Work is a timely sociological exploration of the impact of technological innovations on employment. Nilanjan Raghunath proposes that stakeholders such as states, enterprises, and citizens hold equally important roles in ensuring that people can adapt, innovate,

and thrive within conditions of flux. A promising model focuses on collaboration and proactive governance. While good governance includes citizen engagement, proactive governance goes one step further, creating inclusive policies, roadmaps, and infrastructure for social and economic progress. This book reveals that lifelong learning and adaptability are imperative, even for well-educated professionals. Using Singapore and Singaporean millennials as a case study, Raghunath examines proactive governance and delivers research and analysis to elucidate career trajectories, pointing to a work ethic

that aims to engage with technological futures. Looking at local and global sociological literature to confirm the need for proactive governance, *Shaping the Futures of Work* suggests that Singaporean millennials – and professionals around the world – need to better prepare themselves for flux, risk, failure, and reinvention for career mobility.

Ernst Jünger's early essays from the conservative revolution. "Before long, the age of progress will seem as puzzling as the mysteries of an

Egyptian dynasty. In that era, however, the world celebrated one of those triumphs that endow victory, for a moment, with the aura of eternity. More menacing than Hannibal, with all too mighty fists, somber armies had knocked on the gates of its great cities and fortified channels."

Scholastic Teaching Resources

This manual applies to Air Force active duty, Air Force Reserve, Air National Guard, emergency essential civilians and contract personnel. This manual contains the latest changed approved by the Air Force effective JUNE 24, 2011. It compiles existing war skill tactics, techniques, and procedures from many sources into a pocket-sized, quick reference guide. This manual implements AFD 10-25, Emergency Management, and incorporates provisions of various International Agreements and

Conventions, US Codes, DOD Directives, Chairman of the Joint Chiefs of Staff Command Instructions, Uniform Code of Military Justice, Air Force Instructions, Manuals, Pamphlets, Visual Aids and Handbooks; AF Occupational Safety and Health Standards, Technical Orders, Guides, and Concepts of Operation. As an expeditionary Airman you must stay ready to deploy anywhere in the world on short notice. This manual doesn't contain everything you must know. It doesn't focus on the integrated joint or multinational nature of combat operations. It doesn't replace regulations or local procedures you'll need to follow. This manual does, however, cover basic warfighting

skills and points of knowledge with the intent to help you successfully complete the mission. The tasks outlined in this manual apply at both deployed and home station locations. Keep the Airman's Manual close to you; use it while training and exercising for contingencies and deployments. Refer to it often... you'll need it. Fly, Fight, and Win! AFPAM 10-100. An intranet portal project may well be the first and last project in your organisation that truly touches everyone, from the office of your CEO to the newest recruit. It may well be the most significant investment that you ever make in

your people, their processes and their systems and has the power and potential to transform your organisation. However, it can be a tough project to deliver, bringing great exposure to its participants. All your customers will be only a small march away down the corridor and will all know where you live! Considering the \$1.5 billion market for intranet portal technology worldwide, there are surprisingly few books on the topic (and those typically either very technical or very theoretical). The Intranet Portal Guide is a deliberately practical handbook for the stressed middle manager, seeking to make things happen in their organisation. The book is divided into

three sections (before, during and after) and 31 chapters, addressing everything from the key issue of how to make the business case through to ongoing performance enhancement and benefit realisation. It is packed full of tools, templates, plans and processes for successful delivery - based on real life experience of implementation at two major UK companies.

After World War II, a powerful conviction took hold among American intellectuals and policymakers: that the United States could profoundly accelerate and ultimately direct the development of the decolonizing world, serving as a

modernizing force around the globe. By accelerating economic growth, promoting agricultural expansion, and encouraging the rise of enlightened elites, they hoped to link development with security, preventing revolutions and rapidly creating liberal, capitalist states. In *The Right Kind of Revolution*, Michael E. Latham explores the role of modernization and development in U.S. foreign policy from the early Cold War through the present. The modernization project rarely went as its architects anticipated. Nationalist leaders in postcolonial states such as India, Ghana, and Egypt pursued their own independent visions of development. Attempts to promote

technological solutions to development problems also created unintended consequences by increasing inequality, damaging the environment, and supporting coercive social policies. In countries such as Guatemala, South Vietnam, and Iran, U.S. officials and policymakers turned to modernization as a means of counterinsurgency and control, ultimately shoring up dictatorial regimes and exacerbating the very revolutionary dangers they wished to resolve. Those failures contributed to a growing challenge to modernization theory in the late 1960s and 1970s. Since the end of the Cold War the faith in modernization as a

panacea has reemerged. The idea of a global New Deal, however, has been replaced by a neoliberal emphasis on the power of markets to shape developing nations in benevolent ways. U.S. policymakers have continued to insist that history has a clear, universal direction, but events in Iraq and Afghanistan give the lie to modernization's false hopes and appealing promises. *No Promises in the Wind (DIGEST) Forklift Safety - Reducing the Risks*"This document seeks to improve health and safety outcomes in Australian workplaces by offering businesses and employees practical guidance on managing risks related to forklifts."--
