Genetics and

Biotechnology S. Chand Publishing

Mycology, the study of fungi, originated as a subdiscipline of botany and was a descriptive discipline, largely neglected as an experimental science until the early years of this century. A seminal paper by Blakeslee in 1904 provided evidence for self incompatibility, termed

"heterothallism", and stimulated interest in studies related to the control of sexual reproduction in fungi by mating-type specificities. Soon to follow was the demonstration that sexually reproducing fungi exhibit Mendelian inheritance and that it was possible to conduct formal genetic analysis with fungi. The names Burgeff, Kniep and Lindegren are all associated with this early period of fungal genetics research. These studies and the discovery of penicillin by Fleming, who shared a Nobel Prize in 1945, provided further impetus for experimental research with fungi. Thus began a period of interest in mutation induction and analysis of mutants for biochemical traits. Such fundamental research, conducted largely with *Neurospora crassa*, led to the one gene: one enzyme hypothesis and to a second Nobel Prize for fungal research awarded to Beadle and Tatum in 1958. Fundamental research in biochemical genetics was extended to other fungi, especially to *Saccharomyces cerevisiae*, and by the mid-1960s fungal systems were much favored for studies in eukaryotic

molecular biology and were soon able to compete with bacterial systems in the molecular arena.

The New York Times

bestseller that gives

readers a paradigm-

shattering new way to

think about motivation

from the author of *When:*

The Scientific Secrets of

Perfect Timing Most

people believe that the

best way to motivate is

with rewards like

money—the carrot-and-

stick approach. That's a

mistake, says Daniel H.

Pink (author of *To Sell Is*

Human: The Surprising

Truth About Motivating

Others). In this

provocative and

persuasive new book, he

asserts that the secret to

high performance and

satisfaction-at work, at

school, and at home—is

the deeply human need to

direct our own lives, to

learn and create new

things, and to do better

by ourselves and our

world. Drawing on four

decades of scientific

research on human

motivation, Pink exposes

the mismatch between

what science knows and

what business does—and

how that affects every

aspect of life. He

examines the three

elements of true motivation—autonomy, mastery, and purpose—and offers smart and surprising techniques for putting these into action in a unique book that will change how we think and transform how we live.

Business Regulatory Framework (Latest Edition - 2020) Thomson South-Western

This new edition is written with two major objectives: (1) to help readers understand audit decision making and evidence accumulation, and (2) reflect changes in the profession by integrating assurance and attestation service as well as risk issues. This 6th edition introduces two new tools that practitioners use to assess risk and to identify assurance service opportunities: Client Strategy Templates and Balanced Scorecards.

XBRL: Zero to Pro in 2 days By CA. Uttam Prakash Agarwal "XBRL: Zero to Pro in 2 days" provides a rare combination of concise as well as comprehensive exposition on the beleaguering topic which is "XBRL", eXtensible Business Reporting Language. This book has been written specifically in the context of the Indian Ministry of Corporate Affairs' XBRL mandate and thus leaves out all the unnecessary aspects of XBRL. Both, the concept of XBRL and its use for complying with the mandate, have been simplified to the maximum possible extent. This enables the common man who has absolutely no idea about XBRL to learn and become capable of using XBRL, and that too in a matter of few days! Highlights
Explanations are given in context of "Revised Taxonomy" published on 27th August, 2011 by the MCA Interpretation and analysis of Updated Business Rules published by the MCA Includes detailed explanation of Validation in the context of MCA validation tool
Written from the point of view of an Accountant and not from a technical

standpoint All aspects relevant to Indian MCA mandate have been dealt with, including XBRL conversion process using different software Includes other relevant literature on Future of XBRL, Opportunities for professionals as well as General Circulars issued by the MCA.

Knowledge updating is a never-ending process and so should be the revision of an effective textbook.

The book originally written fifty years ago has, during the intervening period, been revised and reprinted several times. The authors have, however, been thinking, for the last few years that the book needed not only a thorough revision but rather a substantial rewriting. They now take great pleasure in presenting to the readers the twelfth, thoroughly revised and enlarged, Golden Jubilee edition of the book. The subject-matter in the entire book has been re-written in the light of numerous criticisms and suggestions received from the users of the earlier editions in India and abroad. The basis of this revision has been the emergence of new literature on the subject, the constructive feedback from students and teaching fraternity, as well as those changes that have been made in the syllabi and/or the pattern of examination papers of numerous universities.
